First Alert AF400

First Alert EZ Fire Spray AF400-2 Instruction Manual

Model: AF400-2

1. Introduction

This manual provides essential information for the safe and effective use of your First Alert EZ Fire Spray, model AF400-2. This product is an aerosol fire extinguishing spray designed to combat small, common household fires. Please read these instructions thoroughly before use and retain for future reference.

Image: Two First Alert EZ Fire Spray cans, red with yellow and white labels, indicating a 2-pack product.

2. Important Safety Information

WARNING: Read all instructions before using this product. Failure to follow these instructions may result in property damage, injury, or death.

- This product is intended for small, incipient fires only. Do not attempt to extinguish large or rapidly spreading fires. Evacuate immediately and call emergency services.
- Keep out of reach of children and pets.
- Do not puncture or incinerate the can.
- Store between 32°F (0°C) and 107°F (42°C). Do not expose to heat or store above 120°F (49°C).
- The extinguishing agent is biodegradable and non-toxic, but avoid direct contact with eyes and prolonged skin exposure.
- Ensure adequate ventilation when using in enclosed spaces.

Fire Classifications

The First Alert EZ Fire Spray is effective on common household fires, including:

- **Class A Fires:** Ordinary combustibles such as paper, fabric, and wood.
- **Class B Fires:** Flammable liquids such as cooking oils and grease.
- **Class C Fires:** Energized electrical equipment.

