WOCA Denmark Oil Refreshing Soap Natural 1L Instruction Manual

1. INTRODUCTION AND PRODUCT OVERVIEW

The WOCA Denmark Oil Refreshing Soap Natural 1L is a specialized, plant-based cleaning and maintenance product designed for oiled wood floors. This concentrated formula cleans, re-oils, protects, and helps maintain the natural matte finish of your wood surfaces. It is suitable for various types of oiled wood, including UV pre-finished oil, hardwax oiled, tung oiled, Danish oiled, and penetrating oiled wood surfaces.

2. SAFETY INFORMATION

This product is formulated with plant-based ingredients and is certified by the European standard safety requirement EN 71, indicating its safety for use around children's toys. It also meets the requirements for the Indoor Climate Label, ensuring a healthy indoor environment. Always handle cleaning products with care.

- Keep out of reach of children and pets.
- Avoid contact with eyes. In case of contact, rinse thoroughly with water.
- Do not ingest. If swallowed, seek medical attention immediately.
- Store in a cool, dry place away from direct sunlight.

Image 3: The product is eco-friendly and plant-based.

3. PRODUCT CONTENTS

Each package contains one 1-liter (33.8 Fl Oz) container of WOCA Denmark Oil Refreshing Soap Natural.

4. SETUP AND PREPARATION

1. **Clear the Area:** Remove all furniture, rugs, and other items from the wood floor area to be treated.
2. **Clean the Floor:** Ensure the floor is thoroughly cleaned of loose dirt, dust, and debris. Vacuum or sweep the floor before application. For heavily soiled floors, a prior cleaning with a dedicated wood floor cleaner may be beneficial.
3. **Gather Tools:** Prepare a mop (a WOCA Spray Mop or WOCA Swep Twist Mop is recommended for optimal results) and a supply of warm water.

5. OPERATING INSTRUCTIONS (APPLICATION)

Follow these steps for effective application of WOCA Denmark Oil Refreshing Soap:

1. Dilution:

- **For WOCA Spray Mop:** Pour 2 capfuls of WOCA Oil Refreshing Soap into the mop reservoir. Fill the remaining portion of the reservoir with warm water.
- **For WOCA Sweb Twist Mop or standard mop and bucket:** Add approximately 6 fluid ounces (177 ml) of WOCA Oil Refreshing Soap per gallon (3.78 liters) of warm water.

2. **Application:** Dip the mop or a clean cotton cloth into the diluted solution. Wring out excess liquid so the mop/cloth is damp, not soaking wet.

3. **Mop the Floor:** Apply the solution evenly to the wood floor, working in small sections. Ensure consistent coverage across the entire surface.

4. **Drying:** Allow the floor to dry completely. Drying time may vary depending on humidity and ventilation. Ensure adequate ventilation during and after application.

6. MAINTENANCE

WOCA Denmark Oil Refreshing Soap is specifically formulated for quarterly maintenance of your oiled wood surfaces. Regular use helps to clean the wood and replenish its oil finish, enhancing its protection

and appearance.

- **Frequency:** Use approximately every three months for optimal results.
- **Between Treatments:** For daily or weekly cleaning between quarterly treatments, use a neutral, pH-balanced wood floor cleaner designed for oiled surfaces.

PROTECT + NOURISH

WOCA DENMARK

Protect your wood floors from stains, water, and wear & tear

Image 5: Quarterly maintenance is recommended.

7. TROUBLESHOOTING

- **Streaking:** If streaks appear on the floor, it may indicate that the mop was too wet or too much product was used. Ensure the mop is well-wrung and apply a thinner, more even coat.
- **Dull Finish:** If the floor appears dull after drying, ensure the correct dilution ratio is used and that the product is applied consistently. Regular quarterly application is key to maintaining the finish.
- **Uneven Coverage:** Work in small, manageable sections to ensure even application and prevent the product from drying unevenly.

8. SPECIFICATIONS

Feature	Detail
Manufacturer	WOCA Denmark A/S
Part Number	511210A
Item Weight	2.2 pounds
Product Dimensions	9.76 x 6.69 x 10.79 inches
