## Armitron 20/4664BLSV

# Armitron Toulon 43 Multifunction Gents Watch 20/4664BLSV User Manual

Model: 20/4664BLSV

## INTRODUCTION

---

This manual provides detailed instructions for the proper setup, operation, and maintenance of your Armitron Toulon 43 Multifunction Gents Watch, model 20/4664BLSV. Please read this manual thoroughly to ensure optimal performance and longevity of your timepiece.

## PRODUCT OVERVIEW

---

The Armitron Toulon 43 is a sophisticated multifunction watch designed for daily wear. It features a durable stainless steel construction and a precise analog movement.

### Key Features

- Multifunction sub-dials for day, date, and 24-hour display.
- Stainless steel case and adjustable bracelet.
- One-touch two-button fold-over buckle with safety clasp.
- Water resistance (refer to specifications for details).

### Watch Components

Refer to the image below for an illustration of the watch components.

Image: Front view of the Armitron Toulon 43 Multifunction Gents Watch. The watch features a blue dial with three sub-dials for day, date, and 24-hour time, silver-tone hour markers, and hands. The bezel is silver-tone with black Arabic numerals at 5-minute intervals. The case and bracelet are made of stainless steel.

## Setting Time and Date

1. Pull the crown (located on the right side of the watch case) out to position 2.
2. Rotate the crown clockwise or counter-clockwise to set the hour and minute hands. Ensure the 24-hour sub-dial also aligns correctly with AM/PM.
3. Push the crown back to position 1.
4. To set the day and date sub-dials, pull the crown out to position 1.
5. Rotate the crown to adjust the day and date. If the crown does not adjust these, look for small recessed pushers on the side of the case and use a pointed tool to press them.
6. Once set, push the crown fully back into position 0 to engage the movement and ensure water resistance.

Image: Side view of the Armitron Toulon 43 Multifunction Gents Watch, highlighting the crown used for setting the time and date.

## Bracelet Adjustment

The stainless steel bracelet can be adjusted for a comfortable fit. This typically involves removing links. It is recommended to have this procedure performed by a qualified jeweler or watch technician to prevent damage.

## OPERATING INSTRUCTIONS

---

### Reading the Multifunction Sub-dials

- The sub-dial at the 9 o'clock position indicates the day of the week.
- The sub-dial at the 3 o'clock position indicates the date.
- The sub-dial at the 6 o'clock position indicates the 24-hour time.

### Water Resistance

Your Armitron Toulon 43 watch is designed with a certain level of water resistance. Refer to the chart below for specific guidelines. Always ensure the crown is fully pushed in to maintain water resistance.

WATER RESISTANT CHART	
 <p>NOT WATER RESISTANT</p>	<p><b>NOT WATER RESISTANT</b></p>
 <p>ACCIDENTAL SPLASHES</p>	<p><b>WATER RESISTANT TO 30M (100FT):</b> In general, withstands splashes or brief immersion in water, but not suitable for swimming or bathing</p>
 <p>SWIMMING</p>	<p><b>WATER RESISTANT TO 50M (165FT):</b> In general, suitable for short periods of recreational swimming, but not diving or snorkeling</p>
 <p>SNORKELING</p>	<p><b>WATER RESISTANT TO 100 M (330 FT):</b> In general, suitable for swimming and snorkeling, but not scuba diving</p>

## MAINTENANCE AND CARE

---

- Clean your watch regularly with a soft, damp cloth. For stainless steel, a mild soap solution can be used, followed by thorough rinsing and drying.
- Avoid exposing the watch to extreme temperatures, direct sunlight for prolonged periods, or strong magnetic fields.
- Do not operate the crown or pushers while the watch is submerged in water.
- If the watch battery needs replacement, it is recommended to have it done by a professional watchmaker to ensure proper sealing and water resistance.
- Avoid contact with chemicals such as solvents, detergents, perfumes, and cosmetics, as these can damage the case, bracelet, or seals.

## TROUBLESHOOTING

---

### Watch Not Running

- Check if the crown is fully pushed in. If it is pulled out, the watch will not run.
- The battery may need replacement. Consult a professional watchmaker.

### Incorrect Time/Date Display

- Re-set the time and date according to the "Setting Time and Date" section.
- Ensure the crown is fully pushed in after setting.

### Condensation Inside the Crystal

- This indicates a loss of water resistance. Take the watch to a professional watchmaker immediately

to prevent further damage.

## SPECIFICATIONS

---

Feature	Detail
Model Number	20/4664BLSV
Case Diameter	41.6 Millimetres
