Schulte 3591500 Open Slide Closet Shelving Instruction Manual

Model: 3591500

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Schulte 3591500 Open Slide Closet Shelving. Please read these instructions carefully before beginning installation to ensure proper setup and long-term performance of the product.

SETUP AND INSTALLATION

The Schulte 3591500 Open Slide Closet Shelving is designed for efficient closet organization. This vinyl-coated wire shelving system features a permanently attached hang rod, allowing hangers to slide freely along its length.

Tools Required (Not Included):

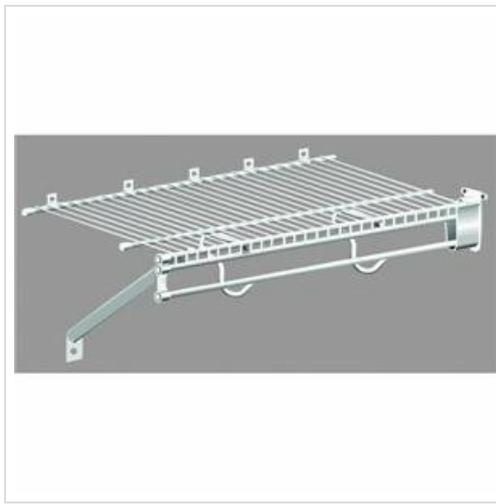

- Hacksaw or bolt cutters (for cutting shelving to desired lengths)
- Measuring tape
- Level
- Drill (if using fixed mount or shelf track system)
- Screwdriver

Installation Methods:

The shelving can be installed using one of two primary methods:

1. **Fixed Mount System:** This method utilizes back clips, wall brackets, and support brackets to secure the shelving directly to the wall. Ensure all mounting points are securely fastened into wall studs or appropriate anchors (not included).
2. **Shelf Track Standards and Brackets System:** This method involves installing vertical shelf tracks (not included) onto the wall, into which brackets are inserted to support the shelving. This offers adjustability for shelf height.

Note: No mounting hardware is included with this product. Please purchase appropriate hardware based on your chosen installation method and wall type.

OPERATING INSTRUCTIONS

Once installed, the Schulte Open Slide Closet Shelving is ready for use. The unique design incorporates a permanently attached hang rod that allows clothing hangers to slide freely and continuously along the entire length of the shelf, even past the 1-foot support points. This feature maximizes accessibility and organization within your closet space.

MAINTENANCE

To maintain the appearance and functionality of your Schulte Open Slide Closet Shelving, follow these simple care instructions:

- **Cleaning:** Wipe the shelving with a dry cloth as needed to remove dust and light debris. Avoid abrasive cleaners or harsh chemicals, which could damage the vinyl coating.
- **Inspection:** Periodically check all mounting hardware and connections to ensure they remain secure. Tighten any loose screws or brackets to maintain stability.

TROUBLESHOOTING

This section addresses common issues you might encounter with your shelving unit.

Shelving feels unstable:

- Ensure all mounting hardware is securely fastened into wall studs or appropriate anchors.
- Verify that the shelving is properly seated in all brackets and clips.
- Check for excessive weight on the shelf. Distribute items evenly and do not exceed the shelf's weight capacity.

Hangers do not slide freely:

- Inspect the hang rod for any obstructions or damage.
- Ensure hangers are of a standard size and type compatible with the rod.
