### Cleaning

To clean your E.T. figure, gently wipe the surface with a soft, dry cloth. For stubborn marks, a slightly damp cloth can be used, but ensure no moisture enters the electronic components. Do not use harsh chemicals, abrasive cleaners, or immerse the figure in water.

### Storage

When not in use, store the E.T. figure in a cool, dry place away from direct sunlight and extreme temperatures. Keeping it in its original packaging can help protect it from dust and damage.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
E.T. does not respond.	Power switch off or "Try Me" tab still inserted.	Locate and ensure any power switch is in the "ON" position. Remove any plastic pull-tabs from the battery compartment or activation points.
Voice is distorted or weak.	Low power.	Although specifications state no batteries are required, if the unit uses internal non-replaceable batteries, this could indicate low charge. Ensure the environment is not too cold, which can affect electronics.

Problem	Possible Cause	Solution
Animated features (eyes, mouth, neck) are not moving.	Obstruction or internal mechanism issue.	Gently check for any visible obstructions. Do not force movement. If the issue persists, contact customer support.
E.T. is not communicating with other interactive toys.	Toys are too far apart or not compatible.	Ensure toys are within close proximity (e.g., 1-2 feet). Verify that the other toys are indeed compatible models as listed in the operating instructions.
