

Nemco 8045W-SLT

Nemco 8045W-SLT 120V 45 Capacity Slant Hot Dog Roller Grill

INSTRUCTION MANUAL

Introduction

Thank you for choosing the Nemco 8045W-SLT Slanted Hot Dog Roller Grill. This commercial-grade appliance is designed for efficient cooking and holding of hot dogs and similar products, featuring a 45-hot dog capacity and a 120V electrical requirement. This manual provides essential information for the safe and effective operation, maintenance, and troubleshooting of your roller grill.

Safety Instructions

Always adhere to the following safety precautions to prevent injury or damage to the unit:

- Read all instructions before operating the appliance.
- Ensure the unit is connected to a properly grounded 120V electrical outlet. Do not use extension cords.
- **Caution: Hot Surfaces!** The rollers and surrounding areas become extremely hot during operation. Use caution and wear protective gloves when handling.
- Do not immerse the unit in water or spray directly with water.
- Unplug the unit from the power supply before cleaning or servicing. Allow it to cool completely.
- Keep hands, hair, and clothing away from moving rollers.
- Operate the grill in a well-ventilated area.
- This appliance is for commercial use only.

Setup

Follow these steps for initial setup:

1. **Unpacking:** Carefully remove the roller grill from its packaging. Inspect for any shipping damage. Report any damage immediately to the carrier and your supplier.
2. **Placement:** Place the unit on a stable, level, non-combustible surface. Ensure adequate clearance

around the unit for ventilation and safe operation. The unit is designed for free-standing installation.

3. **Electrical Connection:** Plug the 3-prong grounded plug into a dedicated 120V AC, 60 Hz, 15 Amp minimum electrical outlet.
4. **Initial Cleaning:** Before first use, wipe down the rollers and all accessible surfaces with a damp cloth and mild, food-safe detergent. Rinse thoroughly and dry.

Operating Instructions

The Nemco 8045W-SLT features two independent heating zones for precise temperature control.

1. **Power On:** Ensure the unit is plugged in. Locate the power switch on the control panel and turn it to the 'ON' position.
2. **Preheating:** Turn the temperature control knobs for both the front and rear roller sections to the desired cooking temperature. Allow the grill to preheat for approximately 15-20 minutes, or until the rollers reach the set temperature.
3. **Loading Product:** Carefully place hot dogs or other suitable products onto the rollers. Distribute them evenly to ensure consistent cooking. The slanted design allows for easy product rotation and visibility.
4. **Cooking:** The rollers will continuously rotate, cooking the product evenly. Monitor the product to prevent overcooking. Adjust temperature as needed.
5. **Holding:** Once cooked, the temperature can be lowered to a holding setting to keep products warm and ready for serving. Use the temperature control knobs to adjust.
6. **Power Off:** When finished, turn the temperature control knobs to the 'OFF' position and then turn the main power switch to 'OFF'. Unplug the unit if it will not be used for an extended period.

Cleaning and Maintenance

Regular cleaning and maintenance are crucial for the longevity and hygienic operation of your roller grill.

- **Daily Cleaning:** After each use, ensure the unit is unplugged and has cooled down. Wipe down the rollers and drip pan with a damp cloth and mild, non-abrasive cleaner. Remove any food debris.
- **Drip Pan:** The removable drip pan should be emptied and cleaned daily.
- **Deep Cleaning:** Periodically, a more thorough cleaning may be required. Ensure all power is disconnected. Use a soft brush or sponge to clean stubborn residue on the rollers. Do not use steel wool or abrasive pads, as they can damage the stainless steel and aluminum surfaces.
- **Inspection:** Regularly inspect the power cord for any damage. Check that the rollers rotate smoothly.
- **Lubrication:** The roller bearings are typically sealed and do not require lubrication. Refer to a qualified service technician for any internal maintenance.

Troubleshooting

If you encounter issues with your Nemco 8045W-SLT, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on.	No power to outlet; power switch off; tripped circuit breaker.	Check power cord connection; ensure outlet has power; reset circuit breaker; turn power switch on.
Rollers not heating.	Temperature knobs set too low; heating element malfunction.	Increase temperature setting; if problem persists, contact qualified service technician.
Rollers not turning.	Motor malfunction; obstruction.	Ensure no debris is obstructing rollers; if motor is not functioning, contact qualified service technician.
Uneven cooking.	Overloading rollers; uneven product distribution.	Reduce product load; distribute products evenly across rollers.

For issues not listed above or if solutions do not resolve the problem, contact a qualified service technician or Nemco customer support.
