INTRODUCTION

The ZEISS Pre-Moistened Lens Cleaning Wipes are designed for safe and quick cleaning of various optical surfaces. These wipes are specially formulated with a unique, gentle solution to effectively remove smudges and fingerprints, leaving surfaces free of streaks and residue. They are individually wrapped for convenience and portability.

SETUP AND PREPARATION

Using ZEISS Lens Cleaning Wipes is a straightforward process. Each wipe is individually sealed to maintain its

moisture and effectiveness until ready for use.

- 1. Locate a Wipe:** Identify an individually wrapped ZEISS Lens Cleaning Wipe.
- 2. Open the Packet:** Tear open the packet at the designated notch. Ensure the wipe is moist before use.
- 3. Unfold the Wipe:** Carefully unfold the pre-moistened wipe.

OPERATING INSTRUCTIONS

These wipes are designed for gentle and effective cleaning across a variety of optical surfaces. Follow these steps for optimal results:

- 1. Initial Dust Removal:** Gently brush away any loose dust or debris from the lens surface using the folded wipe. This prevents scratching from abrasive particles.
- 2. Wiping Technique:** Using the unfolded, moist wipe, gently clean the surface with circular movements. Start from the center and work your way outwards.
- 3. Drying:** The solution is fast-drying. Allow the surface to air dry for a streak-free finish. Do not use the wipe once it begins to dry out.

Applicable Surfaces: ZEISS Lens Wipes are safe and effective for:

- Eyeglasses (including those with anti-reflective coatings)
- Sunglasses
- Camera Lenses
- Webcams
- Binoculars
- Microscopes
- Other optical devices

Gentle and thorough cleaning

Works on all lens surfaces

ZEISS Lens Wipes work on all optical lens surfaces such as:

Eyeglasses	Sunglasses	Binoculars	Camera Lenses	Swim Goggles	Ski Goggles

MAINTENANCE AND STORAGE

Proper storage ensures the longevity and effectiveness of your ZEISS Lens Cleaning Wipes.

- Storage:** Keep individually wrapped wipes in a cool, dry place. They are designed to be conveniently stored in a purse, backpack, desk, or car.
- Shelf Life:** The date printed on the package is the production date. The product remains effective for at least 3 years from this production date.
- Disposal:** Dispose of used wipes responsibly according to local waste disposal guidelines.

TROUBLESHOOTING

While ZEISS Lens Cleaning Wipes are designed for optimal performance, here are some common issues and their solutions:

Streaks or Residue

If streaks or residue appear after cleaning, consider the following:

- **Wipe Condition:** Ensure the wipe is sufficiently moist. A drying wipe can leave streaks. Use a fresh wipe if necessary.
- **Excess Dirt:** Heavily soiled lenses may require a second wipe or a more thorough initial removal of loose dirt.
- **Wiping Pressure:** Apply gentle, even pressure. Excessive pressure is not required and can sometimes lead to uneven cleaning.

Wipe Dries Out Quickly

Each wipe is intended for single use immediately after opening. The alcohol-based solution is designed to evaporate quickly for a streak-free finish. To prevent premature drying, open the packet only when you are ready to use the wipe.

Concern About Scratches

ZEISS Lens Wipes are made from a soft microfine tissue and are non-abrasive, specifically designed to be tough on imperfections, not on lenses. They are independently tested by COLTS Laboratories to validate cleaning performance and ensure no risk of damage to optical surfaces, including those with anti-reflective coatings. Always ensure to remove any large, abrasive particles from the lens surface before wiping.

Safe to use

Although it may be easier to clean eyeglasses with your shirt, our clothes are likely to contain abrasive dirt which can scratch lenses. Our products are independently tested by COLTS Laboratories to validate our cleaning performance and ensure no risk of damage.

ZEISS Lens Wipes safely and quickly clean lenses without leaving any scratches.

100x Magnification

SPECIFICATIONS

Product Name	ZEISS Pre-Moistened Lens Cleaning Wipes
Model Number	5004841

UPC	662834500592
Count	200 Wipes (Pack of 1)
Product Dimensions	6 x 5 x 5 inches
Item Weight	4.55 ounces
Material	Cellulose
Country of Origin	Taiwan
Date First Available	November 22, 2004

WARRANTY INFORMATION

Specific warranty details for the ZEISS Pre-Moistened Lens Cleaning Wipes are not provided in the product data. The product description indicates a shelf life of at least 3 years from the production date printed on the package. For any concerns regarding product quality or performance, please refer to the manufacturer's official support channels.

SUPPORT

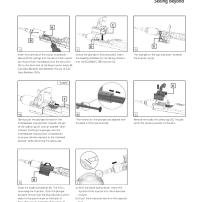

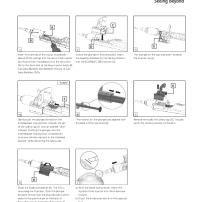

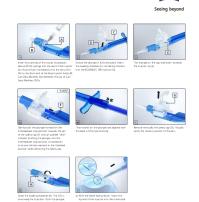

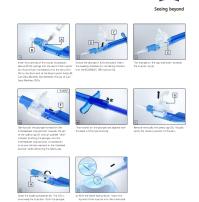

For additional information, product inquiries, or support, please visit the official ZEISS store or contact ZEISS customer service.

- Online Store:** You can find more ZEISS products and information by visiting the [ZEISS Store on Amazon](#).
- Manufacturer Contact:** Refer to the product packaging for direct contact information for ZEISS customer support.
