HCC HCC 46-369

Instruction Manual

HCC MARINE GRADE ATV SEAT COVER

Model: HCC 46-369

Product Overview

This document provides detailed instructions for the installation and care of your HCC Marine Grade ATV Seat Cover, designed specifically for the 2005 Kawasaki KSF400 (KFX400 Sport). This product is a full replacement seat cover, intended to be installed after the removal of the original seat fabric.

Image: A black marine-grade ATV seat cover, designed to fit the contours of a Kawasaki KSF400 (KFX400 Sport) seat. The cover features durable stitching and a smooth, weather-resistant surface.

Setup and Installation

The installation of this seat cover requires the complete removal of the existing seat fabric from your ATV seat. This product is designed for a precise fit on the specified model.

Required Tools:

- Staple gun (manual or electric)
- Staples (stainless steel recommended for marine grade material)
- Flathead screwdriver or staple remover (for old staples)
- Pliers (optional, for stubborn staples)
- Heat gun or hairdryer (optional, for minor adjustments and stretching)

Installation Steps:

1. **Prepare the Seat:** Carefully remove the existing seat cover from your ATV seat base. Use a flathead screwdriver or staple remover to pry up and remove all old staples. Ensure the seat foam is clean and dry.
2. **Position the New Cover:** Place the new HCC seat cover over the seat foam. Align the cover carefully, ensuring it is centered and the seams match the contours of the seat. The cover is designed to fit snugly.
3. **Initial Fastening (Front and Rear):** Start by stapling the front and rear edges of the cover to the underside of the seat base. Pull the material taut but do not overstretch. Place a few staples in the center of the front and rear sections.
4. **Side Fastening:** Work your way from the center outwards along the sides of the seat. Pull the material firmly and evenly, stapling every 1-2 inches. Pay close attention to corners and curves, ensuring the material is smooth and wrinkle-free. A heat gun or hairdryer can be used sparingly to gently warm and stretch the material for a smoother finish on tight curves.
5. **Trim Excess Material:** Once the cover is fully stapled, trim any excess material from the underside of the seat base, leaving a small margin beyond the staples.
6. **Final Inspection:** Inspect the installed seat cover for any wrinkles, loose spots, or misalignments. Re-staple or adjust as necessary.

Note: Detailed installation guides and instructions are included with each cover. For best results, follow the specific instructions provided with your product.

Maintenance

To ensure the longevity and appearance of your HCC Marine Grade ATV Seat Cover, regular maintenance is recommended.

- **Cleaning:** Clean the seat cover regularly with mild soap and water. Use a soft cloth or sponge. Avoid harsh chemicals, abrasive cleaners, or stiff brushes, as these can damage the marine-grade material.
- **Drying:** Allow the seat cover to air dry completely after cleaning or exposure to moisture.
- **Protection:** While the marine-grade material is designed for durability and weather resistance, prolonged exposure to direct sunlight and extreme weather conditions can affect its lifespan.

Consider using an ATV cover when the vehicle is stored outdoors for extended periods.

- **Inspection:** Periodically inspect the staples and the cover for any signs of wear or damage. Address any issues promptly to prevent further deterioration.

Troubleshooting

Most issues related to the seat cover are installation-related. If you encounter problems, review the installation steps carefully.

Problem	Possible Cause	Solution
Wrinkles or loose spots after installation	Insufficient stretching during installation; uneven stapling.	Carefully remove staples from the affected area, re-stretch the material tautly and evenly, then re-staple. Gentle heat from a heat gun can assist in stretching.
Cover does not seem to fit	Incorrect alignment; product designed for specific model.	Ensure the cover is correctly aligned with the seat's contours. Verify that your ATV model and year match the product's intended fit (2005 Kawasaki KSF400 / KFX400 Sport).
Staples pulling out	Incorrect staple size/type; insufficient penetration; material not taut enough.	Use appropriate staples (e.g., stainless steel, sufficient length for your seat base material). Ensure staples are fully driven in. Re-stretch and re-staple if the material is too loose.

Specifications

Attribute	Detail
Product Type	ATV Seat Cover (Full Replacement)
Brand	HCC
Model Number	HCC 46-369
Compatibility	2005 Kawasaki KSF400 (KFX400 Sport)
Material	Marine Grade Vinyl
Color	Black
Fit Type	Specific Fit (not universal, despite description's "Universal image shown" note, the product title and description clearly state it's designed for a specific model)
