SETUP AND INSTALLATION

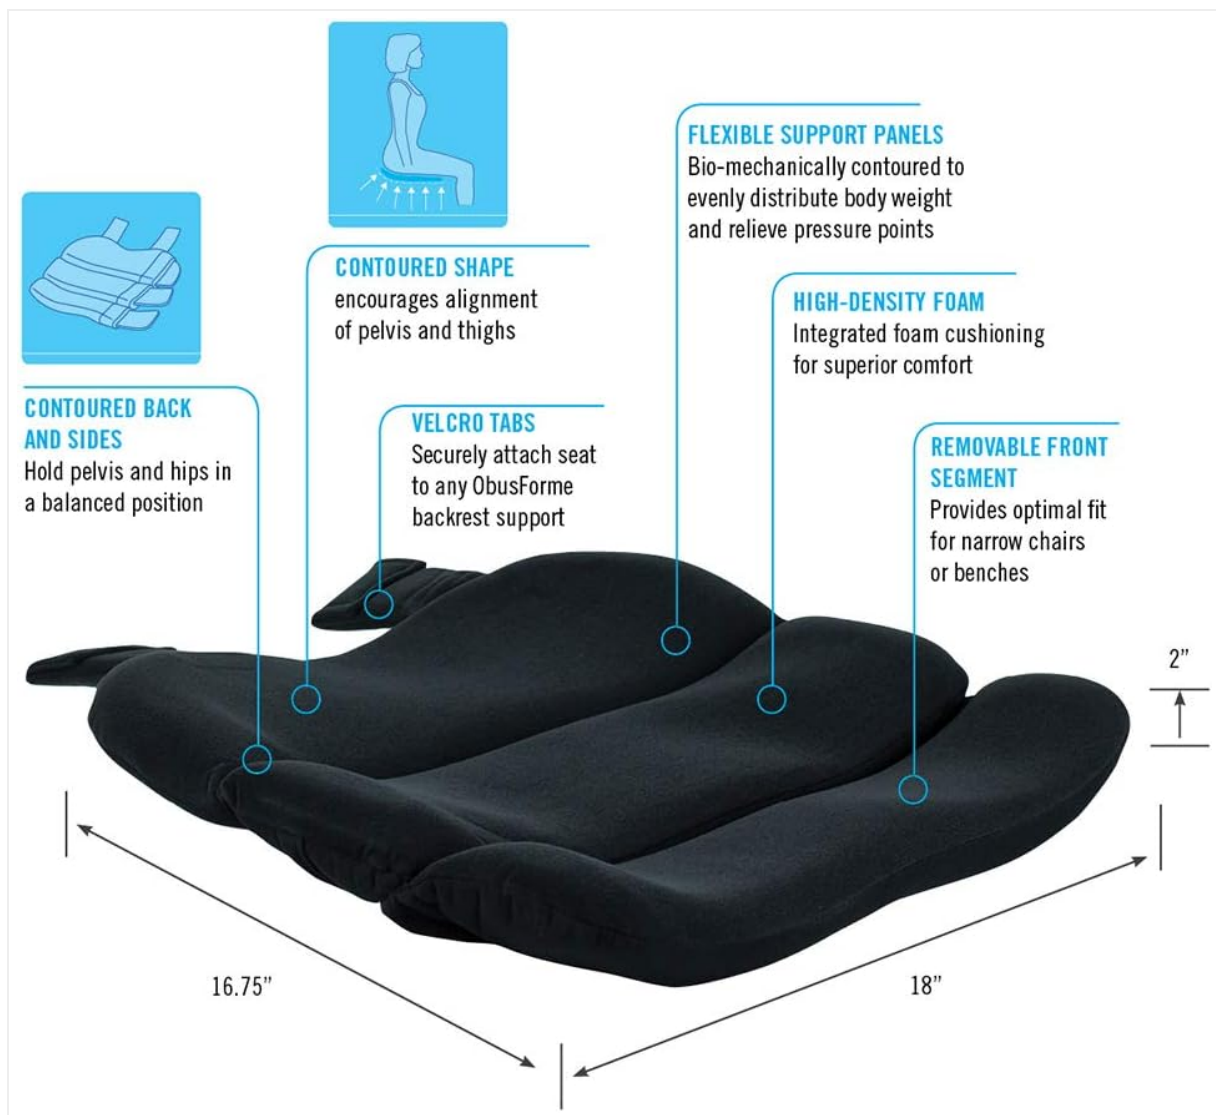

Placing the Cushion

Place the ObusForme Contoured Seat Cushion on any seat you intend to use, such as an office chair, dining chair, car seat, or wheelchair. Ensure the contoured sections are facing forward to properly support your thighs and pelvis.

The cushion features integrated Velcro straps on the back. If you are using it with an ObusForme backrest support, securely fasten these straps around the backrest to prevent the cushion from shifting during use.

Adjusting the Cushion

For narrower chairs or benches, the front section of the cushion can be removed. Locate the zipper along the front edge of the cushion and carefully unzip it to detach the front segment. This allows for a more customized fit and ensures the cushion adapts to various seating dimensions.

OPERATING INSTRUCTIONS

Once the cushion is properly placed and adjusted to your seating, simply sit on it. The contoured design will naturally position your pelvis and thighs, distributing your body weight evenly. This ergonomic support helps to alleviate pressure points and maintain proper spinal alignment, contributing to enhanced comfort during prolonged sitting periods.