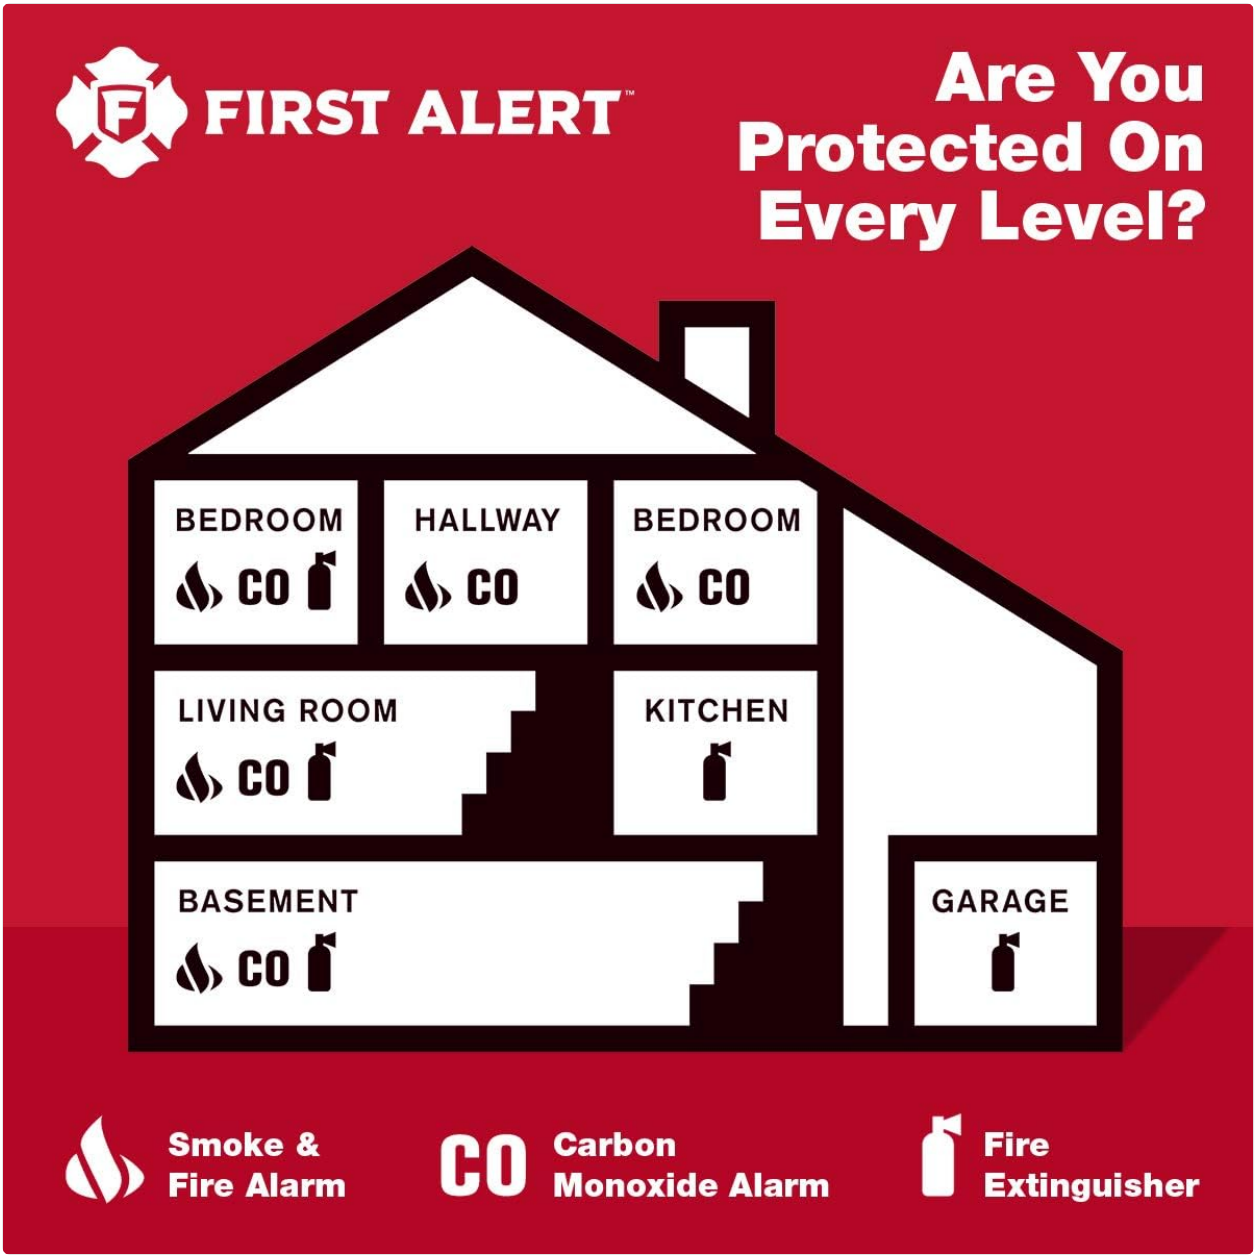

Image: Close-up of the First Alert EZ Fire Spray can, highlighting its effectiveness against small kitchen fires, including grease fires.

3. Setup and Placement

The First Alert EZ Fire Spray is designed for quick access in emergency situations. Proper placement is key.

1. **Unpacking:** Remove the can from its packaging. Inspect the can for any visible damage.
2. **Placement:** Store the EZ Fire Spray in easily accessible locations where fires are most likely to occur, such as:
    - Kitchen (near the stove or oven)
    - Garage or workshop
    - Recreational vehicles (RVs) or boats
    - Dorm rooms or small apartments

3. **Accessibility:** Ensure the spray is not obstructed and can be grabbed quickly in an emergency.
4. **Expiration Date:** Check the expiration date printed on the bottom of the can. Replace the product before this date.

Image: First Alert EZ Fire Spray can placed on a kitchen counter, demonstrating ideal placement for quick access.

4. Operating Instructions

Follow these steps to effectively use your First Alert EZ Fire Spray:

1. **Assess the Fire:** Ensure the fire is small and contained. If the fire is large or spreading, evacuate immediately and call emergency services.
2. **Remove Safety Seal and Cap:** Quickly pull off the plastic safety seal and then the cap from the top of the can.
3. **Position Yourself:** Stand 3 to 4 feet away from the fire.
4. **Aim and Spray:** Aim the nozzle at the base of the fire. Press the actuator button firmly and spray in a

sweeping motion across the base of the flames until the fire is extinguished.

5. **Continuous Discharge:** The EZ Fire Spray provides approximately 32 seconds of continuous discharge, allowing ample time to extinguish small fires.
6. **Monitor:** After extinguishing, continue to monitor the area for any re-ignition.

Image: Step-by-step visual guide for using the First Alert EZ Fire Spray: 1. Remove safety seal and cap. 2. Hold can 3-4 feet from fire. 3. Spray across base of fire.

