MAXXAIR 00007500K

Maxxfan Deluxe User Manual

Model: 00-07500K | Brand: MAXXAIR

PRODUCT OVERVIEW

The MaxxFan Deluxe is the only complete RV ventilation system that incorporates a vent, fan, and rain shield in a single all-in-one unit. It features twin lifting arms to prevent lid fluttering in high winds or while driving. The powerful, fuse-protected, long-life, sealed ball bearing 12-volt fan motor drives a 12-inch, 10-blade fan. A flush-mounted, easy-to-clean keypad controls fan speed, thermostat, and air intake/exhaust functions. This unit fits all standard 14" x 14" roof openings and includes all necessary mounting screws and hardware (roof sealant must be purchased separately). It efficiently brings in fresh air and removes hot, musty air and odors.

Key Features:

- **ALL-IN-ONE VENTILATION SOLUTION:** Combines a vent, fan, and vent cover into a single unit.
- **POWERFUL 10-SPEED FAN:** Features a reversible fan with thermostat for optimal temperature control.
- **BUILT-IN RAIN PROTECTION:** Integrated rain cover provides full-time protection, allowing fan use during rain or while driving.
- **EASY MAINTENANCE:** Designed with an easy-to-remove interior insect screen that requires no tools.
- **DURABLE & RELIABLE:** Fits standard 14"x14" roof openings, backed by a 2-year limited warranty and a lifetime limited warranty on the lid.

SETUP AND INSTALLATION

Proper installation is crucial for the optimal performance and longevity of your Maxxfan Deluxe. The unit is designed to fit standard 14" x 14" RV roof openings.

Components Overview:

Figure 2: Key components of the Maxxfan Deluxe, including the fan unit, interior garnish ring, receiving flange, remote, and various fasteners.

Installation Process:

1. **Prepare the Opening:** Ensure your RV roof opening is a standard 14" x 14". Remove any existing vent and thoroughly clean the area around the opening.
2. **Apply Sealant:** Apply a continuous strip of butyl caulk to the underside of the receiving flange, ensuring all screw holes are covered.

3. **Position the Receiving Flange:** Insert the receiving flange into the roof opening. It should be centered, with the metal clips facing the sides of the vehicle (not front or rear).
4. **Secure the Flange:** Fasten the receiving flange to the roof using the provided screws. Be careful not to overtighten to avoid cracking the flange.
5. **Connect Wiring:** Connect the Maxxfan's 12V DC power wires to your vehicle's 12V power supply. Ensure proper polarity (black wire is positive).
6. **Mount the Fan Unit:** With the Maxxfan open and the exhaust/intake louvers facing the rear of the vehicle, lower the fan unit onto the receiving flange. Ensure power wires slide to the interior and do not get caught.
7. **Secure the Fan Unit:** Fasten the Maxxfan to the receiving flange using the four 3/4-inch long, number 10 stainless steel screws provided.
8. **Seal the Installation:** Apply a bead of self-leveling lap sealant (such as Dicor 501 LSW) over every exposed screw head and along the outside edge of the flange, all the way around the vent.
9. **Install Interior Garnish Ring:** Place any excess wiring into the interior roof opening and slide the garnish ring into position. Fasten it using the four painted flathead screws provided.

OPERATING INSTRUCTIONS

The Maxxfan Deluxe can be operated via its flush-mounted keypad or the included remote control. The remote offers comprehensive control over all functions.

Remote Control Functions:

- **Power On/Off:** Turn the fan on or off.
- **Fan Speed:** Adjust fan speed through 10 settings.
- **Thermostat Control:** Set a desired temperature, and the fan will automatically adjust its operation to maintain it.
- **Air Direction:** Switch between air intake (pulling fresh air in) and exhaust (pushing hot air out).
- **Lid Control:** Open or close the vent lid manually.

MAINTENANCE

Regular maintenance ensures the longevity and efficient operation of your Maxxfan Deluxe.

- **Insect Screen Cleaning:** The interior insect screen is easy to remove without tools for cleaning. Regularly clean the screen to maintain optimal airflow.

- **Lid Cleaning:** Periodically clean the exterior lid to remove dirt and debris, ensuring clear visibility and proper function of the rain cover.
- **Sealant Inspection:** Regularly inspect the roof sealant around the flange for any cracks or deterioration. Reapply sealant as needed to prevent leaks.

TROUBLESHOOTING

For detailed troubleshooting steps, please refer to the official User Manual PDF linked in the Support section below. Common issues may include power supply problems, fan motor malfunctions, or remote control connectivity issues.

SPECIFICATIONS

Feature	Specification
Brand	MAXXAIR
Model Name	MAXXFAN DELUXE
Item Model Number	00007500K
Color	Smoke
Style	10 Speed
