## PIONEER A15

# Pioneer IP-BUS to 3.5 mm Aux Input Cable User Manual

Model: A15

## 1. PRODUCT OVERVIEW

The Pioneer IP-BUS to 3.5 mm Aux Input Cable (Model A15) is an adapter designed to connect external audio devices, such as MP3 players or smartphones, to compatible Pioneer car stereos. This cable utilizes the IP-BUS (CD changer port) on your Pioneer radio to provide an auxiliary audio input.

**Figure 1:** The Pioneer IP-BUS to 3.5 mm Aux Input Cable. This image displays the black cable with a 3.5mm male audio jack on one end and a right-angle IP-BUS connector on the other end.

This cable allows you to play audio from any device with a standard 3.5mm headphone jack through your

Pioneer car stereo system. It is compatible with Pioneer radios featuring a CD changer port, commonly referred to as IP-BUS.

## 2. SETUP INSTRUCTIONS

---

Follow these steps carefully to install and configure your IP-BUS to 3.5 mm Aux Input Cable:

1. **Preparation:** Ensure your vehicle and Pioneer car stereo are completely turned off before beginning the installation. Disconnect the vehicle's battery if you are uncomfortable working with live electrical components.
2. **Access the Stereo:** Carefully remove your Pioneer car stereo from its mounting to access the rear connections. Refer to your car stereo's specific manual for instructions on removal.
3. **Locate IP-BUS Port:** Identify the IP-BUS (CD changer) port on the back of your Pioneer stereo. This is typically a multi-pin connector. If a CD changer or other IP-BUS device is currently connected, it must be disconnected to use this auxiliary input cable.
4. **Connect the Cable:** Plug the IP-BUS connector end of the auxiliary cable firmly into the IP-BUS port on the back of your Pioneer stereo.
5. **Route the Cable:** Route the 3.5mm jack end of the cable to a convenient location within your vehicle's cabin, such as the glove compartment, center console, or dashboard. Ensure the cable is routed safely and does not interfere with vehicle operation.
6. **Reinstall Stereo:** Securely reinstall your Pioneer car stereo into its mounting.
7. **Reconnect Power:** Reconnect the vehicle's battery, if it was disconnected.
8. **Enable Auxiliary Input:** This is a critical step. Many Pioneer stereos require the auxiliary input to be manually enabled in the system settings. The exact procedure may vary by stereo model, but a common method is:
  - Turn the car stereo **OFF**.
  - Press and hold the **FUNCTION (FUNC)** button (or a similar settings/menu button) until a hidden menu appears on the stereo display.
  - Navigate through the menu options using the appropriate buttons (e.g., arrow keys or volume knob) until you find an option related to **AUX** or **AUXILIARY INPUT**.
  - Select this option and set it to **ON**. You may also need to turn off other inputs like MCD (Multi-CD Changer) if present.
  - Exit the menu (often by pressing the Band/ESC button or turning the stereo off and on again).

Once these steps are completed, your Pioneer stereo should recognize the auxiliary input.

## 3. OPERATING INSTRUCTIONS

---

To use the IP-BUS to 3.5 mm Aux Input Cable:

1. **Connect Audio Device:** Plug your external audio device (e.g., smartphone, MP3 player) into the 3.5mm jack of the auxiliary cable.
2. **Select Source:** Turn on your Pioneer car stereo. Press the **SOURCE** or **FUNCTION** button repeatedly until "AUX" or "AUXILIARY" appears on the stereo display.
3. **Play Audio:** Start playing audio from your connected device. The sound should now be routed through your car stereo speakers.
4. **Adjust Volume:** Control the volume primarily through your Pioneer car stereo. You may also need to adjust the volume on your connected audio device to achieve optimal sound levels and prevent

distortion.

Note: Audio playback controls (play, pause, skip) will be managed directly on your connected audio device, not through the Pioneer stereo.

## 4. MAINTENANCE

---

To ensure the longevity and proper function of your auxiliary input cable:

- **Handle with Care:** Avoid excessive bending, twisting, or pulling of the cable, especially near the connectors.
- **Keep Clean:** Periodically wipe the cable and connectors with a dry, soft cloth to remove dust and debris. Do not use harsh chemicals or abrasive cleaners.
- **Store Properly:** When not in use, coil the cable loosely and store it in a clean, dry place away from extreme temperatures.
- **Inspect Connectors:** Regularly check the 3.5mm jack and IP-BUS connector for any signs of damage or corrosion.

## 5. TROUBLESHOOTING

---

If you encounter issues while using the cable, refer to the following troubleshooting tips:

- **No Sound:**
  - Ensure the AUX input is enabled in your Pioneer stereo's settings (refer to Step 2, point 8 in Setup Instructions).
  - Verify that the cable is securely connected to both the stereo's IP-BUS port and your audio device's 3.5mm jack.
  - Check the volume levels on both your Pioneer stereo and the connected audio device. Increase both gradually.
  - Try a different audio device or a different 3.5mm cable (if available) to rule out issues with the device or its output.
  - Confirm that the Pioneer stereo is set to the AUX source.
- **Distorted or Low Volume Sound:**
  - Adjust the volume on your connected audio device. Sometimes, setting the device's volume too low or too high can affect sound quality.
  - Ensure the 3.5mm jack is fully inserted into your audio device. Some phone cases may prevent full insertion, requiring removal of the case or use of a 3.5mm extension adapter.
  - Check for any damage to the cable or connectors.
- **Cable Not Recognized by Stereo:**
  - Double-check that the IP-BUS connector is fully seated in the stereo's port.
  - Ensure no other IP-BUS devices (like a CD changer) are connected simultaneously, as this cable typically requires exclusive use of the port.
  - Verify that your Pioneer stereo model is indeed compatible with IP-BUS auxiliary input adapters.

## 6. SPECIFICATIONS

---

Feature	Specification
---------	---------------

Brand	PIONEER
Model Number	A15
Product Dimensions	0.43 x 0.06 x 0.28 inches (approximate cable thickness/connector size)
Item Weight	0.8 ounces
Connector Type	IP-BUS (male) to 3.5mm Auxiliary (male)
Compatible Devices	MP3 Players, Smartphones, and other devices with a 3.5mm audio output
Color	Black

## 7. WARRANTY AND SUPPORT

This product is manufactured by WO for Pioneer. For specific warranty information, please refer to the documentation provided at the time of purchase or contact the retailer. For technical support or further assistance, please consult the official Pioneer support resources or the vendor from whom the product was purchased.
