

D-Link DSL-2740B

D-Link Wireless N300 DSL Modem Router DSL-2740B User Manual

Model: DSL-2740B

INTRODUCTION

This manual provides comprehensive instructions for the installation, configuration, and operation of your D-Link Wireless N300 DSL Modem Router, model DSL-2740B. This device integrates an ADSL2+ modem, a wireless N router, and a 4-port Ethernet switch, offering a complete solution for high-speed internet access and network sharing.

Please read this manual thoroughly before setting up your device to ensure proper functionality and optimal performance.

SETUP

1. Package Contents

Verify that your package contains the following items:

- D-Link Wireless N300 DSL Modem Router (DSL-2740B)
- Power Adapter
- Ethernet Cable (RJ-45)
- Phone Cable (RJ-11)
- ADSL Splitter/Filter (may vary by region)
- Quick Installation Guide

If any items are missing or damaged, please contact your local D-Link reseller.

2. Physical Connection

Follow these steps to connect your modem router:

1. **Power Off:** Ensure your computer and any existing modem are powered off.
2. **DSL Line Connection:** Connect one end of the phone cable (RJ-11) to the DSL port on the back of the DSL-2740B. Connect the other end to your ADSL wall jack or the 'MODEM' port on an ADSL splitter/filter.
3. **Ethernet Connection:** Connect one end of the Ethernet cable (RJ-45) to any of the LAN ports (1-4) on the back of the DSL-2740B. Connect the other end to the Ethernet port on your computer.
4. **Power Connection:** Connect the power adapter to the power input on the back of the DSL-2740B and then plug it

into a power outlet.

5. **Power On:** Press the power button on the back of the device. The Power LED on the front panel should illuminate.

Figure 1: Front view of the D-Link Wireless N300 DSL Modem Router DSL-2740B. This image displays the front of the D-Link DSL-2740B modem router, highlighting its status LEDs and two external antennas. The LEDs indicate power, DSL connection status, Internet activity, and LAN port activity.

3. Initial Configuration (Web Interface)

To access the modem router's web-based configuration utility:

1. Open a web browser (e.g., Chrome, Firefox, Edge).
2. In the address bar, type **http://192.168.1.1** and press Enter.
3. A login prompt will appear. Enter the default username and password (usually **admin** for both, or refer to the label on the device).
4. Follow the on-screen setup wizard to configure your DSL connection settings (VPI/VCI, encapsulation type, username, password provided by your ISP) and wireless network settings (SSID, security key).

OPERATING INSTRUCTIONS

1. Connecting Devices

- **Wired Devices:** Connect Ethernet-enabled devices (e.g., desktop computers, gaming consoles) to any of the four LAN ports on the back of the router using Ethernet cables.
- **Wireless Devices:**
 - a. On your wireless device (laptop, smartphone, tablet), search for available Wi-Fi networks.
 - b. Select the SSID (network name) you configured during the initial setup.

- c. Enter the wireless password (security key) when prompted.
- d. The device should now be connected to your wireless network.

2. Wireless Network Configuration

You can modify your wireless network settings through the web interface:

- **SSID (Network Name):** Change the default network name to a unique identifier.
- **Security Mode:** It is recommended to use WPA2-PSK (AES) for the strongest security.
- **Pre-Shared Key (Password):** Set a strong, unique password for your wireless network.
- **WPS (Wi-Fi Protected Setup):** Use WPS for easy connection of compatible devices by pressing the WPS button on the router or entering a PIN.

MAINTENANCE

1. Firmware Updates

Periodically check the D-Link support website for firmware updates. Firmware updates can improve performance, add new features, and fix security vulnerabilities. Follow the instructions provided with the firmware update file carefully.

2. Resetting the Device

If you encounter persistent issues or forget your login credentials, you may need to reset the device to factory default settings. Locate the reset button (usually a small pinhole) on the back of the router. With the device powered on, use a paperclip to press and hold the reset button for approximately 10 seconds until the LEDs flash. The device will restart with factory default settings.

3. Cleaning

Keep the modem router clean and free from dust. Use a soft, dry cloth to wipe the exterior. Do not use liquid cleaners or aerosols.

TROUBLESHOOTING

Common Issues and Solutions:

- **No Power:** Ensure the power adapter is securely connected to the device and a working power outlet. Check the Power LED.
- **No DSL Connection:** Verify the phone cable is correctly connected to the DSL port and the wall jack/splitter. Ensure your ISP service is active. The DSL LED should be solid green.
- **No Internet Access:** Check if the Internet LED is illuminated. If not, verify your ISP settings (username, password, VPI/VCI) in the web interface. Contact your ISP if the issue persists.
- **No Wireless Connection:** Ensure the Wireless LED is illuminated. Check your device's Wi-Fi settings and ensure you are connecting to the correct SSID with the correct password.
- **Slow Performance:**
 - Try restarting the modem router by unplugging it for 10 seconds and plugging it back in.
 - Ensure the router is placed in a central location, away from obstructions and interference sources (e.g., microwaves, cordless phones).
 - Check for firmware updates.

LED Indicators:

LED Name	Status	Description
Power	Solid Green	Device is powered on.
DSL	Solid Green	DSL connection is established.
DSL	Flashing Green	Attempting to establish DSL connection.
Internet	Solid Green	Internet connection is active.
Internet	Flashing Green	Data is being transmitted/received over the Internet.
LAN (1-4)	Solid Green	A device is connected to the corresponding LAN port.
LAN (1-4)	Flashing Green	Data is being transmitted/received over the corresponding LAN port.
WLAN	Solid Green	Wireless network is active.
WLAN	Flashing Green	Data is being transmitted/received over the wireless network.

