

Globo 3302-3

Globo Solar 3-piece set of Solar Garden Spotlights (Model 3302-3)

Instruction Manual

INTRODUCTION

This manual provides instructions for the setup, operation, and maintenance of your Globo Solar 3-piece set of solar garden spotlights. These self-charging outdoor lamps feature a stone design, blending naturally into your garden while providing accent lighting.

Each unit is equipped with built-in LED lights and a rechargeable NiMH battery, operating independently without the need for external power cables. They are designed for outdoor use with an IP44 protection rating.

SETUP

1. **Unpacking:** Carefully remove all three solar spotlights from their packaging. Inspect each unit for any signs of damage.
2. **Initial Charge:** Before first use, place the solar spotlights in a location where the solar panel can receive direct sunlight for at least 8-12 hours. This ensures the internal NiMH battery is fully charged.

Image: Close-up of a single Globo Solar stone spotlight, highlighting the integrated solar panel on its upper surface and the LED light unit within the stone-like housing. This panel is crucial for charging the internal battery.

3. **Placement:** Choose a location in your garden, flower beds, or along paths where the spotlights can receive ample direct sunlight during the day. Ensure the solar panel is not obstructed by shade from trees, buildings, or other objects.
4. **Positioning:** Place the stone-designed spotlights to accent specific areas or to illuminate pathways. The discreet stone look blends into the natural environment during the day.

Image: Three Globo Solar stone spotlights are strategically placed within a garden landscape, nestled among lush green foliage and smaller decorative rocks. This demonstrates their intended use for accent lighting in outdoor environments.

OPERATING INSTRUCTIONS

- **Automatic Operation:** The Globo Solar spotlights are equipped with a twilight sensor. They will automatically turn on at dusk and turn off at dawn, provided the battery has received sufficient charge during the day.
- **Light Duration:** With a full day's charge (approximately 8 hours of direct sunlight), the spotlights can provide illumination for up to 8 hours. Performance may vary based on sunlight intensity and duration.
- **No Manual Switch:** These units do not feature a manual on/off switch or a motion sensor. Their operation is entirely automatic based on light conditions.

MAINTENANCE

- **Cleaning the Solar Panel:** Regularly wipe the solar panel with a soft, damp cloth to remove dust, dirt, and debris. A clean panel ensures optimal charging efficiency.
- **Battery Replacement:** Each spotlight contains one rechargeable 1.2V AA NiMH 600mAh battery. If the light duration significantly decreases over time, the battery may need replacement. Refer to the specifications for battery type.
***Caution:** Use only rechargeable NiMH batteries of the specified type and voltage. Do not use alkaline or other non-rechargeable batteries.*
- **Environmental Protection:** The spotlights have an IP44 rating, meaning they are protected against solid objects larger than 1mm and against splashing water from any direction. While suitable for outdoor use, avoid submerging them in water.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Spotlight does not turn on at night.	• Insufficient sunlight during the day. • Solar panel is dirty or obstructed. • Battery is depleted or faulty. • Twilight sensor is obstructed or faulty.	• Relocate the spotlight to an area with more direct sunlight. • Clean the solar panel. • Allow several days for charging. If problem persists, replace the NiMH battery. • Ensure no external light source (e.g., street light) is directly shining on the sensor, preventing it from activating.
Light duration is shorter than expected.	• Insufficient charge due to cloudy weather or shade. • Battery capacity has degraded over time.	• Ensure optimal solar panel exposure. • Replace the rechargeable NiMH battery.

SPECIFICATIONS

Model Number	3302-3
Brand	Globo
Product Type	Solar Garden Spotlight (3-piece set)
Design	Stone look
Material	Plastic, Grey

Light Source	Built-in LED (2 x 0.06 Watt per lamp)
Power Source	Solar-powered, Battery operated
Battery	1x AA NiMH 600mAh 1.2V rechargeable battery (included per unit)
Light Duration	Approx. 8 hours (with full solar charge)
Protection Rating	IP44 (Protected against splashing water)
Sensors	Twilight sensor (automatic on/off), No motion sensor
Dimensions (per unit)	Height: 10.5 cm, Width: 12.5 cm, Depth: 15 cm
Item Weight (total set)	1.3 kg
Assembly Required	Yes (minor, for placement)
Intended Use	Outdoor Decoration / Accent Lighting
