1. PRODUCT OVERVIEW

The Philips SHH8006/28 Headset is designed for use with iPhone and iPod devices, offering superior sound quality and a secure, comfortable fit. It features an in-line remote and microphone for convenient control of music playback and calls, making it suitable for an active lifestyle.

Image 1.1: Philips SHH8006/28 Headset showing the ear-hook design, in-ear buds, and the in-line remote with microphone.

Key Features:

- **In-line Remote and Microphone:** For hands-free control of your device.
- **Flexible Ear Hooks:** Provide a secure fit, ideal for active use.
- **Passive Noise Isolation:** Delivers clear sound by reducing external distractions.
- **Interchangeable Ear Caps:** Three sizes included for a personalized, comfortable fit.
- **Anti-Tug Design:** Grips tighter when the cable is pulled, enhancing security.

2. SETUP

2.1 Selecting the Right Ear Caps

The headset comes with three sets of interchangeable rubber ear caps (small, medium, large). Selecting the correct size is crucial for comfort, sound quality, and passive noise isolation.

1. **Test Each Size:** Try each ear cap size to determine which provides the most comfortable and secure fit in your ear canal.
2. **Check for Seal:** A good seal will block out most ambient noise and provide optimal bass response. If sound is thin or external noise is prominent, try a larger size. If uncomfortable, try a smaller size.
3. **Attach Securely:** Ensure the chosen ear caps are firmly attached to the headset's speaker drivers.

2.2 Wearing the Headset

The SHH8006/28 features flexible ear hooks for a secure fit, especially during movement.

1. **Identify Left and Right:** The earpieces are marked with 'L' for left and 'R' for right.
2. **Position Ear Hooks:** Gently place the ear hook over the top of your ear.
3. **Insert Ear Bud:** Carefully insert the ear bud into your ear canal.
4. **Adjust for Comfort:** Adjust the ear hook and ear bud until a comfortable and secure fit is achieved. The anti-tug design helps maintain the fit even with cable movement.

Image 2.1: Close-up of the Philips SHH8006/28 ear-hook design, illustrating how it fits over the ear for stability.

2.3 Connecting to Your Device

Plug the 3.5mm audio jack into the headphone port of your compatible iPhone or iPod. Ensure the connection is firm.

3. OPERATION

The in-line remote and microphone provide convenient control over your audio and calls without needing to access your device directly.

3.1 Music Control

- **Play/Pause:** Press the center button once.
- **Next Track:** Press the center button twice quickly.
- **Previous Track:** Press the center button three times quickly.
- **Volume Up:** Press the '+' button.
- **Volume Down:** Press the '-' button.

3.2 Call Control

- **Answer/End Call:** Press the center button once.
- **Reject Call:** Press and hold the center button for approximately two seconds, then release.
- **Switch Calls:** During a call, if another call comes in, press the center button once to switch to the new call and put the current call on hold. Press again to switch back.
- **Activate Voice Control/Siri:** Press and hold the center button until the voice control interface appears on your device.

3.3 Microphone Usage

The integrated microphone allows for clear voice communication during calls and for recording voice memos. Ensure the microphone is positioned appropriately for optimal voice pickup.

4. MAINTENANCE

Proper care and maintenance will extend the lifespan of your Philips SHH8006/28 Headset.

- **Cleaning Ear Caps:** Regularly remove the rubber ear caps and clean them with a soft, damp cloth. Allow them to dry completely before reattaching.
- **Cleaning Headset Body:** Wipe the headset body and cable with a dry, soft cloth. Avoid using harsh chemicals or abrasive cleaners.
- **Storage:** When not in use, store the headset in a clean, dry place, away from extreme temperatures and direct sunlight. Avoid tangling the cable.
- **Avoid Moisture:** Do not expose the headset to excessive moisture or immerse it in water.
- **Handle with Care:** Avoid pulling on the cable or applying excessive force to the connectors.

5. TROUBLESHOOTING

If you encounter issues with your headset, refer to the following common problems and solutions:

5.1 No Sound or Low Volume

- **Check Connection:** Ensure the 3.5mm jack is fully inserted into your device's headphone port.
- **Adjust Volume:** Increase the volume on both your device and using the in-line remote.
- **Test with Another Device:** Connect the headset to a different compatible device to determine if the issue is with the headset or the original device.
- **Check Ear Caps:** Ensure ear caps are correctly sized and creating a good seal in your ear.

5.2 Microphone Not Working

- **Check Connection:** Ensure the headset is fully plugged into your device.
- **Device Settings:** Verify that your device's microphone input is set to the headset.
- **Test with Another App/Device:** Try using the microphone with a different application or on another device to isolate the problem.

5.3 Remote Control Not Responding

- **Check Compatibility:** Ensure your device and its software version are compatible with the headset's remote functions. Some older devices or specific software versions may have limited remote functionality.
- **Firm Connection:** Re-insert the 3.5mm jack to ensure a secure connection.
- **Clean Connector:** Inspect the 3.5mm connector for any debris or lint and clean if necessary.

6. SPECIFICATIONS
