

## Intermec PD42

# Intermec PD42 Series Commercial Printer User Manual

Model: PD42BJ1000002021

## 1. INTRODUCTION

---

This manual provides essential information for the safe and efficient operation of your Intermec PD42 Series Commercial Printer. The PD42 is a dependable and versatile direct thermal printer designed for medium-duty applications in manufacturing, transportation, and warehousing environments. It features a robust all-metal chassis, proven printing mechanics, and powerful electronics to ensure reliable performance. The integrated monochrome graphical display allows for direct setup and configuration, enhancing user control and reducing reliance on host commands.

## 2. SAFETY INFORMATION

---

Please read and understand all safety instructions before operating the printer. Failure to follow these instructions may result in injury or damage to the equipment.

- Always connect the printer to a grounded power outlet.
- Do not operate the printer with a damaged power cord or plug.
- Avoid placing the printer in areas with excessive dust, humidity, or extreme temperatures.
- Do not attempt to service the printer yourself. Refer all servicing to qualified personnel.
- Keep hands and loose clothing away from moving parts during operation.

## 3. PACKAGE CONTENTS

---

Verify that all items are present in the package. If any items are missing or damaged, contact your supplier immediately.

- Intermec PD42 Series Commercial Printer
- Power Cord (Euro and US compatible)
- Quick Start Guide (if included)
- Documentation CD (if included)

## 4. PHYSICAL OVERVIEW

Familiarize yourself with the external components and connection ports of the Intermec PD42 printer.

**Figure 4.1: Front and Side View of the Intermec PD42 Printer.** This image displays the printer's front panel with its graphical display and control buttons, along with a label partially ejected from the print mechanism. The robust casing and compact design are visible.

**Figure 4.2: Rear View of the Intermec PD42 Printer.** This image highlights the various connectivity options available on the back of the printer, including USB, Serial, and Ethernet ports. The power input and main power switch are also visible.

**Figure 4.3: Internal View of the Intermec PD42 Printer.** With the top cover open, this image reveals the internal mechanisms for loading labels and ribbon. Key components such as the printhead assembly, media guides, and ribbon spindles are visible, illustrating the media path.

## 5. SETUP

### 5.1 Unpacking and Placement

1. Carefully remove the printer from its packaging.
2. Place the printer on a stable, level surface with adequate ventilation.
3. Ensure sufficient space around the printer for media loading and maintenance.

### 5.2 Connecting Power

1. Connect the power cord to the power input on the rear of the printer (refer to Figure 4.2).
2. Plug the other end of the power cord into a grounded electrical outlet.

## 5.3 Connecting Data Cables

The PD42 offers multiple connectivity options:

- **USB:** Connect a USB cable from the printer's USB port to your computer.
- **Serial:** Connect a serial cable from the printer's serial port to your computer or host system.
- **Ethernet:** Connect an Ethernet cable from the printer's Ethernet port to your network.

## 5.4 Loading Media (Labels and Ribbon)

The PD42 supports industry-standard 200-mm (8-inch) label rolls and 450-m (18,000-inch) ribbon rolls.

1. Open the printer's top cover (refer to Figure 4.3).
2. Follow the internal diagrams or specific instructions for your media type to correctly load the label roll onto the media spindle.
3. Thread the labels through the media guides and under the printhead assembly.
4. If using thermal transfer printing, load the ribbon onto the ribbon supply spindle and thread it according to the internal guides.
5. Close the top cover securely.

# 6. OPERATING INSTRUCTIONS

---

## 6.1 Powering On/Off

- **To Power On:** Flip the main power switch on the rear of the printer to the 'On' position. The graphical display will illuminate.
- **To Power Off:** Flip the main power switch to the 'Off' position.

## 6.2 Using the Graphical Display

The monochrome graphical display and control buttons on the front panel allow you to configure printer settings directly. Navigate through menus using the arrow buttons and confirm selections with the 'Enter' button. Refer to the on-screen prompts for specific options.

## 6.3 Driver and Software Installation

Before printing from a computer, install the appropriate printer drivers. These are typically available on the manufacturer's website or an included CD. Follow the on-screen instructions during installation.

## 6.4 Printing a Test Label

After setup, it is recommended to print a test label to verify proper operation and media loading. This option is usually available through the printer's front panel menu or via the printer driver software.

# 7. MAINTENANCE

---

Regular maintenance ensures optimal performance and extends the life of your printer.

## 7.1 Cleaning the Printhead

The printhead should be cleaned regularly, especially if print quality degrades. Use a lint-free cloth or a printhead

cleaning pen with isopropyl alcohol. Ensure the printer is powered off and cooled down before cleaning.

### 7.2 Cleaning Rollers and Media Path

Dust and adhesive residue can accumulate on rollers and within the media path. Use a lint-free cloth dampened with isopropyl alcohol to clean these components. Always power off the printer before cleaning.

### 7.3 Replacing Media

When the label roll or ribbon runs out, follow the steps in Section 5.4 to load new media.

## 8. TROUBLESHOOTING

---

This section addresses common issues you might encounter with your PD42 printer.

