Vance & Hines 46841

Vance & Hines Twin Slash 3" Round Slip Ons Black 46841
Instruction Manual

Model: 46841 | Brand: Vance & Hines

PRODUCT OVERVIEW

The Vance & Hines Twin Slash 3" Round Slip Ons are designed to enhance the performance and sound of your motorcycle. These slip-on mufflers provide a throaty and deep exhaust note, significantly improving the auditory experience of your ride. They feature the distinctive Vance & Hines Twin Slash look and are engineered for durability.

Key Features

- Feature muffler bodies shielded by full-coverage heat shields for a blue-proof look, ensuring the finish remains pristine over time.
- Increased performance with a throaty growl, optimizing exhaust flow for better engine response.
- Include standard louvered core baffles, designed to deliver a rich, deep sound.
- Optional baffles are available in competition or quiet versions, which can reduce sound levels by 3-5 dB to suit rider preference.
- Sold in pairs, providing a complete exhaust solution for your motorcycle.

This image displays a motorcycle with the Vance & Hines Twin Slash 3-inch Round Slip-On exhaust mufflers installed. The black finish of the mufflers complements the motorcycle's design, showcasing their integrated appearance.

SETUP AND INSTALLATION

Installation of the Vance & Hines Twin Slash 3" Round Slip Ons requires basic mechanical knowledge and tools. For optimal results and safety, professional installation by a certified motorcycle technician is highly recommended.

Safety Precautions

- Ensure the motorcycle is cool before beginning installation to prevent burns.
- Wear appropriate personal protective equipment, including gloves and eye protection.
- Secure the motorcycle on a stable stand to prevent tipping during installation.

General Installation Steps (Consult a professional or detailed manual for specific instructions)

1. **Preparation:** Gather all necessary tools and components. Ensure the motorcycle's exhaust system is cool.
2. **Removal of Existing Mufflers:** Carefully loosen and remove the clamps and mounting bolts securing the stock mufflers. Detach the old mufflers from the header pipes.
3. **Installation of New Slip Ons:** Slide the Vance & Hines Twin Slash slip-on mufflers onto the header pipes. Ensure a snug fit.
4. **Secure Mounting:** Attach the new mounting brackets and secure the mufflers using the provided hardware. Do not

fully tighten bolts until alignment is confirmed.

5. **Alignment and Tightening:** Adjust the mufflers for proper alignment and clearance. Once aligned, progressively tighten all clamps and mounting bolts to the manufacturer's specifications.
6. **Final Inspection:** Double-check all connections for tightness and ensure there are no exhaust leaks. Start the engine briefly to check for proper operation and sound.

OPERATION

Upon installation, the Vance & Hines Twin Slash 3" Round Slip Ons will immediately provide a noticeable change in your motorcycle's exhaust note. Expect a deeper, more aggressive sound compared to stock mufflers, enhancing the overall riding experience.

The louvered core baffles are designed to produce a rich, throaty growl while maintaining optimal back pressure for performance. While these slip-ons are designed to improve sound and aesthetics, significant performance gains may require additional engine tuning or a full exhaust system.

MAINTENANCE

Proper maintenance will ensure the longevity and appearance of your Vance & Hines Twin Slash 3" Round Slip Ons.

Cleaning

- Clean the mufflers regularly with a mild soap and water solution.
- Avoid using abrasive cleaners, harsh chemicals, or steel wool, as these can damage the black finish and heat shields.
- Rinse thoroughly with clean water and dry with a soft cloth to prevent water spots.

Inspection

- Periodically inspect all mounting bolts and clamps for tightness. Vibrations from riding can cause fasteners to loosen over time.
- Check the heat shields for any signs of damage, discoloration, or loose connections.
- Listen for any unusual exhaust leaks or rattling sounds, which may indicate a loose component or damaged baffle.

TROUBLESHOOTING

If you encounter issues with your Vance & Hines Twin Slash 3" Round Slip Ons, consider the following common troubleshooting steps:

- **Excessive Noise or Rattling:** Check all mounting hardware and clamps for tightness. Ensure the baffles are securely seated within the mufflers.
- **Exhaust Leaks:** Inspect all connections for proper seating and tightness. A small amount of exhaust paste can be used on slip-fit connections if leaks persist after tightening.
- **Discoloration of Heat Shields:** While the heat shields are designed to be blue-proof, extreme heat or improper engine tuning can sometimes cause discoloration. Ensure your motorcycle's engine is running optimally.
- **Reduced Performance:** If you experience a significant drop in performance after installation, verify that the mufflers are correctly installed and not causing excessive back pressure. Consult a professional for engine tuning if necessary.

If problems persist after attempting these troubleshooting steps, it is recommended to contact Vance & Hines customer support or a qualified motorcycle mechanic.

SPECIFICATIONS

Manufacturer	Vance & Hines
Brand	Vance & Hines
Model	Vance & Hines
Product Dimensions	81.28 x 20.32 x 40.64 cm
Item Model Number	46841
Manufacturer Part Number	46841
OEM Part Number	ZZ 1801-0389
Item Weight	7.6 Kilograms
ASIN	B0031BLG6W
Date First Available	9 August 2021
Compatible with Vehicle Type	Motorcycle
Item Shape	Rectangular
UPC	783591965216, 182682046283

WARRANTY AND SUPPORT

Vance & Hines products are manufactured to high standards and typically come with a manufacturer's warranty against defects in materials and workmanship. The specific terms and duration of the warranty may vary. For detailed warranty information, product registration, technical support, or to inquire about replacement parts, please visit the official Vance & Hines website or contact their customer service directly. Always refer to the official Vance & Hines resources for the most accurate and up-to-date support information.
