1. PRODUCT OVERVIEW

This document provides instructions for the Silit Sicomatic Econtrol Pressure Cooker Aroma Cap, a genuine spare part designed to maintain the optimal performance of your Silit pressure cooker. The aroma cap is a crucial component for ensuring a proper seal and regulating pressure during cooking, preserving the natural flavors of your food.

This set includes three (3) aroma sealing caps, providing convenient replacements for extended use.

2. SAFETY INSTRUCTIONS

- Always ensure the pressure cooker is completely depressurized and cool before attempting to remove or install the aroma cap.
- Use only genuine Silit spare parts to ensure compatibility and safe operation.
- Inspect the aroma cap for any signs of wear, damage, or cracks before each use. A damaged cap can compromise the pressure seal.
- Keep out of reach of children.
- Refer to your main Silit Sicomatic Econtrol pressure cooker manual for comprehensive safety guidelines.

3. INSTALLATION (REPLACEMENT)

The aroma cap is designed for easy replacement. Follow these steps to install a new aroma cap:

1. **Prepare the Lid:** Ensure the pressure cooker lid is clean and dry.
2. **Remove Old Cap (if applicable):** Gently pull or twist the old aroma cap from its housing on the lid. If it is stuck, apply slight pressure evenly.
3. **Position New Cap:** Align the new aroma cap with the opening on the pressure cooker lid.
4. **Secure the Cap:** Press the new aroma cap firmly into place until it sits securely and flush with the lid surface. Ensure there are no gaps.
5. **Verify Installation:** Lightly tug on the cap to confirm it is properly seated and will not dislodge during operation.

4. OPERATION

The aroma cap plays a vital role in the pressure cooking process by contributing to the airtight seal of the lid. Once installed, it works in conjunction with other lid components to build and maintain pressure efficiently.

- Ensure the aroma cap is correctly installed before closing the pressure cooker lid.
- During cooking, the aroma cap helps prevent steam leakage, which is essential for achieving and maintaining the desired cooking pressure.
- A properly functioning aroma cap contributes to the efficient cooking and preservation of food aromas.

5. MAINTENANCE AND CLEANING

Regular cleaning and inspection of the aroma cap are essential for its longevity and the safe operation of your pressure cooker.

- **Cleaning:** The aroma cap is made of high-quality plastic and is dishwasher safe. For best results, remove it from the lid before placing it in the dishwasher. Alternatively, wash it by hand with warm soapy water and rinse thoroughly.
- **Inspection:** Periodically check the aroma cap for any signs of wear, discoloration, hardening, or damage. Replace the cap if any of these issues are observed to ensure optimal sealing.
- **Storage:** Store spare aroma caps in a clean, dry place away from direct sunlight and extreme temperatures.

6. TROUBLESHOOTING

If you experience issues with your Silit Sicomatic Econtrol pressure cooker, the aroma cap might be a contributing factor. Here are some common issues and solutions:

Problem	Possible Cause	Solution
Steam leakage from the lid during cooking.	Aroma cap not properly seated or damaged.	Ensure the aroma cap is firmly pressed into its slot. Inspect for damage and replace if necessary.
Pressure not building up in the cooker.	Aroma cap seal compromised or missing.	Check if the aroma cap is present and correctly installed. Replace if it appears worn or damaged.
Aroma cap feels loose after installation.	Incorrect installation or cap is worn.	Re-install the cap, ensuring it clicks into place. If it remains loose, the cap may be worn and requires replacement.

If troubleshooting steps do not resolve the issue, please contact Silit customer support.

7. SPECIFICATIONS

Brand: Silit

Model Number: 21.5026.4545

Part Number: 21.5026.4545

Material: High-quality Plastic

Color: Gray

Unit Count: 3.0 Count (Aroma Sealing Caps)

Item Type Name: "Sicomatic" Aroma Sealing Cap

Is Dishwasher Safe: Yes

Special Feature: Aroma Resistant

Item Weight: Approximately 0.01 Kilograms (for the set)

8. WARRANTY AND SUPPORT

Warranty Information

This aroma cap is a spare part for Silit Sicomatic Econtrol pressure cookers. Silit offers a 30-year guarantee on the inner and outer ceramic Silargan surface of the cookware itself, when used as intended. This specific guarantee applies to the main pressure cooker body and not directly to plastic spare parts like the aroma cap. For specific warranty details regarding spare parts, please refer to the documentation included with your original pressure cooker or contact Silit customer service.

Customer Support

For further assistance, technical support, or to inquire about other Silit products and spare parts, please visit the official Silit website or contact their customer service department. Contact information can typically be found on the Silit brand website or in the original product packaging.
