SETUP AND ASSEMBLY

The Walker Edison Timothee Loft Bunk Bed is designed for ready-to-assemble setup and includes step-by-step instructions. It is recommended that two people assemble the bed for ease and safety, though it can be assembled by one person.

Required Tools and Parts

All necessary tools (e.g., Allen wrenches) and parts are included with the product. Ensure all components are present before beginning assembly. In case of missing parts, contact customer support.

Assembly Steps

1. Unpack all components and verify against the parts list in the included manual.
2. Lay out the parts and hardware for each section on a clean, flat surface.
3. Follow the detailed step-by-step instructions provided in the [Installation Manual \(PDF\)](#) or [User Manual \(PDF\)](#).

For optimal stability, the bed includes a bracket to secure it to a wall. Additional hardware for wall mounting may be required and is not included.

OPERATING INSTRUCTIONS

The loft bed is designed to maximize floor space. The area beneath the bed can be utilized for various purposes, such as placing a desk, nightstand, lounge chair, or gaming setup.

Mattress Compatibility

The bed fits most twin beds. A mattress thickness of 5 to 9 inches is recommended. Thicker mattresses may reduce the effective height of the guardrails.

Ladder Use

The integrated ladder provides access to the loft bed. The ladder can be positioned on either side of the bed. For enhanced comfort, consider padding the ladder rungs if they cause discomfort.

MAINTENANCE

Cleaning

To clean the bed frame, wipe with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners that could damage the powder-coated finish.

Inspections

Periodically check all bolts and screws to ensure they remain tight. Retighten as necessary to maintain the bed's stability and safety.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed wobbles	Loose connections; not secured to wall.	Ensure all bolts are tightened. Secure the bed to a wall using the provided bracket (additional hardware may be needed).
Ladder rungs cause discomfort	Narrow or round rungs.	Consider adding padding to the ladder rungs (e.g., pipe insulation).
Missing parts upon delivery	Packaging damage during transit.	Contact Walker Edison customer support for replacement parts. Do not attempt to return the entire package if only small parts are missing.
