Rabbit Air SPA-700A and SPA-780A/N

Rabbit Air MinusA2 Air Purifier Filter Replacement Kit (Odor Remover)

Models: SPA-700A & SPA-780A/N

INTRODUCTION

This manual provides comprehensive instructions for the replacement of the Rabbit Air MinusA2 Air Purifier Filter Kit, specifically the Odor Remover variant. This kit is designed for use with Rabbit Air MinusA2 models SPA-700A and SPA-780A/N. Regular filter replacement is crucial for maintaining the optimal performance and air purification efficiency of your device.

PRODUCT OVERVIEW

The Rabbit Air MinusA2 Filter Replacement Kit is engineered to provide superior air filtration. It includes multiple layers of specialized filters to address various airborne pollutants.

Image: Components of the Rabbit Air MinusA2 Odor Remover Filter Kit.

- **Genuine Rabbit Air Replacement Filter:** These filters are precision-engineered with activated carbon and certified HEPA filtration standards, capturing 99.97% of airborne particles like dust, allergens, pet dander, and VOCs. Each filter undergoes strict quality control for reliable performance.
- **1-Year Filter Life:** Designed for long-term performance, this filter replacement provides up to one full year of continuous 24/7 use (approximately 8,700 hours). This ensures consistent airflow and filtration efficiency, reducing the frequency of replacements.
- **Odor Remover Filter:** This advanced filter is specifically designed to trap and eliminate odors from pets, cigarettes, cigars, cooking, and mildew, contributing to a fresher indoor environment.
- **BioGS HEPA Filter:** The BioGS HEPA filter captures airborne allergens, dust, and pollutants down to 0.3 microns with 99.97% efficiency, promoting allergy relief and healthier indoor spaces.
- **Complete Filter Replacement Kit:** This all-in-one kit includes a Medium Filter, a Rabbit Air HEPA Filter, a Customized Odor Remover Filter, and an Activated Carbon Charcoal Filter, ensuring comprehensive air purification.

FILTER REPLACEMENT PROCEDURE

Follow these steps to replace the filters in your Rabbit Air MinusA2 air purifier. Ensure the unit is unplugged before beginning.

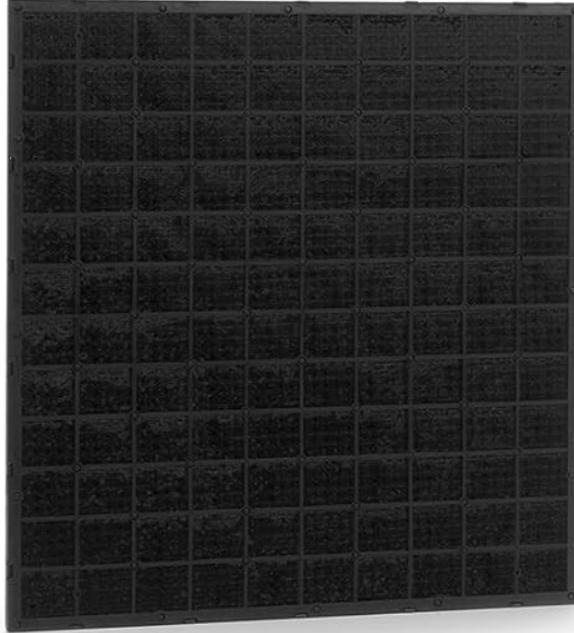

Image: Exploded view showing the layered filter system with numbered components.

- 1. Remove the Front Panel:** Gently pull the front panel of your Rabbit Air MinusA2 unit to detach it.
- 2. Remove the Old Filters:** The filters are layered within a frame. Carefully remove each old filter, noting their order. The washable pre-filter (if applicable) should be cleaned, not discarded.
- 3. Unwrap New Filters:** Unpack the new replacement filters from their plastic wrapping.
- 4. Install New Filters:** Insert the new filters into the filter case in the correct order. The kit typically includes (1) a Medium Filter, (2) a Rabbit Air HEPA Filter, (3) a Customized Odor Remover Filter, and (4) an Activated Carbon Charcoal Filter. Refer to the labels on each filter for proper placement.
- 5. Reattach the Filter Case:** Once all new filters are in place, reattach the filter case securely into the air purifier unit.
- 6. Replace the Front Panel:** Align and reattach the front panel to the air purifier.
- 7. Reset Filter Indicator:** After replacing the filters, consult your air purifier's main instruction manual for how to reset the filter life indicator.

MAINTENANCE

To ensure the longevity and effectiveness of your air purifier and its filters:

- Pre-Filter Cleaning:** The washable pre-filter should be cleaned regularly (e.g., monthly) by vacuuming or rinsing with water. Ensure it is completely dry before reinstallation.
- Filter Replacement:** Replace the entire filter kit approximately every 12 months, or as indicated by your air purifier's filter life monitor.
- Sensor Cleaning:** Periodically clean the air quality sensor on your air purifier to ensure accurate readings. Refer to your air purifier's main manual for specific instructions.

SPECIFICATIONS

Feature	Detail

Brand	Rabbit Air
Compatible Models	SPA-700A, SPA-780A/N
Filter Type	Odor Remover Customized Filter Kit (Medium, BioGS HEPA, Odor Remover, Activated Carbon Charcoal)
Filter Life	Up to 1 year (approx. 8,700 hours of continuous use)
Material	Fiberglass
