

## FANTECH FB 6

# Fantech FB 6 In-line Filter Box User Manual

Model: FB 6

## 1. PRODUCT OVERVIEW

The Fantech FB 6 In-line Filter Box is designed to enhance indoor air quality by providing additional filtration within your HVAC ductwork. It is typically installed after an HRV (Heat Recovery Ventilator) or an inline fan to filter incoming air. This unit includes a MERV 13 filter for efficient particle removal.

Figure 1: Exterior view of the Fantech FB 6 In-line Filter Box, showing the duct connection on the left and the access knob on the right.

## 2. SAFETY INFORMATION

Please read all instructions carefully before installation and operation. Failure to follow these instructions may result in property damage, injury, or death.

- Ensure power to the HVAC system is disconnected before installation or maintenance.
- Wear appropriate personal protective equipment (PPE) during installation and maintenance.
- Consult a qualified HVAC professional for complex installations or if you are unsure about any steps.
- Do not operate the unit if any parts are damaged or missing.

- Dispose of old filters according to local regulations.

### 3. PACKAGE CONTENTS

---

Verify that all components are present before beginning installation.

- Fantech FB 6 In-line Filter Box
- MERV 13 Filter (pre-installed or separate)
- Installation Guide (this manual)

### 4. INSTALLATION AND SETUP

---

#### 4.1 Pre-Installation Checklist

- Confirm duct size compatibility (6-inch duct).
- Ensure adequate space for installation and future filter replacement.
- Gather necessary tools (e.g., duct cutters, sealant, screwdriver).

#### 4.2 Installation Steps

1. **Select Location:** Install the filter box in the ductwork after your HRV or inline fan, ensuring it is accessible for maintenance.
2. **Prepare Ductwork:** Cut a section of the existing 6-inch ductwork to accommodate the filter box. Ensure clean, straight cuts.
3. **Connect to Ductwork:** Slide the filter box onto the prepared duct ends. Secure connections using appropriate duct clamps or screws and seal with HVAC-approved tape or mastic to prevent air leaks.
4. **Verify Filter Installation:** Open the access panel (refer to Figure 2) and ensure the MERV 13 filter is correctly seated.
5. **Secure Access Panel:** Close and secure the access panel using the provided knobs/screws.

Figure 2: Interior view of the Fantech FB 6 In-line Filter Box with the access panel open, revealing the MERV 13 filter angled inside.

### 5. OPERATION

---

The Fantech FB 6 In-line Filter Box operates passively as part of your ventilation system. Once installed, it continuously filters the air passing through it. No user interaction is required for its daily operation.

## 6. MAINTENANCE

### 6.1 Filter Replacement

Regular filter replacement is crucial for maintaining optimal air quality and system performance. The frequency of replacement depends on usage and environmental conditions, but it is generally recommended every 3-6 months.

- 1. Disconnect Power:** Ensure the HVAC system connected to the filter box is powered off at the circuit breaker.
- 2. Open Access Panel:** Loosen the knobs/screws on the access panel and carefully open it.
- 3. Remove Old Filter:** Gently slide out the old MERV 13 filter. Note its orientation for correct installation of the new filter.
- 4. Insert New Filter:** Slide a new MERV 13 filter into the filter box, ensuring it is properly seated and oriented.
- 5. Close Access Panel:** Close the access panel and tighten the knobs/screws securely.
- 6. Restore Power:** Turn the power back on to the HVAC system.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Condensation/Sweating on unit (in cold climates)	Insufficient insulation around the unit, especially when used for fresh air intake.	Apply additional insulation around the exterior of the filter box to prevent condensation. Ensure proper sealing.
Access panel screws spin freely / do not tighten	Internal riveted nut may have come loose or stripped.	Carefully inspect the internal nut. If loose, attempt to secure it. If stripped, consider using a different fastening method or contacting Fantech support.
Filter does not fit perfectly or seal properly	Screw heads or internal components obstructing filter path; incorrect filter size.	Ensure you are using the correct filter size (e.g., 20x20x1 if adapting). Carefully position the filter to avoid obstructions.

## 8. SPECIFICATIONS

Feature	Detail
Model Number	FB 6 (CECOMINOD072653)
Manufacturer	Fantech
Duct Size Compatibility	6 inches
Filter Type Included	MERV 13
Item Weight	10 pounds (4.54 kg)
Package Dimensions	26.9 x 15.1 x 13.1 inches (68.3 x 38.4 x 33.3 cm)

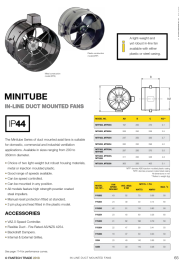

Feature	Detail
Material	22-gauge galvanized steel with baked powder coat finish
UPC	650737403041

## 9. WARRANTY AND SUPPORT

For warranty information and technical support, please refer to the official Fantech website or contact their customer service.

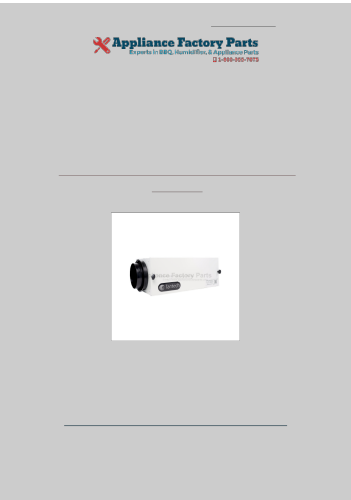

You can visit the official Fantech store on Amazon for more products and information: [FANTECH Store](#).
