Lian Li T-LM15B-1

Lian Li T-LM15B-1 Top Panel Instruction Manual

Model: T-LM15B-1

1. INTRODUCTION

Thank you for choosing the Lian Li T-LM15B-1 Top Panel. This high-quality replacement part is designed to maintain the aesthetic and functional integrity of your Lian Li PC-60F or PC-7F Midi-Tower case. Crafted from brushed aluminum, it offers a seamless replacement for damaged or worn existing panels. This manual provides essential information for proper installation and care.

2. PRODUCT OVERVIEW

The Lian Li T-LM15B-1 is a genuine replacement top panel for specific Lian Li Midi-Tower PC cases. It features a sleek black brushed aluminum finish, ensuring durability and a premium look.

Figure 2.1: The Lian Li T-LM15B-1 top panel, showcasing its black brushed aluminum finish and cutouts for I/O ports and buttons.

Key Features:

- **Premium Material:** Constructed from high-quality brushed aluminum for durability and aesthetics.
- **Direct Replacement:** Designed to perfectly fit Lian Li PC-60F and PC-7F Midi-Tower cases.
- **Seamless Integration:** Matches the original design and finish of compatible Lian Li cases.

3. COMPATIBILITY

This top panel is specifically designed for the following Lian Li Midi-Tower models:

- Lian Li PC-60F
- Lian Li PC-7F

Important Compatibility Notes:

- *Not compatible with PC-60FN and PC-7FN models.*
- While it may fit other Lian Li Midi-Tower models, it is generally *not suitable for X-series, models with front doors, or built-up designs* (e.g., PC-P50, PC-B25F).
- **Side Panel Mounting:** Lian Li uses two different side panel mounting systems. This panel is designed for cases with *narrow, protruding hooks* on the upper inner sides of the side panels (typical for PC-60F/7F). Newer models (e.g., PC-60FN, PC-7FN) use wider brackets. Although the panel might physically fit, incompatibility with the side panel mounting system could hinder proper side panel attachment.
- **I/O Panel Compatibility:** Lian Li top panels come with different I/O panel cutouts (wide IO7 for four USB ports, narrow IO5 for two USB ports). Ensure the T-LM15B-1's I/O cutout matches your existing I/O panel. You may need to remount your I/O panel or acquire an alternative I/O panel if there is a mismatch.

4. SETUP AND INSTALLATION

Installation of the Lian Li T-LM15B-1 top panel is straightforward. Please follow these steps carefully:

1. Preparation:

- Ensure your computer is completely powered off and unplugged from the wall outlet.
- Place the PC case on a stable, flat surface.
- Gather any necessary tools, such as a Phillips head screwdriver, if required for your specific case model.

2. Remove Existing Top Panel:

- Carefully identify the fasteners or clips holding the current top panel in place. These are typically screws on the rear or sides, or clips that can be gently disengaged.
- If your I/O panel is integrated into the top panel, carefully disconnect any cables (USB, audio, power/reset switches, LEDs) from the motherboard or power supply before fully removing the panel. Note the connection points for reassembly.
- Gently lift and remove the old top panel.

3. Install New Top Panel:

- Align the Lian Li T-LM15B-1 top panel with the top frame of your PC case.
- If your I/O panel was separate, ensure it is properly seated in the new panel's cutout. If your I/O

panel was part of the old panel, transfer it to the new panel and reconnect all cables to their respective headers on the motherboard. Refer to your motherboard manual for correct pin assignments if unsure.

- Carefully lower the new panel into place, ensuring all mounting points align.
- Secure the panel using the original fasteners or by engaging the clips until it is firmly seated.

4. Final Check:

- Verify that the new top panel is securely attached and does not wobble.
- Ensure all cables (if disconnected) are properly reconnected.
- Replace side panels and any other removed components.

Always handle components with care to avoid damage. If you encounter any difficulties, consult a qualified technician.

5. MAINTENANCE

The Lian Li T-LM15B-1 top panel requires minimal maintenance to keep its appearance. Follow these guidelines:

- **Cleaning:** Use a soft, dry, lint-free cloth to wipe down the panel regularly. For stubborn smudges, slightly dampen the cloth with water or a mild, non-abrasive cleaner suitable for aluminum surfaces. Avoid harsh chemicals or abrasive materials that could scratch the brushed finish.
- **Dust Removal:** Periodically use compressed air to clear any dust accumulation in the vents or around the I/O port cutouts.
- **Avoid Impact:** Protect the panel from impacts or heavy objects that could dent or scratch the aluminum.

6. TROUBLESHOOTING

If you encounter issues after installing the top panel, consider the following:

- **Panel Does Not Fit Securely:**
 - Double-check the compatibility section (Section 3) to ensure your case model is supported.
 - Verify that the side panel mounting system of your case matches the panel's design (narrow hooks).
 - Ensure no cables or internal components are obstructing the panel's seating.
- **I/O Ports Not Functioning:**
 - Confirm that all I/O panel cables (USB, audio, power/reset, LEDs) are correctly and securely connected to the motherboard headers. Refer to your motherboard manual for correct pinouts.
 - Check if the I/O panel itself is properly seated within the new top panel's cutout.
 - Ensure the I/O panel type (IO5/IO7) is compatible with the cutout on the T-LM15B-1.
- **Scratches or Dents:**
 - The panel is made of aluminum and can be scratched or dented by sharp objects or impacts. Handle with care during installation and use. Minor scratches on brushed aluminum may sometimes be reduced with specialized aluminum polishing compounds, but this is not guaranteed.

For further assistance, please contact Lian Li customer support.

7. SPECIFICATIONS

Feature	Detail
Model Number	T-LM15B-1
Material	Brushed Aluminum
Color	Black
Compatibility	Lian Li PC-60F, PC-7F (Midi-Tower cases)
Package Dimensions	46.5 x 21 x 3.7 cm (18.3 x 8.3 x 1.5 inches)
Weight	600 grams (1.32 lbs)
ASIN	B003LUA7GI
