We R Memory Keepers WR661176

We R Memory Keepers Revolution Die-Cutting & Embossing Machine User Manual

Model: WR661176 | Brand: We R Memory Keepers

INTRODUCTION

The We R Memory Keepers Revolution Die-Cutting and Embossing Machine is a versatile tool designed for crafters to create intricate die-cuts and embossed designs. This machine features an innovative magnetic platform system for precise placement and consistent results. It is compatible with most leading brand dies and embossing folders, offering broad creative possibilities for scrapbooking, journaling, and card making projects.

PACKAGE CONTENTS

Upon unboxing your We R Memory Keepers Revolution machine, please verify that all the following components are included:

- 1 Revolution Cutting and Embossing Machine
- 1 Platform
- 1 Magnetic Mat
- 1 Die-cutting Plate
- 1 Embossing Plate

SETUP

Follow these steps to set up your Revolution Die-Cutting and Embossing Machine:

1. **Unpack the Machine:** Carefully remove the machine and all its components from the packaging. Retain the packaging for future storage or transport.
2. **Attach the Handle:** Locate the hand crank. Insert the handle into the designated slot on the side of the machine and screw it in securely until it is firmly attached. Note that the handle is designed to remain permanently attached once screwed in.
3. **Prepare Your Workspace:** Place the machine on a stable, flat surface. Ensure you have enough space around the machine for feeding materials through.

OPERATING INSTRUCTIONS

The Revolution machine simplifies die-cutting and embossing with its intuitive design. The clear cutting plate allows for visual confirmation during operation.

Die-Cutting

1. **Prepare Your Sandwich:** Place your chosen material (e.g., paper, cardstock) onto the Magnetic Mat. Position your die (cutting edge down) on top of the material. The magnetic mat will help hold the die in place.
2. **Add Cutting Plate:** Place the clear Die-cutting Plate on top of your material and die. This forms your 'sandwich'.
3. **Feed Through Machine:** Insert the prepared sandwich into the opening of the Revolution machine. Turn the handle to feed the sandwich through the rollers. Continue turning until the entire sandwich has passed through.
4. **Remove and Inspect:** Carefully remove the sandwich and separate the layers. Your material should now be perfectly die-cut.

Embossing

1. **Prepare Your Material:** Place your material inside an Embossing Folder. Ensure the material is centered within the folder for an even impression.
2. **Create the Embossing Sandwich:** Place the Embossing Folder with your material onto the Platform. Then, place the Embossing Plate on top.
3. **Feed Through Machine:** Insert the embossing sandwich into the machine's opening. Turn the handle to feed it through the rollers until it exits the other side.
4. **Reveal Embossed Design:** Remove the sandwich and open the embossing folder to reveal your textured, embossed design.

Compatibility

The Revolution Die-Cutting and Embossing Machine is designed to work seamlessly with We R Memory Keepers Revolution products. Additionally, it offers broad compatibility with most leading brand dies and embossing folders (sold separately), allowing you to utilize your existing crafting supplies.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your Revolution machine:

- **Cleaning:** Regularly wipe down the machine with a soft, dry cloth to remove dust and debris. Avoid using harsh chemicals or abrasive cleaners.
- **Plate Care:** The cutting and embossing plates are consumable items and will show wear over time (scuff marks, indentations). This is normal and does not affect performance. Rotate and flip your plates regularly to distribute wear evenly. Replace plates when they become excessively warped or no longer provide clean cuts/impressions.
- **Storage:** Store the machine in a clean, dry place away from extreme temperatures.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Incomplete Cuts:** If your material is not cutting completely, ensure your sandwich is correctly assembled and that your plates are not excessively worn. You may need to run the sandwich through the machine multiple times or replace worn cutting plates.
- **Uneven Embossing:** For uneven embossing, check that your material is centered in the embossing

folder and that the plates are aligned properly. Apply steady pressure when turning the handle.

- **Difficulty Turning Handle:** If the handle is difficult to turn, your sandwich might be too thick. Adjust the layers or material thickness. Ensure no foreign objects are obstructing the rollers.
- **Warped Plates:** Cutting and embossing plates will naturally warp over time due to pressure. This is normal. Continue to rotate and flip them. Replace if warping becomes severe and impacts results.

SPECIFICATIONS

Feature	Detail
Brand	We R Memory Keepers
Model Number	WR661176
Material	Plastic
Color	Multi
Active Surface Area	9.25 x 6.25 inches
Operation Mode	Manual
Item Weight	11 pounds (approx. 5 Kilograms)
Product Dimensions	14 x 11.7 x 9.8 inches
UPC	633356611769
