Behringer VMX1000USB Professional 7-Channel DJ Mixer User Manual

Model: VMX1000USB

1. INTRODUCTION

The Behringer VMX1000USB is a professional 7-channel rack-mount DJ mixer designed for versatile audio mixing applications. It features an integrated USB/audio interface, allowing direct connection to a computer for recording and playback of digital music files without requiring additional drivers. This mixer incorporates state-of-the-art phono preamps, an intelligent dual BPM counter, and VCA-controlled faders for reliable and smooth audio performance. This manual provides essential information for the proper setup, operation, and maintenance of your VMX1000USB mixer.

2. IMPORTANT SAFETY INSTRUCTIONS

- Read these instructions thoroughly before operating the device.
- Keep these instructions for future reference.
- Heed all warnings and follow all instructions.
- Do not use this apparatus near water or moisture.
- Clean only with a dry cloth.
- Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- Only use attachments/accessories specified by the manufacturer.

- Unplug this apparatus during lightning storms or when unused for long periods of time.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

3. PACKAGE CONTENTS

Please check that your package contains the following items:

- Behringer VMX1000USB DJ Mixer Unit
- AC Power Cable
- USB Cable
- User Manual (this document)

If any items are missing or damaged, please contact your dealer immediately.

4. SETUP

4.1 Unpacking and Placement

Carefully remove the mixer from its packaging. Place the mixer on a stable, flat surface or install it into a standard 19-inch equipment rack. Ensure adequate ventilation around the unit to prevent overheating.

4.2 Power Connection

Connect the supplied AC power cable to the mixer's power inlet and then to a suitable wall outlet. Ensure the mixer's power switch is in the 'OFF' position before connecting to power.

4.3 Audio Connections

The VMX1000USB offers a variety of input and output options:

- **Phono/Line Inputs:** Connect turntables to the PHONO inputs (RCA) and CD players, media players, or other line-level devices to the LINE inputs (RCA). Ensure the PHONO/LINE switch on each channel is set correctly.
- **Microphone Inputs:** Connect microphones to the XLR or 1/4-inch TRS MIC inputs on the front panel.
- **Main Outputs:** Connect the MAIN outputs (balanced XLR or unbalanced RCA) to your main amplifier or powered speakers.
- **Zone Output:** Use the ZONE output (RCA) to send audio to a separate listening area.
- **Subwoofer Output:** Connect the SUBWOOFER output (RCA) to a powered subwoofer for enhanced bass. This output features adjustable crossover frequency and level control.

4.4 USB Connection

Connect the mixer's USB port to a USB port on your PC or Mac computer using the provided USB cable. The mixer will function as a 2-in/2-out audio interface, allowing you to record your mix or play digital audio files through the mixer. No special drivers are typically required for Windows or macOS.

5. OPERATING THE VMX1000USB

5.1 Channel Controls

Each of the 7 channels features:

- **GAIN Control:** Adjusts the input sensitivity for the connected audio source. Set this to achieve a strong signal without clipping.
- **3-Band Kill EQ:** Provides extreme attenuation (-32 dB) for High, Mid, and Low frequencies. An EQ on/off switch is available on stereo channels.
- **PFL/CUE Button:** Routes the channel's audio to the headphone output for pre-fader listening.
- **Channel Fader:** Controls the volume level of the individual channel. These are ULTRAGLIDE faders designed for long life.

5.2 Crossfader

The VMX1000USB features a VCA-controlled crossfader for smooth transitions between channels. The crossfader curve is adjustable, allowing you to customize its response for different mixing styles, from sharp cuts to smooth fades.

5.3 BPM Counter

The intelligent dual BPM (Beats Per Minute) counter automatically detects and displays the tempo of the audio on selected channels. It includes time and beat sync displays to assist with beatmatching.

5.4 USB Audio Interface Functionality

When connected to a computer via USB, the mixer acts as an external sound card. You can:

- **Record:** Capture your live mix directly to your computer using compatible recording software.
- **Playback:** Route digital audio from your computer through the mixer for playback.

5.5 Master Section

The master section provides overall control:

- **Main Level:** Controls the overall volume of the MAIN outputs.
- **Zone Level:** Adjusts the volume for the ZONE output.

- **Subwoofer Controls:** Adjust the level and crossover frequency for the dedicated subwoofer output.
- **Monitor Function:** Features PFL/main balance control and a Split option for headphone monitoring.

5.6 Microphone Inputs and Talkover

The microphone channels include gain control and a 2-band EQ. The automatic talkover function automatically ducks the music level when a microphone signal is detected, with separate Depth and Sensitivity controls for adjustment.

5.7 XPQ Stereo Surround Effect

Activate the XPQ stereo surround effect to add depth and spaciousness to your mix.

6. MAINTENANCE

To ensure the longevity and optimal performance of your VMX1000USB mixer:

- **Cleaning:** Regularly wipe the mixer's surface with a soft, dry, lint-free cloth. Avoid using abrasive cleaners or solvents.
- **Fader Care:** The ULTRAGLIDE faders are designed for durability. If fader movement becomes stiff or noisy, specialized fader lubricant may be applied by a qualified technician. Avoid spraying general lubricants directly into the fader mechanism.
- **Ventilation:** Ensure that ventilation openings are clear and not obstructed to prevent heat buildup.
- **Storage:** When not in use for extended periods, store the mixer in a clean, dry environment, protected from dust and extreme temperatures.

7. TROUBLESHOOTING

If you encounter issues with your VMX1000USB, refer to the table below for common problems and solutions:

Problem	Possible Cause	Solution
No power	Power cable disconnected; Power switch off; Faulty outlet	Check power cable connection; Ensure power switch is ON; Test with a different outlet.
No sound output	Incorrect input/output connections; Channel faders down; Master volume low; PFL/CUE engaged	Verify all audio cables are correctly connected; Raise channel faders and master volume; Ensure PFL/CUE is disengaged for main output.
Distorted audio	Input gain too high; Output level too high; Faulty cable	Reduce input GAIN on channels; Lower master output level; Test with different cables.
USB audio not working	USB cable disconnected; Incorrect computer audio settings; Mixer not selected as audio device	Check USB cable connection; Verify the mixer is selected as the input/output device in your computer's sound settings and audio software.
BPM counter inaccurate	Complex audio material; Low signal level	Ensure a clear, strong beat is present; Increase channel gain if signal is too low.