5. Maintenance

Regular inspection and proper care ensure your EZ Fire Spray is ready when needed.

- **Monthly Inspection:** Check the can monthly to ensure it is not damaged, corroded, or expired.
- **Nozzle Check:** Ensure the nozzle is clear and free of obstructions.
- **Storage Conditions:** Verify the can is stored within the recommended temperature range (32°F to 107°F).
- **Post-Use Cleanup:** The extinguishing foam is biodegradable and non-toxic. After use, simply wipe away any residue with a damp cloth.
- **Disposal:** Dispose of empty or expired cans according to local regulations for aerosol products.

6. Troubleshooting

If you encounter issues with your First Alert EZ Fire Spray, refer to the following:

- **No Spray or Weak Spray:**
  - Ensure the safety seal and cap have been fully removed.
  - Check the expiration date. An expired can may have lost pressure.
  - Verify the nozzle is not clogged.
  - Ensure the can has been stored within the recommended temperature range. Extreme

temperatures can affect performance.

- **Fire Not Extinguishing:**
  - Confirm you are aiming at the base of the fire and spraying in a sweeping motion.
  - The fire may be too large for this product. Evacuate immediately and call emergency services.
  - Ensure you are using the product on appropriate fire types (Class A, B, C).

7. Specifications

Model Number	AF400-2
Brand	First Alert
Product Type	Aerosol Fire Extinguishing Spray
Fire Classes	A, B, C
Extinguishing Agent	Biodegradable, Non-toxic Foam (Potassium Lactate)
Can Capacity	18 oz (517g) per can
Discharge Time	Approximately 32 seconds
Can Dimensions (approx.)	9.6 inches (Height) x 2.6 inches (Diameter)
Storage Temperature	32°F (0°C) to 107°F (42°C)
Certifications	Tested to UL 711, UL 711A, and KOFEIC 0108 performance requirements

Image: Back of the First Alert EZ Fire Spray can, illustrating its approximate dimensions.

8. Warranty and Support

Warranty Information

The First Alert EZ Fire Spray AF400-2 comes with a**4-year limited warranty**. This warranty covers defects in materials and workmanship under normal use. Please retain your proof of purchase for warranty claims.

Customer Support

For technical assistance, warranty inquiries, or further information regarding your First Alert EZ Fire Spray, please visit the official First Alert website or contact their customer service department. Refer to the product packaging for specific contact details.

What I should know about fire?

Smoking Out the Facts About Home Fire Detection

Fire is a deadly threat to any household. It can strike anywhere, at any time. The frightening truth is that in 2005, there were nearly 381,000 home fires in the U.S. resulting in over 16,000 injuries and deaths combined*. You must be prepared by using the tools for fire protection.

Smoke alarms provide a warning of fire. Smoke alarms are the easiest, most cost-efficient way to alert your family of a developing fire. The more smoke alarms you have installed in your home, the more your chances increase that you will survive the fire.

Fire extinguishers provide a tool to fight small fires. Having a fire extinguisher in your home can increase your chances of keeping a small fire from getting out of control and becoming a deadly rage.

Using both smoke alarms and fire extinguishers in your home, along with knowing what to do in case of fire, can save your life! Fire is a preventable tragedy!

What do I need to know about fire?

Fire can and might happen to you! You must be prepared and have the knowledge to escape safely. Fire is darker, smokier, hotter, and faster than you can imagine. You must know what fire is like in order to escape the danger safely. The following are four important facts to remember:

1. Smoke is dark. Most people expect fire to be light. On the contrary, fire is pitch black. For this reason, people have been trapped in their homes because they could not find their way out in the dark -- they didn't have a flashlight and didn't practice an escape plan.

2. Smoke can be deadly. Since most fire fatalities occur between 2 a.m. and 6 a.m. when most people are sleeping -- the only thing standing between the deadly fumes of fire and a safe escape is the piercing sound of a smoke alarm. The poisonous gases emitted by a fire actually put people into a deeper sleep and many suffocate without ever waking or even becoming aware of the fire; because they had no warning.

3. Fire has intense heat. Fire can cause the temperature to rise several hundred degrees in just seconds. The heat is so intense that it can cause the human body to stop functioning altogether - -one breath can cause severe lung damage. The
