Holmes HAP9240-TUA HEPA-Type Desktop Air Purifier Instruction Manual

Model: HAP9240-TUA

INTRODUCTION

This manual provides essential information for the safe and efficient operation and maintenance of your Holmes HAP9240-TUA HEPA-Type Desktop Air Purifier. This compact air purifier is designed for small spaces, such as offices or nurseries, and is effective in cleaning indoor air. It features quiet operation and user-friendly controls.

Key features include:

- HEPA-Type filtration, capable of removing up to 99% of airborne particles as small as 2 microns from air passing through the filter.
- An enhanced Arm & Hammer filter designed to help eliminate common household odors.
- Three distinct speed settings to accommodate various air quality conditions.
- An optional ionizer function.
- A dual-position design for flexible tabletop placement.

SETUP

- Unpacking:** Carefully remove the air purifier from its packaging. Retain packaging materials for future storage or transport.
- Filter Installation/Verification:** Before first use, ensure the HEPA-Type filter is correctly installed inside the unit. Refer to the filter compartment access instructions, typically located on the back or bottom of the unit. Remove any plastic packaging from the filter before insertion.
- Placement:** Place the air purifier on a firm, level surface. Ensure there is adequate space around the unit (at least 6 inches) for proper air circulation. Avoid placing it directly against walls or furniture that might obstruct air intake or output. The dual-position design allows for horizontal or vertical placement.
- Power Connection:** Plug the power cord into a standard electrical outlet.

OPERATION

The Holmes HAP9240-TUA features button controls for ease of use.

- Power On/Off:** Press the power button (usually marked with a circle and vertical line) to turn the unit on or off.
- Speed Settings:** The unit offers three speed settings (Low, Medium, High). Rotate the control dial or press the speed button (if applicable) to select the desired fan speed. Higher speeds provide faster air purification but may result in increased noise levels. The noise level is approximately 65 dB at its highest setting.
- Ionizer Function:** If your model includes an ionizer, there will be a dedicated button (often marked with a fan icon or similar symbol) to activate or deactivate this feature. The ionizer helps to clump smaller particles together, making them easier for the filter to capture.

For optimal performance, operate the air purifier continuously in the room where it is most needed. Keep windows and doors closed during operation to maximize air purification efficiency.

MAINTENANCE

Regular maintenance ensures the longevity and efficiency of your air purifier.

Filter Replacement

- The HEPA-Type filter requires periodic replacement. The frequency depends on usage and air quality, but typically every 4-6 months.
- To replace the filter, first unplug the unit.
- Access the filter compartment (refer to your unit's specific design for latch or cover removal).
- Remove the old filter and dispose of it.
- Insert a new Holmes AER1 filter (or compatible replacement) into the compartment, ensuring it is seated correctly.
- Close the filter compartment cover securely.
- Plug the unit back in. Some models may have a filter reset button that needs to be pressed after replacement.

Cleaning the Unit

- **Exterior:** Wipe the exterior surfaces of the air purifier with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Air Intake/Output Grilles:** Use a soft brush or vacuum cleaner with a brush attachment to gently clean dust from the air intake and output grilles.
- Always unplug the unit before cleaning.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not turn on.	Not plugged in; power outlet not working; power button not pressed.	Ensure power cord is securely plugged into a working outlet. Press the power button firmly.
Reduced airflow or purification.	Clogged filter; obstructed air intake/output.	Check and replace the filter if necessary. Ensure grilles are free from obstructions.
Unusual noise.	Filter not seated correctly; foreign object inside; unit not on a level surface.	Check filter installation. Unplug and inspect for foreign objects. Place on a stable, level surface.
Odor persists or new odor.	Filter needs replacement; new filter "break-in" smell.	Replace the filter. A slight plastic smell is normal for new units and will dissipate.

SPECIFICATIONS

Model Number: HAP9240-TUA

Brand: HOLMES

Color: White

Product Dimensions: 14.17 x 8.07 x 10.83 inches

Item Weight: 6.1 pounds

Controller Type: Button Control

Noise Level: 65 dB (maximum)

Filtration Type: HEPA-Type

Recommended Room Size: Up to 100 sq ft

WARRANTY AND SUPPORT

This Holmes HAP9240-TUA HEPA-Type Desktop Air Purifier comes with a **3-year limited warranty**.

For warranty claims, technical support, or to purchase replacement parts and filters, please visit the official [HOLMES Store](#) or contact customer service through the details provided on the product packaging or the brand's official website.
