

## ClearVUE Digital TV Booster Indoor TV/FM Antenna GLO030804

# ClearVUE Digital TV Super Booster Indoor TV/FM Antenna User Manual

Model: **GLO030804**

## 1. INTRODUCTION

---

This manual provides comprehensive instructions for the installation, operation, and maintenance of your ClearVUE Digital TV Super Booster Indoor TV/FM Antenna. This device is designed to enhance the reception of over-the-air digital television and FM radio signals, providing improved picture and sound quality for compatible televisions and FM receivers. Please read this manual thoroughly before using the product to ensure optimal performance and longevity.

## 2. PACKAGE CONTENTS

---

- 1 x ClearVUE Digital TV Super Booster Indoor TV/FM Antenna (Model: GLO030804)

## 3. SETUP INSTRUCTIONS

---

Follow these steps to properly set up your ClearVUE Digital TV Super Booster:

- 1. Connect Your Antenna:** Connect your existing indoor TV or FM antenna (e.g., rabbit ears, flat panel antenna) to the "ANTENNA IN" port on the ClearVUE Super Booster. This port is typically a coaxial F-type connector.
- 2. Connect to TV/FM Receiver:** Connect a coaxial cable from the "TV OUT" port on the ClearVUE Super Booster to the antenna input (ANT IN or CABLE IN) on your television or FM radio receiver.
- 3. Power Connection:** Plug the ClearVUE Super Booster directly into any standard electrical wall outlet. The device is designed for indoor use only.
- 4. Scan for Channels:** Turn on your television or FM radio. Access the menu settings on your TV or receiver and perform an "Auto Program," "Channel Scan," or "Auto Tune" function. This process allows your device to detect and save available channels with the boosted signal. Refer to your TV or receiver's manual for specific instructions on how to perform a channel scan.

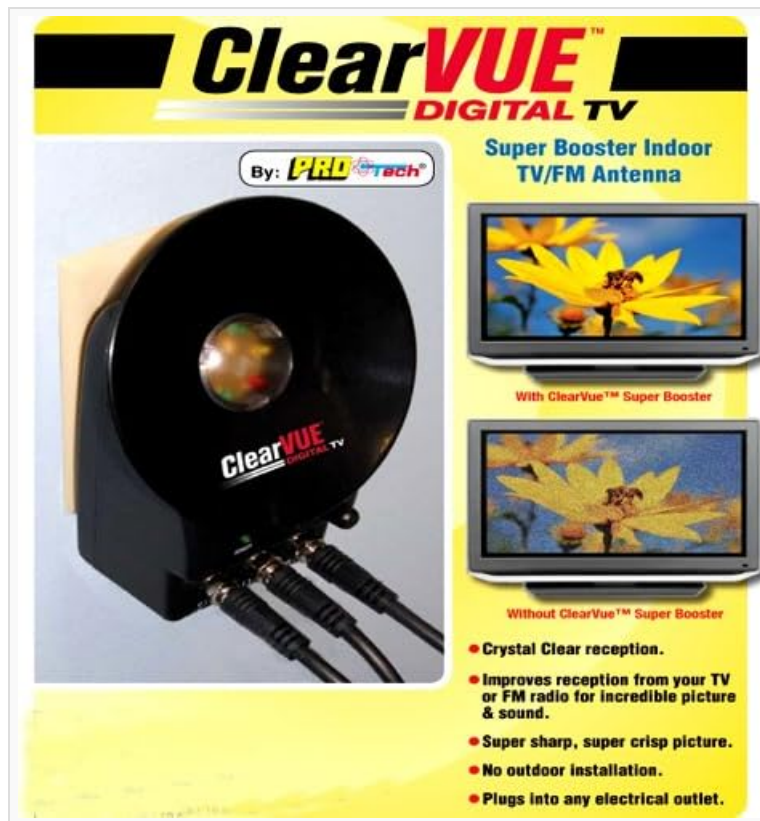

Image: ClearVUE Digital TV Super Booster connected and demonstrating improved signal quality. The booster unit is black, cylindrical, and plugs directly into a wall outlet, with three coaxial ports visible at the bottom for connections.

## 4. OPERATING INSTRUCTIONS

Once the ClearVUE Super Booster is set up, it operates automatically to amplify incoming signals.

- **Signal Enhancement:** The booster continuously works to improve the strength and clarity of TV and FM signals received by your antenna.
- **Optimal Placement:** For best results, experiment with the placement of your primary indoor antenna. Higher locations or positions closer to windows often yield better signal reception. After repositioning your antenna, always perform a new channel scan on your TV or receiver.
- **Channel Availability:** The number and quality of channels received can vary based on geographical location, terrain, building materials, and the strength of broadcast towers in your area.

## 5. MAINTENANCE

The ClearVUE Digital TV Super Booster requires minimal maintenance.

- **Cleaning:** To clean the device, gently wipe the exterior with a soft, dry cloth. Do not use liquid cleaners, aerosols, or abrasive materials.
- **Storage:** If the device will not be used for an extended period, unplug it from the electrical outlet and store it in a cool, dry place.
- **Environment:** Ensure the booster is kept away from moisture, extreme temperatures, and direct sunlight.

## 6. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No signal or poor reception after setup.	<ul style="list-style-type: none"> <li>◦ Booster not powered.</li> <li>◦ Incorrect cable connections.</li> <li>◦ Antenna poorly positioned.</li> <li>◦ TV/receiver not scanned for channels.</li> <li>◦ Weak broadcast signal in your area.</li> </ul>	<ul style="list-style-type: none"> <li>◦ Ensure the booster is securely plugged into a working electrical outlet.</li> <li>◦ Verify all coaxial cables are firmly connected to the correct ports on the booster and your TV/receiver.</li> <li>◦ Adjust the position of your indoor antenna. Try different locations (e.g., higher, near a window) and orientations.</li> <li>◦ Perform a new "Channel Scan" or "Auto Program" on your television or FM receiver after any adjustments.</li> <li>◦ Signal strength can vary. The booster amplifies existing signals but cannot create them where none exist.</li> </ul>
Picture or sound quality is still unsatisfactory.	<ul style="list-style-type: none"> <li>◦ Antenna placement not optimal.</li> <li>◦ Interference from other electronics.</li> <li>◦ Signal too weak to be effectively boosted.</li> </ul>	<ul style="list-style-type: none"> <li>◦ Continue to experiment with antenna placement and re-scan channels.</li> <li>◦ Move the booster and antenna away from other electronic devices that might cause interference (e.g., microwaves, cordless phones).</li> <li>◦ In some very remote areas or areas with significant obstructions, even a booster may not provide sufficient signal.</li> </ul>

## 7. SPECIFICATIONS

Feature	Detail
Model Number	GLO030804
ASIN	B003GVHZLW
Antenna Type Supported	Indoor TV/FM Antennas
Function	Digital TV and FM Signal Booster
