CARE AND MAINTENANCE

Proper care will ensure the longevity and optimal playback quality of your Audio CD:

- **Handling:** Always hold the CD by its edges or by placing a finger through the center hole. Avoid touching the shiny playback surface.
- **Cleaning:** If the disc is dirty or smudged, gently wipe it with a soft, lint-free cloth (like a microfiber cloth) from the center outwards in a straight line. Do not wipe in circles. Use a specialized CD cleaning solution if necessary, but avoid abrasive cleaners or solvents.
- **Storage:** Store the CD in its original jewel case or a protective sleeve when not in use. Keep it away from direct sunlight, extreme temperatures, and high humidity.
- **Avoid Bending:** Do not bend the disc, as this can cause irreparable damage.

TROUBLESHOOTING

If you encounter issues playing your Audio CD, consider these common solutions:

- **Skipping or Stuttering:** This is often caused by dirt, dust, or scratches on the disc. Clean the disc as described in the Care and Maintenance section. Ensure your CD player is on a stable surface to prevent vibrations.
- **Disc Not Recognized:** Verify the disc is inserted correctly (label side up). Try cleaning the disc. If the issue persists, try the CD in another player to determine if the problem is with the disc or the player.
- **No Sound:** Check the volume levels on your player and connected audio system. Ensure all cables are securely connected.
- **Player Error Message:** Consult your CD player's manual for specific error codes. Often, a simple power cycle (turning the player off and on) can resolve temporary glitches.
