7. TROUBLESHOOTING

If you encounter any issues with your wardrobe, refer to the following common solutions:

Problem	Possible Cause	Solution
Wardrobe is wobbly/unstable.	Loose fasteners; uneven floor; not anchored.	Check and tighten all screws and cam locks. Ensure the wardrobe is on a level surface. Consider using shims if the floor is uneven. Anchor to the wall if not already done.

Problem	Possible Cause	Solution
Doors do not close properly or are misaligned.	Hinges are loose or improperly adjusted; frame is not square.	Adjust the screws on the hinges to align the doors. Ensure the wardrobe frame is square during assembly. Re-check all frame connections.
Shelves sag or are not level.	Overloaded shelf; shelf pins not fully inserted.	Reduce the weight on the shelf. Ensure shelf pins are fully inserted into the pre-drilled holes.
Drawers (if applicable) stick or don't slide smoothly.	Misaligned runners; debris in runners.	Check that drawer runners are correctly installed and aligned. Clean any dust or debris from the runners.

If the problem persists after attempting these solutions, please contact customer support.
