Iwata 6033/6034 (94008321)

# Iwata 6033/6034 Aluminum Cup Lid Instruction Manual

Model: 94008321

## INTRODUCTION

---

This manual provides essential instructions for the proper use and maintenance of your Iwata 6033/6034 Aluminum Cup Lid, model 94008321. This lid is designed to provide a secure and transparent cover for compatible Iwata aluminum cups, ensuring the integrity of your materials.

## SETUP

---

- Compatibility Check:** Ensure the lid is used with Iwata aluminum cups models 6033 or 6034. Using it with incompatible cups may result in an improper seal.
- Initial Cleaning:** Before first use, wash the lid thoroughly with warm water and a mild detergent. Rinse completely and allow it to air dry.
- Attachment:** Align the lid with the rim of the compatible Iwata aluminum cup. Apply gentle, even pressure around the edge until the lid snaps securely into place. A proper seal will prevent spills and contamination.

## OPERATING INSTRUCTIONS

---

- **Secure Storage:** Once attached, the lid provides a secure closure for liquids, such as paints or solvents, within the cup. This helps prevent evaporation and contamination.
- **Content Visibility:** The transparent design allows for easy visual inspection of the cup's contents without removing the lid.
- **Removal:** To remove the lid, gently lift one edge until the seal breaks, then carefully pull it off the cup. Avoid excessive force to prevent damage to the lid or cup.

## MAINTENANCE

---

- **Cleaning:** After each use, clean the lid promptly. Hand wash with warm water and a mild, non-abrasive detergent. Rinse thoroughly to remove all cleaning agents and material residues.
- **Drying:** Allow the lid to air dry completely before storage or next use. Ensure no moisture is trapped, especially in crevices.
- **Dishwasher Safety:** This lid is **not** dishwasher safe. High temperatures and harsh detergents in dishwashers can damage the material and affect its sealing properties.
- **Storage:** Store the lid in a clean, dry place, away from direct sunlight and extreme temperatures. Avoid storing heavy objects on top of the lid to prevent deformation.

## TROUBLESHOOTING

---

- **Lid Not Sealing Properly:**
  - Check for any debris or dried material on the rim of the cup or the sealing edge of the lid. Clean thoroughly if necessary.
  - Ensure the lid is correctly aligned with the cup.
  - Inspect the lid for any visible damage, cracks, or deformities that might prevent a tight seal.
- **Difficulty Removing Lid:**
  - Apply gentle, even pressure around the edge while lifting. Avoid prying with sharp objects, which can cause damage.
  - Ensure there is no dried material creating a bond between the lid and the cup.
