

PetSafe PIF-300

PetSafe Wireless Pet Containment System PIF-300 Instruction Manual

Model: PIF-300

1. INTRODUCTION

The PetSafe Wireless Pet Containment System PIF-300 is designed to provide a safe and reliable boundary for your pet within your yard. This system creates a circular containment area without the need for buried wires, offering flexibility and ease of setup. It uses a radio signal from a transmitter to create a customizable boundary, and a receiver collar worn by your pet provides a warning tone and static correction if your pet attempts to cross this boundary.

2. SAFETY INFORMATION

- This system is intended for use with dogs weighing 8 pounds (3.6 kg) or more and at least 6 months old.
- Do not use this product on aggressive dogs. If you are unsure if your dog is aggressive, consult your veterinarian or a certified trainer.
- The receiver collar is not a leash. Never attach a leash to the receiver collar. Use a separate, non-metallic collar for leashing.
- Avoid leaving the receiver collar on your dog for more than 12 consecutive hours. Prolonged wear can lead to skin irritation.
- Regularly check your dog's neck for signs of irritation or sores. If irritation occurs, discontinue use until the skin heals.
- Ensure the transmitter is placed in a dry, protected area, away from extreme temperatures and moisture.

3. PACKAGE CONTENTS

Verify that all components are present in your package:

- Wireless Transmitter with Power Adapter
- Receiver Collar with RFA-67 Battery

- 50 Boundary Training Flags
- Test Light Tool
- Short and Long Contact Points
- Operating Guide (this manual)

Image 3.1: Overview of the PetSafe Wireless Pet Containment System, showing the transmitter, receiver collar, and boundary flags.

4. SETUP

4.1 Transmitter Placement

The transmitter creates the circular boundary. Its placement is crucial for the system's effectiveness.

- Place the transmitter indoors in a central location within your desired containment area.
- Ensure it is at least 5 feet (1.5 meters) from large metal objects (e.g., appliances, metal sheds) that could interfere with the signal.
- Plug the power adapter into a standard wall outlet.

4.2 Collar Receiver Setup

The receiver collar delivers the warning tone and static correction.

- **Battery Installation:** Twist the battery cap counter-clockwise to remove. Insert the RFA-67 battery with the positive (+) side facing out. Twist the cap clockwise to secure.
- **Contact Points:** Select the appropriate contact points (short for short-haired dogs, long for long-haired dogs) to ensure proper skin contact. Screw them firmly onto the receiver.
- **Collar Fit:** The collar should fit snugly, allowing two fingers to slide comfortably under the strap. The contact points must touch your dog's skin.

Image 4.1: Close-up of the PetSafe receiver collar, showing the battery compartment and contact points.

4.3 Boundary Adjustment

Adjust the boundary range using the controls on the transmitter.

- **Boundary Switch:** Set to 'LOW' for smaller areas or 'HIGH' for larger areas.
- **Boundary Control Dial:** Rotate the dial to fine-tune the boundary distance. Turn clockwise to increase the range, counter-clockwise to decrease.
- **Test the Boundary:** Hold the receiver collar at your dog's neck level and walk towards the edge of your desired containment area. The collar should emit a warning tone. Mark this spot with a boundary flag. Continue walking around the perimeter, placing flags where the tone activates.

Image 4.2: Close-up of the PetSafe Wireless Transmitter, highlighting the Boundary Switch (LOW/HIGH) and Boundary Control dial.

5. OPERATING INSTRUCTIONS

5.1 How the System Works

The system operates on a simple principle:

1. The transmitter emits a continuous radio signal, creating a circular boundary.
2. When your dog approaches the edge of this boundary, the receiver collar emits a warning tone.
3. If your dog continues past the warning zone into the correction zone, the collar delivers a safe, static correction.
4. The static correction is designed to be startling, not harmful, encouraging your dog to retreat from the boundary.

5.2 Receiver Collar Indicators

- **Green LED:** Indicates the battery is good. Flashes every 4-5 seconds.
- **Red LED:** Indicates the battery is low and needs replacement. Flashes every 4-5 seconds.
- **No LED:** Battery is dead or incorrectly installed.

6. TRAINING YOUR PET

Effective training is essential for your pet to understand and respect the containment system. This process typically takes 1-2 weeks.

6.1 Introduction to the Boundary

- With the boundary flags in place, walk your dog on a leash towards the flags.
- When the collar emits the warning tone, immediately pull your dog back into the safe zone, praising them.
- Repeat this several times a day for a few days, always ending on a positive note.

6.2 Introducing Static Correction

- Once your dog understands the warning tone, allow them to experience the static correction.
- Walk your dog towards the flags. When the tone sounds, allow them to take one or two more steps to receive a mild correction.
- Immediately pull them back into the safe zone, praising and rewarding them.
- Never lure your dog into the correction zone.

6.3 Supervised Off-Leash Time

- After your dog consistently avoids the boundary, begin supervised off-leash time within the containment area.
- Gradually increase the duration of off-leash time.
- Continue to monitor your dog's behavior and reinforce positive responses.

Image 6.1: A dog running freely within a contained yard, demonstrating the system's purpose.

Image 6.2: An owner interacting with their dog in a yard, illustrating the freedom provided by the containment system.

