Casio MTP-1239D-2A

Casio MTP-1239D-2A Men's Analog Day Date Watch Instruction Manual

INTRODUCTION

This manual provides essential instructions for the proper use and maintenance of your Casio MTP-1239D-2A Analog Day Date Watch. Please read this manual thoroughly to ensure correct operation and to prolong the life of your timepiece. Keep this manual for future reference.

PRODUCT OVERVIEW

The Casio MTP-1239D-2A is a men's analog watch featuring a day and date display, housed in a durable stainless steel case with a matching bracelet. It is powered by a reliable Japanese Quartz movement and offers water resistance suitable for daily use.

SETUP

Setting the Time

1. Pull the crown out to the second click position.
2. Turn the crown to advance the hour and minute hands to the desired time. Ensure AM/PM is correctly set if your watch has a 24-hour indicator or if setting the day/date.
3. Push the crown back in to the normal position to start the timekeeping.

Setting the Day and Date

1. Pull the crown out to the first click position.
2. Turn the crown clockwise to adjust the date.
3. Turn the crown counter-clockwise to adjust the day of the week.

4. Avoid setting the day and date between 9:00 PM and 4:00 AM, as this may interfere with the automatic date change mechanism.
5. Once the day and date are set, push the crown back in to the normal position.

OPERATING THE WATCH

Wearing the Watch

The watch features a stainless steel bracelet with a push-button clasp. To open the clasp, press the buttons on the sides of the clasp. To close, align the two parts of the clasp and press firmly until it clicks securely.

Water Resistance

This watch is rated for 30 meters (3 ATM) of water resistance. This means it is suitable for everyday use and can withstand splashes or brief immersion in water. It is **not** suitable for swimming, diving, or showering. Avoid operating the crown while the watch is wet.

MAINTENANCE

Cleaning Your Watch

To maintain the appearance of your watch, wipe the case and band with a soft, dry cloth regularly. For stubborn dirt, a slightly damp cloth can be used, followed by a dry cloth. Avoid using chemical cleaners or abrasive materials.

Battery Replacement

The watch is powered by one LR44 battery. When the watch stops or the hands move erratically, the battery may need replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and water resistance.

TROUBLESHOOTING

- Watch not running:** Check if the crown is pushed in completely. If it is, the battery may need replacement.
- Incorrect time/date:** Refer to the "Setting the Time" and "Setting the Day and Date" sections to re-adjust.
- Condensation inside the watch:** This may indicate a loss of water resistance. Contact a service center immediately.

SPECIFICATIONS
