NEEWER 1000076

NEEWER 43 Inch/110 Centimeter Light Reflector Diffuser User Manual

MODEL: 1000076

Brand: NEEWER

Introduction

The NEEWER 43 Inch/110 Centimeter Light Reflector Diffuser is a versatile 5-in-1 collapsible multi-disc designed for studio photography and outdoor lighting. It features translucent, silver, gold, white, and black surfaces to help you control and modify light for various photographic needs. This manual provides detailed instructions on setting up, operating, maintaining, and troubleshooting your reflector.

What's in the Box

- 1x Translucent Light Reflector
- 1x Black Light Reflector
- 1x White Light Reflector
- 1x Silver Light Reflector
- 1x Gold Light Reflector
- 1x Carrying Bag

Key Features

- **43" (110cm) 5-in-1 Design:** Includes translucent, silver, gold, white, and black surfaces for diverse lighting effects.
- **Collapsible Multi-Disc:** Easily folds into a compact size for portability and storage.
- **Durable Construction:** Features a sturdy metal frame and high-quality fabric for long-lasting use.
- **Versatile Application:** Ideal for studio photography, outdoor shooting, portraiture, product photography, and video lighting.

Setup

The NEEWER 5-in-1 reflector is designed for quick and easy setup. It comes pre-assembled with the translucent diffuser as the base and the other reflective surfaces zipped onto a reversible cover.

1. **Unfolding the Reflector:** Carefully remove the reflector from its carrying bag. The spring-loaded frame will cause it to expand rapidly. Ensure you have enough clear space around you when unfolding.
2. **Attaching/Changing Reflective Covers:** The reflector includes a reversible zippered cover that provides four additional surfaces (silver, gold, white, black). The translucent diffuser is the core panel. To change surfaces:
 - Locate the zipper along the edge of the cover.
 - Unzip the cover completely to remove it from the translucent diffuser.
 - To use a different surface, simply flip the cover to the desired side and re-zip it around the translucent diffuser.

Operating the Reflector

Each of the five surfaces serves a unique purpose in light modification:

- **Translucent:** Used as a diffuser. Place it between the light source (e.g., sun, studio light) and your subject to soften harsh light and reduce shadows, creating a more even and flattering illumination.
- **Silver:** Highly reflective. Use this surface to bounce light back onto your subject, increasing brightness and contrast. It produces a cool, crisp light, ideal for product photography or adding sparkle to eyes.
- **Gold:** Adds a warm tone to the light. This is excellent for portraits, especially outdoors, to simulate golden hour lighting or to add warmth to skin tones.
- **White:** Provides a soft, neutral fill light. It's less reflective than silver or gold, offering a subtle way to brighten shadows without altering the color temperature of the main light.
- **Black:** Used to subtract or block light. Position the black surface to absorb unwanted reflections or to create deeper shadows and more dramatic lighting.

5-IN-1 DESIGN

Switch backdrops
in an instant

Silver Reflector
Highly reflective - helps reduce shadows and highlights

Gold Reflector
Works basically the same way while adding a warmer color to the image

White Reflector
Helps reduce shadows to produce a softer light

Translucent Reflector
Typically positioned above the subject to soften the sun's natural light

Black Reflector
Reduces light and create shadows in certain areas

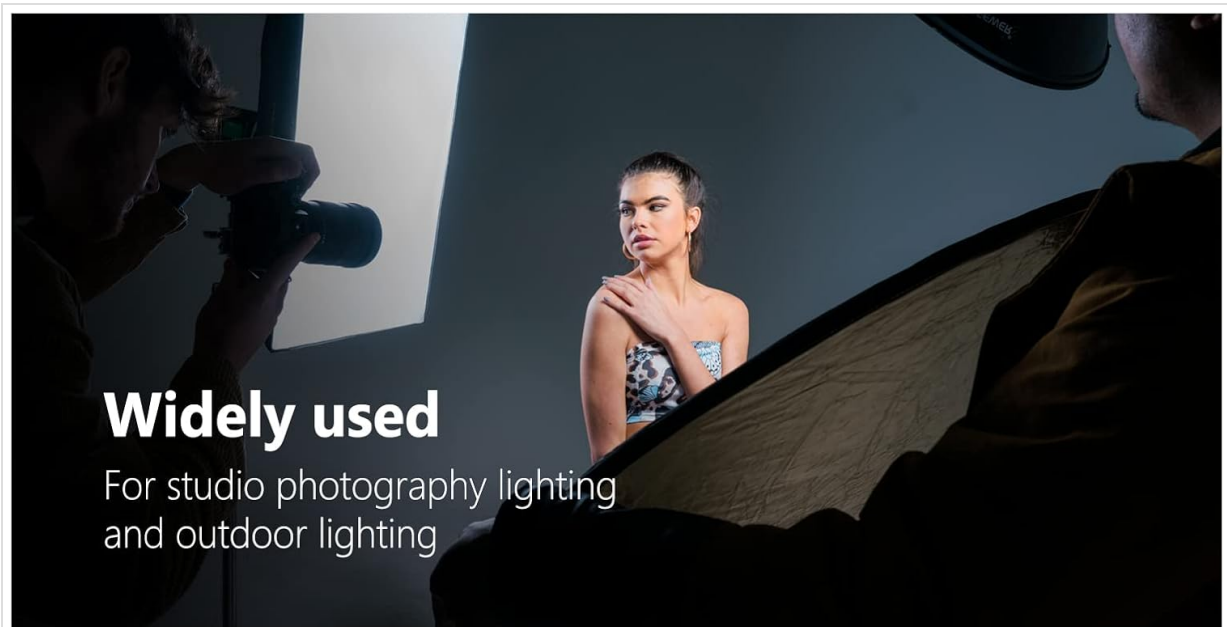

Figure 4: Examples of the reflector in use for outdoor shooting, product photography, and video production, demonstrating its versatility.

Maintenance

Proper care will extend the life of your NEEWER reflector:

- **Folding for Storage:** To fold the reflector back into its compact size, hold it with both hands on opposite sides. Twist your wrists in opposite directions (one clockwise, one counter-clockwise) while gently pushing inwards. The reflector will collapse into three smaller circles. Secure it with the attached strap or place it directly into the carrying bag.
- **Cleaning:** For light dust or smudges, gently wipe the surfaces with a soft, dry, lint-free cloth. For more stubborn marks, a slightly damp cloth with mild soap can be used, but ensure the reflector is completely dry before storing. Avoid harsh chemicals or abrasive materials.

COLLAPSIBLE & PORTABLE

- Can be folded into an easy-to-carry pouch for added convenience -

Figure 5: A visual guide demonstrating the four steps to collapse the reflector into its portable carrying pouch.

Troubleshooting

- **Difficulty Folding:** The folding technique requires a specific twist. If you're having trouble, ensure you are twisting your wrists in opposite directions while applying gentle inward pressure. Practice the motion a few times without forcing it. There are many online tutorials available if you need a visual demonstration.
- **Wrinkles on Surface:** Minor wrinkles are normal due to the collapsible design and do not significantly affect performance. For severe wrinkles, gently stretch the fabric or allow it to sit unfolded in a warm environment.

Specifications

Attribute	Value
Product Name	5-in-1 Collapsible Multi-Disc Light Reflector
Expand Size	43" / 110cm
Folded Size	15.7" / 44cm
Item Weight	1.5 pounds (0.68 kg)
Material	Silver, Steel
Color Options	Translucent, Silver, Gold, White, Black
Model Number	10000076
