SAFETY INFORMATION

Always follow basic safety precautions when installing or replacing light bulbs to reduce the risk of fire, electric shock, or personal injury.

- **WARNING:** Risk of electric shock. Disconnect power before installation or servicing.
- Ensure the light fixture is rated for the bulb's wattage (40W).
- Do not use with dimmers unless specifically rated for incandescent bulbs.
- Do not use in wet locations or where directly exposed to water.
- Allow the bulb to cool completely before handling or replacing.
- Do not exceed the maximum wattage indicated on the fixture.

SETUP AND INSTALLATION

Follow these steps to properly install your Satco S3001 G40 light bulb:

1. **Turn off power:** Before attempting any installation, ensure the power to the light fixture is turned off at the circuit breaker or fuse box.
2. **Prepare the fixture:** If replacing an old bulb, carefully unscrew it from the socket. Allow it to cool if it was recently in use.
3. **Install the new bulb:** Gently screw the Satco S3001 G40 bulb into the E26 medium base socket. Turn clockwise until it is finger-tight. Do not overtighten.
4. **Restore power:** Once the bulb is securely installed, restore power to the fixture at the circuit breaker or fuse box.
5. **Test:** Turn on the light switch to confirm the bulb is functioning correctly.

OPERATING INSTRUCTIONS

The Satco S3001 G40 incandescent light bulb operates like a standard bulb. Simply use the wall switch or fixture control to turn the light on or off. This bulb is designed for indoor use in compatible E26 medium base fixtures.

MAINTENANCE

Minimal maintenance is required for this light bulb.

- **Cleaning:** Ensure the power is off and the bulb is cool before cleaning. Wipe the bulb with a soft, dry cloth. Do not use liquid cleaners or abrasive materials.
- **Replacement:** When the bulb reaches the end of its life (approximately 2500 hours of average use), follow the installation steps to replace it with a new, compatible bulb.

TROUBLESHOOTING

If your Satco S3001 G40 light bulb is not functioning as expected, consider the following common issues:

Problem	Possible Cause	Solution
Bulb does not light up	No power to fixture, loose bulb, faulty bulb, faulty fixture	Check circuit breaker. Ensure bulb is screwed in tightly. Test bulb in another working fixture. Inspect fixture for damage.
Bulb flickers	Loose connection, incompatible dimmer, faulty wiring, bulb nearing end of life	Tighten bulb. Ensure dimmer is compatible with incandescent bulbs. Consult an electrician for wiring issues. Replace bulb if old.

Problem	Possible Cause	Solution
Bulb burns out quickly	Over-voltage, excessive vibration, faulty fixture, manufacturing defect	Verify fixture voltage. Ensure bulb is not subject to constant vibration. Replace bulb. If issue persists, consult an electrician or contact retailer.