SPECIFICATIONS

- **Model:** DSL-2740B
- **Device Type:** ADSL2+ Modem, Wireless N Router, 4-Port Switch
- **Wireless Standard:** 802.11n (backward compatible with 802.11g/b)
- **Wireless Speed:** Up to 300 Mbps (N300)
- **ADSL Standard:** ADSL2+
- **Ethernet Ports:** 4 x 10/100 Mbps LAN ports (RJ-45)
- **DSL Port:** 1 x RJ-11
- **Security:** WPA, WPA2 Wireless Encryption, NAT and SPI Dual Active Firewall
- **Dimensions (LxWxH):** Approximately 10.9 x 8.3 x 2.7 inches
- **Weight:** Approximately 1.4 pounds
- **Operating System:** D-Link OS
- **Special Feature:** WPS

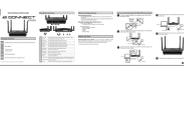

WARRANTY INFORMATION

D-Link products are covered by a limited warranty. The specific terms and duration of the warranty may vary by region and product. Please refer to the warranty card included with your product or visit the official D-Link website for detailed warranty information applicable to your purchase.

TECHNICAL SUPPORT

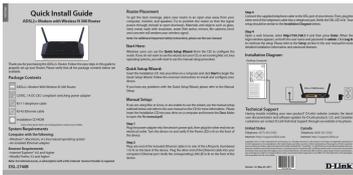

For technical assistance, product registration, or to download the latest drivers and firmware, please visit the official D-Link support website. Support resources typically include FAQs, troubleshooting guides, and contact information for technical support representatives.

RANGEBOOSTER N ADSL2+ ROUTER

HIGH-SPEED ADSL2+ INTERNET CONNECTION
Latest ADSL2+ standards provide Internet transmission of up to 30Mbps downstream.

HIGH-PERFORMANCE WIRELESS
Evolutional latest dual-BE T technology for high-speed wireless connections, compatible completely with IEEE 802.11g wireless devices.

TOTAL SECURITY & DDoS
Firewall protection from Internet attacks, user access control, WPA/WPA2, VPN, intrusion and priority Internet QoS, prevents VoIP & gaming packet loss.

ULTIMATE INTERNET CONNECTION
The DSL-2740B RangeBooster N ADSL2+ router is a versatile, high-performance remote router for home and small office. With integrated ADSL2+ technology, it provides up to 30Mbps downstream speed. Forward protection, Quality of Service (QoS), and BE T technology from the LAN side. It features built-in ports, this router provides the best performance for home and small office use.

ULTIMATE WIRELESS CONNECTION WITH MAXIMAL SECURITY
Forward protection from Internet attacks, user access control, WPA/WPA2, VPN, intrusion and priority Internet QoS, prevents VoIP & gaming packet loss.

PERFORMANCE PROTECTION & QoS
Evolutional latest dual-BE T technology for high-speed wireless connections, compatible completely with IEEE 802.11g wireless devices. The router provides the best performance for home and small office use.

COMPLIANCE & SECURITY
The DSL-2740B RangeBooster N ADSL2+ router is a versatile, high-performance remote router for home and small office. With integrated ADSL2+ technology, it provides up to 30Mbps downstream speed. Forward protection, Quality of Service (QoS), and BE T technology from the LAN side. It features built-in ports, this router provides the best performance for home and small office use.

D-Link **DSL 2740B**
HIGH-SPEED ADSL BROADBAND

ALL-IN-ONE ADSL2+ MODEM ROUTER

HIGH-SPEED INTERNET
Latest ADSL2+ standards provide Internet transmission of up to 24 Mbps downstream, 1 Mbps upstream.

HIGH-PERFORMANCE WIRELESS
Embedded 802.11n technology for high-speed wireless connection, and complete compatibility with 802.11g wireless devices.

TOTAL SECURITY & QoS
Firewall protection, parental controls, and Dynamic DNS (DDNS) services for secure VoIP connections.

HIGH-SPEED INTERNET
The all-in-one ADSL2+ modem router is a complete high-performance solution for home and the small office. With integrated ADSL2+ technology, it delivers superior Internet performance, Quality of Service (QoS), IEEE 802.11n wireless capability with 4x4 MIMO, and 802.11g wireless capability and Ethernet networking. The true potential of the Internet has never been so readily accessible in a more compact and affordable device than the DSL 2740B.

UNMATCHED WIRELESS CONNECTION
The all-in-one ADSL2+ modem router provides wireless speeds that are 100 times faster than IEEE 802.11g. Multiple antennas conforming to the standard that is used in the 802.11n standard will, in addition to multiple and easy connection options at home and in the office, the DSL 2740B supports MIMO2 and MIMO4 data rates for faster and more reliable wireless connections.

FIREWALL PROTECTION & QoS
Secure Internet access is essential for your home and office network from wireless devices or from the Internet. The All-in-One ADSL2+ Modem Router provides advanced firewall protection and Quality of Service (QoS) features. Quality of Service (QoS) helps prioritize network bandwidth to ensure that your VoIP calls are not interrupted by bandwidth-intensive connections or other network activity.
