Sangean CL-100

Sangean CL-100 NOAA Weather Alert Radio

Model: CL-100

INTRODUCTION

The Sangean CL-100 is a Public Alert certified weather radio designed to keep you informed about severe weather advisories, watches, warning conditions, civil emergencies, hazards, and evacuation details. It receives all NOAA reports, providing crucial time to react before dangerous situations. Beyond its primary alert function, the CL-100 also features AM/FM-RBDS radio capabilities and serves as a versatile alarm clock.

SETUP

Powering the Device

The CL-100 can be powered using the included AC adapter or 4 AA batteries (not included) for portable operation and backup. For optimal performance and to retain settings during power outages, it is recommended to install batteries even when using the AC adapter.

- **AC Adapter:** Connect the DC 6V/400mA AC adapter to the DC IN port on the rear of the unit and plug it into a standard wall outlet.
- **Battery Installation:** Open the battery compartment cover on the bottom of the unit. Insert 4 AA (1.5V) batteries, ensuring correct polarity. Close the battery compartment cover securely.

Antenna Setup

The CL-100 features a built-in telescopic antenna for FM and Weather band reception, and an internal ferrite bar antenna for AM reception. For improved reception, especially in remote areas, external antennas can be connected.

- **Telescopic Antenna:** Extend the telescopic antenna for optimal FM and Weather band reception. Adjust its position for the best signal.
- **External FM/Weather Antenna:** Connect an optional external FM/Weather antenna to the WX/FM EXT. ANT. port for enhanced reception.
- **External AM Antenna:** Connect an optional external AM antenna to the AM-EXT. terminals for improved AM reception.
- **Ground Terminal:** For optimal performance and safety, connect a ground wire to the GND terminal, especially when using external antennas.

Initial Configuration (Time, Date, FIPS Codes)

Upon first power-up or after a complete power loss without backup batteries, you will need to set the time, date, and configure your Specific Area Message Encoding (S.A.M.E.) county codes.

1. **Setting Time and Date:** Access the MENU and navigate to the Clock settings. Use the TUNE/SELECT knob to adjust the time, date, and year. The radio also supports automatic time setting via RBDS CT (Clock Time) if available from your FM station.
2. **Entering S.A.M.E. County Codes:** The CL-100 allows you to store up to 25 S.A.M.E. county codes. These codes specify the geographic areas for which you want to receive alerts.

- Find your local S.A.M.E. codes on the NOAA website. These are typically 6-digit codes.
- Navigate to the "County Code" option in the MENU.
- Select "Single" or "Multiple" to add codes. When entering a 5-digit code into a 6-digit field, prepend a '0' (e.g., 0XXXXX).
- Confirm each code to save it.

3. **Configuring Alert Types:** The radio allows you to enable or disable specific alert types (e.g., Avalanche Watch, Child Abduction Emergency, Coastal Flood Warning, Dust Storm Warning, Evacuation Watch, Flash Flood Warning, Flood Watch, Flood Warning, High Wind Watch, Hurricane Statement, Iceberg Warning, National Audio Test, National Silent Test, Power Outage, Practice Demo, Severe Thunderstorm Watch, Severe Thunderstorm Warning, Special Weather Statement, Tsunami Watch, Tsunami Warning, Volcano Warning, Winter Storm Warning). Access the "Defeat Siren" option in the MENU to customize which alerts trigger an audible siren.

OPERATING INSTRUCTIONS

Radio Operation (AM/FM/Weather)

The CL-100 offers reception for AM, FM, and NOAA Weather bands.

- **Band Selection:** Press the BAND button to cycle through AM, FM, and Weather bands.
- **Tuning:** Use the TUNE/SELECT knob to manually tune to desired frequencies. The radio also features an auto-station-search function to find strong signals.
- **Station Presets:** Store up to 5 AM and 5 FM stations using the preset buttons (1-5) for quick access.
- **RBDS (Radio Broadcast Data System):** For FM stations broadcasting RBDS, the CL-100 can display information such as Program Service (PS) name, Radio Text (RT) messages, Clock Time (CT), and Date.

Alarm Clock Functions

The CL-100 includes dual alarms, a snooze function, and a sleep timer.

- **Dual Alarms:** Set two independent alarm times. You can choose to wake up to either the AM/FM radio or a Human Wake-up System (HWS) buzzer alarm.
- **Snooze:** Press the SNOOZE button to temporarily silence the alarm.
- **Sleep Timer:** Configure the radio to automatically turn off after a set period (15, 30, 45, 60, 90, or 120 minutes).

Audio and Display Adjustments

- **Volume Control:** Adjust the volume using the VOL-/VOL+ buttons.
- **Bass & Treble:** Fine-tune the audio output using the bass and treble controls available in the MENU.
- **LCD Display:** The graphic LCM (128 x 64 pixels) LCD module offers excellent display quality. Adjust dimmer and contrast controls for optimal viewing in various lighting conditions.

External Connectivity

- **Auxiliary Input:** Connect external audio devices (e.g., MP3 player, CD player) to the 3.5mm AUX IN socket on the rear.
- **External Alert Output:** The EXT. ALERT output jack allows connection to external accessories such as flashing lights or sirens for hearing/visually impaired users.
- **Headphone Output:** Use the 3.5mm headphone jack for private listening.

Video: This video addresses frequently asked questions about the Sangean CL-100 radio, including details on FIPS codes, firmware, and weekly/monthly test alerts.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the radio's exterior. Avoid abrasive cleaners or solvents.
- **Battery Replacement:** Replace batteries when the low battery indicator appears on the display or when the radio fails to power on without the AC adapter. Ensure to use 4 new AA batteries of the same type.
- **Storage:** If storing the radio for an extended period, remove the batteries to prevent leakage and damage.

TROUBLESHOOTING

- **No Power:** Check AC adapter connection. Ensure batteries are correctly installed and not depleted.
- **Poor Reception:** Extend and adjust the telescopic antenna. Try connecting an external antenna. For AM, rotate the radio for better signal.
- **No Alerts:** Verify S.A.M.E. county codes are correctly entered. Ensure the weather band is active and alert types are enabled in the "Defeat Siren" menu. Check for weekly/monthly test alerts to confirm functionality.
- **Incorrect Time/Date:** Manually set the time and date via the MENU or ensure RBDS CT is enabled and receiving a signal.

SPECIFICATIONS

Product Dimensions	7.16 x 5.19 x 2.5 inches
Item Weight	1.1 pounds
Item Model Number	CL-100
Batteries	4 AA batteries required
Manufacturer	Sangean
Brand	Sangean
Color	Black
Special Feature	Lightweight
Connectivity Technology	Auxiliary
Tuner Technology	AM, FM
Power Source	Battery Powered, Corded Electric
Radio Bands Supported	AM, FM

Image: Angled view of the Sangean CL-100 radio with product dimensions (7.16\"L x 5.19\"W x 2.5\"H) overlaid.

WHAT'S IN THE BOX

- Deluxe Tabletop AM/FM Clock Radio with S.A.M.E. Weather Alert
- AC Power Adapter
- Instruction Manual

WARRANTY AND SUPPORT

For warranty information, technical support, or service inquiries, please refer to the warranty card included in your product packaging or visit the official Sangean website. Keep your purchase receipt as proof of purchase.
