How to Use Your Drying Rack

The Ciclone drying rack offers versatile drying options:

- **Standard Drying:** Hang clothes over the horizontal bars on each of the three tiers. Distribute weight evenly to maintain stability.
- **Flat Drying:** For delicate items or items that need to dry flat, lay them across the grids.
- **Hanger Drying:** Utilize the pivoting hanger holders located at the top of the rack for shirts, dresses, or other items best dried on hangers.

Maintenance and Care

To ensure the longevity of your Metaltex Ciclone drying rack:

- Clean regularly with a damp cloth and mild detergent.
- Avoid abrasive cleaners or scouring pads, as these can damage the EPOTHERM coating.
- Dry thoroughly after cleaning, especially if used outdoors, to prevent water spots.
- The EPOTHERM treatment provides anti-rust properties, but proper care will extend its effectiveness.

Folding and Storage

When not in use, the Ciclone drying rack can be easily folded for compact storage:

1. Ensure all clothes are removed from the rack.
2. Fold down any extended side drying grids.
3. Push the main vertical frames together until the rack collapses into its flat, compact form.
4. The rack can be stored upright against a wall or in a narrow space.

Troubleshooting

- **Rack feels unstable:** Ensure all tiers are fully extended and locked into place. Distribute laundry weight evenly across all available drying space.
- **Difficulty folding/unfolding:** Check for any obstructions or misaligned parts. Apply gentle, even pressure. Do not force the mechanism.
- **Rust spots:** While treated with EPOTHERM anti-rust, prolonged exposure to moisture or harsh chemicals can affect the coating. Clean and dry the rack regularly.