7. MAINTENANCE

- **Battery Replacement:** Replace the RFA-67 battery in the receiver collar when the red LED indicator flashes.
- **Collar Cleaning:** Periodically clean the receiver collar and contact points with a damp cloth. Ensure the contact points are free of dirt or debris.
- **Boundary Check:** Regularly walk the boundary with the receiver collar to ensure the system is functioning correctly and the boundary has not shifted.
- **Transmitter Care:** Keep the transmitter clean and free from dust. Ensure proper ventilation.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Collar not activating at boundary	Dead battery; Transmitter unplugged; Boundary range set too low; Interference.	Replace battery; Check transmitter power; Increase boundary range; Relocate transmitter away from metal objects.
Dog crosses boundary	Collar fit too loose; Insufficient training; Correction level too low.	Tighten collar; Review training steps; Ensure contact points touch skin; Consult a professional trainer.
Collar activates inside safe zone	Interference from large metal objects; Transmitter too close to boundary.	Relocate transmitter; Reduce boundary range slightly.

Problem	Possible Cause	Solution
Skin irritation on dog's neck	Collar worn too long; Collar too tight; Contact points rubbing.	Remove collar for several hours daily; Ensure proper fit; Clean neck and collar regularly.

9. SPECIFICATIONS

- **Model Number:** PIF-300
- **Item Weight:** 6.25 pounds (2.83 kg)
- **Product Dimensions:** 12 x 9.9 x 13.3 inches (30.5 x 25.1 x 33.8 cm)
- **Power Source:** AC Adapter for Transmitter, RFA-67 Battery for Receiver Collar
- **Containment Area:** Up to 1/2 acre (approx. 180 feet diameter)
- **Target Audience:** Dogs 8 pounds and up, 6 months or older
- **Manufacturer:** PetSafe

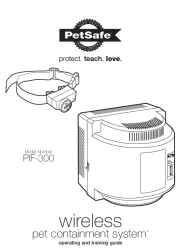

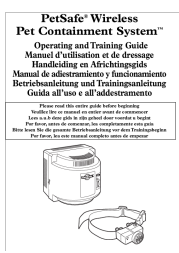

10. WARRANTY AND SUPPORT

PetSafe products are backed by a limited warranty. For specific warranty details, product support, or to purchase replacement parts, please visit the official PetSafe website or contact their customer service directly. Keep your proof of purchase for warranty claims.

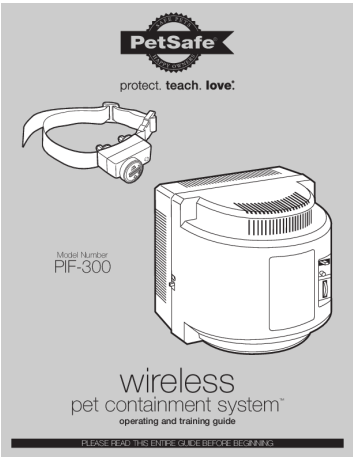

PetSafe Customer Service: For assistance, please refer to the contact information provided on the PetSafe official website or within your product packaging.

The world's best pet containment system just got better:
Industry leader introduces new wireless fence system

KNOXVILLE, Tenn. (March 16, 2013) – For the past 20 years PetSafe has been offering you the best in pet containment technology. With the best pet containment system in the world, the original PetSafe® Wireless Fence (PIF-300), PetSafe announced the release of the Stay + Play Wireless Fence™.

Made with all dogs, and their owners, in mind the Stay + Play Wireless Fence™ is small, sleek and includes a rechargeable Receiver Collar. Providing an adjustable circular boundary of up to 1/4 of an acre, the Stay + Play system is easy to set up, making it the perfect choice for your pet's safety and your peace of mind.

The Stay + Play transmitter is sleek and modern making it easy to find the perfect place in your home for optimal wireless coverage. Plus, it is an lightweight making it travel and taking it with you on vacation, to a second home or even while on the road or camping in an RV is a cinch.

Made for pet's peace of mind and safety, the Stay + Play system includes the rechargeable Receiver Collar. Offering an adjustable circular boundary of up to 1/4 of an acre, the Stay + Play system is easy to set up, making it the perfect choice for your pet's safety and your peace of mind.

Best of all, this system is completely compatible with the original PetSafe® Wireless Containment System™. Whether you want to expand your wireless coverage with the new transmitter or take advantage of the lightweight rechargeable Receiver Collar, making your training easier.

Wireless
Pet Containment
System®

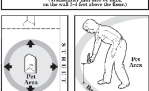

Quick Set-up

- Set Up the Transmitter**
 - Your system creates a circular pet area up to 1/4 acre.
 - Place the transmitter at the center of your planned area, set it indoors, at least 2 feet above the floor.
 - Apply power, set the Boundary Switch to "HIGH" and the Control Dial to "OFF".
- Prepare the Receiver Collar**
 - Insert 3 AAA batteries (not included). Turn clockwise to turn ON.
 - For the quick connection and following instructions in this Operating & Training Guide.
- Adjust the Pet Area**
 - Walk to the edge of the desired pet area.
 - Hold the Receiver Collar at your pet's neck height, with the PetSafe® logo side facing away from transmitter.
 - Press a button near the boundary control dial slowly, down from "OFF".
 - When the Receiver Collar starts to beep, have your helper stop turning the dial.
 - Check all limits of your pet boundary and have the helper adjust the dial as necessary.
- Place the Boundary Flags**
 - Hold the Receiver Collar at your pet's neck height, with the PetSafe® logo side facing away from transmitter.
 - Walk to the edge of your boundary.
 - When the Receiver Collar starts to beep, place a flag in the ground.
 - Repeat this until Boundary Zone is marked with flag about every 10 feet.
- Fit the Receiver Collar and Train Your Dog**
 - Follow the collar fitting instructions carefully.
 - Be patient when training your pet.

Please read this entire Operating & Training Guide before beginning.
