Logitech M125 Corded Mouse User Manual

Model: 910-001836

1. INTRODUCTION

The Logitech M125 Corded Mouse is a reliable and compact optical mouse designed for comfortable and precise navigation. Featuring a retractable cord, it is ideal for both desktop and laptop users seeking a simple, plug-and-play solution. This manual will guide you through the installation, operation, and maintenance of your M125 mouse.

2. SETUP

Setting up your Logitech M125 mouse is quick and easy, requiring no additional software installation.

1. **Unpack the Mouse:** Carefully remove the mouse from its packaging.
2. **Extend the USB Cable:** Gently pull the USB cable from the mouse until it reaches the desired length. The retractable mechanism will lock it in place.

- 3. **Connect to Your Computer:** Plug the USB connector into an available USB port on your computer (desktop or laptop).
- 4. **Driver Installation:** Your operating system (Windows, macOS, Linux) will automatically detect and install the necessary drivers. This process usually takes a few seconds.
- 5. **Ready for Use:** Once the drivers are installed, your mouse is ready for immediate use.

3. OPERATING THE MOUSE

The Logitech M125 mouse features standard controls for intuitive navigation.

- **Left Button:** Used for primary clicks, selecting items, and opening files.
- **Right Button:** Used for secondary clicks, typically opening context menus.
- **Scroll Wheel:** Roll the wheel up or down to scroll through documents and web pages. The scroll wheel can also be pressed down for a middle-click function, which often opens links in new tabs or enables auto-scrolling.
- **Optical Tracking:** The mouse uses high-definition optical tracking for smooth and precise cursor control on various surfaces. For optimal performance, use on a mouse pad or a non-reflective, uniform surface.

4. MAINTENANCE

Proper care will extend the life and performance of your Logitech M125 mouse.

- **Cleaning:** Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to wipe the surface of the mouse. Avoid harsh chemicals or abrasive materials. For the optical sensor, use a dry cotton swab to gently remove any dust or debris.
- **Cable Management:** When storing or transporting the mouse, gently retract the USB cable. Avoid pulling the cable forcefully or allowing it to become tangled, as this can damage the internal mechanism or the cable itself.
- **Storage:** Store the mouse in a clean, dry environment away from extreme temperatures and direct sunlight.

5. TROUBLESHOOTING

If you encounter issues with your Logitech M125 mouse, try the following solutions:

Problem	Solution
Mouse not responding	<ul style="list-style-type: none">• Ensure the USB cable is securely plugged into a working USB port.• Try plugging the mouse into a different USB port on your computer.• Restart your computer.
Erratic cursor movement	<ul style="list-style-type: none">• Clean the optical sensor on the bottom of the mouse with a dry, soft cloth.• Ensure you are using the mouse on a clean, uniform, non-reflective surface. Avoid glass or highly reflective surfaces.• Check for any physical obstructions around the sensor.

Problem	Solution
Scroll wheel not working	<ul style="list-style-type: none">• Gently clean around the scroll wheel to remove any dust or debris.• Restart your computer.
Mouse not detected after driver installation	<ul style="list-style-type: none">• Check your computer's Device Manager (Windows) or System Information (macOS) to see if the mouse is listed.• If listed with an error, try updating or reinstalling the driver through the operating system.• Visit the Logitech support website for specific driver downloads if necessary.
