De'Longhi DLSC002

De'Longhi Water Filter Softener DLSC002 Instruction Manual

Model: DLSC002 | Brand: De'Longhi

INTRODUCTION

The De'Longhi Water Filter Softener DLSC002 is designed to enhance the quality of your coffee and prolong the lifespan of your De'Longhi espresso and bean-to-cup machines by effectively reducing limescale. This manual provides essential information for the proper installation, operation, and maintenance of your water filter.

COMPATIBILITY

This water filter is suitable for use with various De'Longhi espresso and bean-to-cup machines. Compatible series include:

- EC800 series
- ECAM series
- BCO 400 series

Note: This filter is not suitable for models that begin with ESAM.

SETUP AND INSTALLATION

Follow these steps to properly prepare and install your new De'Longhi water filter:

1. **Unpack the Filter:** Remove the new water filter from its packaging.
2. **Prime the Filter:** Submerge the filter in fresh water for 5-10 minutes to remove any dust and allow air bubbles to escape. Alternatively, rinse it under running tap water for 30 seconds.

3. **Remove Water Tank:** Carefully remove the water tank from your De'Longhi coffee machine.
4. **Insert Filter:** Insert the primed water filter into the designated slot at the bottom of the water tank. Ensure it is pressed firmly into place. The filter is keyed to fit only one way.
5. **Fill Water Tank:** Fill the water tank with fresh water.
6. **Reinstall Water Tank:** Place the water tank back into your coffee machine.
7. **Set Date Indicator:** Rotate the blue cap on top of the filter to set the current month. This helps you track when the filter needs replacement (typically every two months).

OPERATING THE FILTER

Once installed, the De'Longhi Water Filter Softener DLSC002 operates automatically. It continuously filters the water used by your coffee machine, reducing limescale and impurities to ensure optimal coffee taste and machine performance. No additional user interaction is required during normal operation.

MAINTENANCE

Regular maintenance of your water filter is crucial for consistent coffee quality and machine longevity.

Filter Replacement

The water filter should be replaced approximately every two months. The integrated calendar on the filter's cap

helps you keep track of the renewal date. Replace the filter sooner if you notice a decrease in coffee quality or machine performance.

Descaling

While the water filter reduces limescale, regular descaling of your coffee machine is still recommended according to your machine's specific instructions. Use De'Longhi's official descaling solution for best results and compatibility.

TROUBLESHOOTING

If you experience issues with your coffee machine's performance or coffee taste, consider the following:

- **Poor Coffee Taste:** Ensure the water filter is not expired and is correctly installed. Replace the filter if it's past its recommended usage period.
- **Slow Water Flow:** This could indicate a clogged filter or a need for descaling. Check the filter's age and consider descaling your machine.
- **Limescale Buildup:** While the filter reduces limescale, it does not eliminate the need for periodic descaling. Follow your machine's descaling procedure.

For persistent issues, refer to your coffee machine's specific instruction manual or contact De'Longhi customer support.

SPECIFICATIONS

Feature	Detail
Material	Plastic
Product Dimensions (D x W x H)	1.65" x 2.36" x 7.09"
Item Weight	0.22 Pounds (approx. 3.52 ounces)
External Testing Certification	NSF
Product Benefits	Improves water quality by reducing limescale and enhancing machine efficiency
Recommended Usage	Approximately 2 months per filter