- **Printer Not Powering On:** Check power cord connections and ensure the power outlet is functional.
- **No Print Output:** Verify that the printer is online, connected correctly to the host, and that media is loaded properly. Check for error messages on the graphical display.
- **Poor Print Quality:** Clean the printhead. Ensure the correct media and ribbon (if applicable) are used and properly loaded. Adjust print darkness settings via the display or driver.
- **Connectivity Issues:** Check all cable connections. Verify network settings for Ethernet connections. Reinstall printer drivers if necessary.
- **Error Messages on Display:** Consult the printer's graphical display for specific error codes or messages, then refer to the full product documentation or manufacturer's support website for detailed solutions.

## 9. SPECIFICATIONS

---

| Feature                 | Specification               |
|-------------------------|-----------------------------|
| Model Name              | PD42BJ1000002021            |
| Printing Technology     | Direct Thermal              |
| Printer Output          | Monochrome                  |
| Resolution              | 203 dpi                     |
| Print Speed             | Up to 150 mm/s (6 ips)      |
| Connectivity Technology | USB, Serial, Ethernet       |
| Special Feature         | Graphical Display, Ethernet |
| Item Weight             | 28.7 Pounds                 |
| Product Dimensions      | 25 x 15 x 15 inches         |
| Controller Type         | Push Button                 |
| Print Media             | Labels                      |

## 10. WARRANTY AND SUPPORT

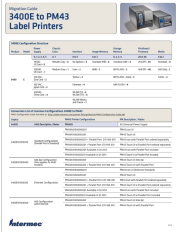

---

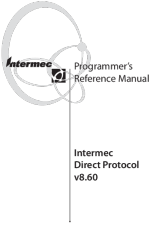

For warranty information and technical support, please refer to the documentation provided with your printer or visit the official Intermec (now Honeywell) website. Keep your purchase receipt as proof of purchase for warranty claims.

**Online Resources:** For the latest drivers, firmware updates, and detailed troubleshooting guides, visit the manufacturer's support portal.

| <b>The Intermec Advantage</b><br>Intermec printers and media are selected to deliver superior performance when used together. Our superior labeling and imaging engineering processes, our extensive global test services, consistently high print quality, and proven label and tag performance in demanding real-world environments. Intermec printers and media are recognized for our complete line of integrated solutions and services, including rugged media complexes, 24/7 customer support, advanced training technology, on-time products, and services are used by customers worldwide to improve the productivity, quality and responsiveness of their business operations. |                               |                     |                     |       |        |            |            |            |            |            |            |  |
| <b>Product of Replacement Program</b><br>Intermec will provide direct replacement products, as follows according to normal wear and tear for those customers who use Intermec Media Products exclusively with their Intermec direct thermal and thermal transfer printers. For full details, click <a href="#">here</a> .                                                                                                                                                                                                                                                                                                                                                                 |                               |                     |                     |       |        |            |            |            |            |            |            |  |

Honeywell ZSim2:  
Fast. Friendly.  
Complete.

Businesses looking for a comprehensive printing solution can now choose selected printers from the Honeywell range at a peace of mind that they will seamlessly integrate with all business systems requiring Zebra ZPL or printer command language. Based on exhaustive analysis of customer support 15 years, Honeywell's 2015 firmware update that includes 2 emulation is well-tested, includes comprehensive support for all commands, and improves font matching. Now, upgrading Honeywell printers is easier than ever before.

Available on most printers, ZSIm2 has been thoroughly tested and approved by Honeywell customers. ZSIm2 is easy to setup and configure, and prints labels that are visually the same as those printed by other devices.

businesses looking to upgrade their printing technology should turn to Honeywell, a company that has over 40 years' experience in designing barcode label printers to meet the needs of a wide range of applications. Whether it be retail shelf price-labelling, general office packing and shipping labelling or distribution centre barcode labelling applications, Honeywell has an extensive range of printers focused on solving the toughest printing challenges. Honeywell is committed to developing affordable barcode labelling solutions that are ideal for bringing about operational efficiencies and productivity improvements in organizations of all sizes, from small-to-medium businesses to Fortune 500 enterprises.

## Frequently Asked Questions

PD43 and PD43c Light Industrial Thermal Printer

### GENERAL QUESTIONS

- Q: How is the PD43 printer positioned within the light printer market?
- A: The PD43 is targeted at the industrial commercial or low-volume industrial printer market segment. For most applications, PD43 is an ideal replacement for PD41 and PD42. The application instances where PD43 does not represent an ideal replacement are outlined in the Application Consideration Document.
- Q: How is the PD43c printer positioned?
- A: The PD43c is targeted at the industrial commercial or low-volume industrial printer market segment. For most applications, PD43c is an ideal replacement for PD41 and PD42. The application instances where PD43c does not represent an ideal replacement are outlined in the Application Consideration Document.
- Q: What is the difference between PD43 and PD43c?
- A: Both the PD43 and PD43c have the same user interface, electronics and print mechanism. The larger PD43c with standard dimensions has the capability to accommodate a roll of media up to 10.75" (27.3 cm) in diameter. The PD43 using optional flat top door can completely cover media up to 10.75" (27.3 cm) in diameter. Keep in mind that the compact PD43c can accommodate both media sizes when including the larger media to rest of an external media holder - built-in the case, the media would not be covered and would be completely accessible to reuse.
- Q: How can I tell PD43 apart from PD43c?
- A: The PD43c media is more compact and does not have media holder as a standard feature.
- Q: What kind of output volume can I expect from PD43 and PD43c? How many labels per day will it print?
- A: These printers have the same duty cycle as PD41 and PD42, between 1,000 and 5,000 A4 (11x17 cm) labels per day, depending on the nature of the output environment.
