Ardes ARD.5020

Ardes Stirocal Anti-Limescale Bottle

MODEL: ARD.5020

Introduction

The Ardes Stirocal Anti-Limescale Bottle is designed to treat water for use in steam irons, preventing the buildup of limescale. This product helps to prolong the life of your iron and maintain its optimal performance by neutralizing the effects of hard water.

Safety Information

Please read all instructions carefully before using the Ardes Stirocal bottle. Keep this product out of reach of children and pets. Do not ingest the liquid. This product is intended for treating water for steam irons only. Statements regarding dietary supplements have not been evaluated by the FDA and are not intended to diagnose, treat, cure, or prevent any disease or health condition.

Setup

The Ardes Stirocal bottle is ready for use directly out of the packaging. It does not require any initial setup or chemical additives. Simply fill the bottle with tap water. The internal magnetic catalyst in the cap will begin to treat the water as it passes through.

Image: The Ardes Stirocal bottle, highlighting its maximum capacity of 1080 ml and unlimited duration of effectiveness.

Operating Instructions

1. **Fill the Stirocal Bottle:** Open the cap of the Ardes Stirocal bottle and fill it with regular tap water.
2. **Treat the Water:** Close the cap. The magnetic catalyst within the cap will treat the water as it is poured out.
3. **Fill Your Iron:** Carefully pour the treated water from the Stirocal bottle directly into the water reservoir of your steam iron. Ensure not to overfill your iron.
4. **Iron as Usual:** Proceed with your ironing tasks as you normally would. The treated water will help prevent limescale buildup in your iron's steam vents and internal components.

**FUNZIONA GRAZIE AL MAGNETE
CON CATALIZZATORE PRESENTE
NEL TAPPO**

Image: A close-up of a steam iron emitting steam, illustrating how the product works thanks to the magnet with a catalyst in the cap to prevent limescale.

Maintenance

The Ardes Stirocal bottle requires minimal maintenance. It is designed for unlimited duration of effectiveness, meaning the magnetic catalyst does not wear out. Simply keep the bottle clean and store it in a cool, dry place when not in use. No chemical additives are required for its function.

Troubleshooting

- **Limescale still present:** Ensure you are consistently using water treated by the Ardes Stirocal bottle. For heavily scaled irons, an initial descaling might be necessary before regular use of treated water for prevention. The product's effectiveness relies on the magnetic treatment of water, which helps prevent new scale formation.
- **Filter/Cap issues:** If the cap or internal components seem loose, ensure they are securely re-attached. The magnetic element is integrated into the cap.

Specifications

Brand	Ardes
Model Number	ARD.5020
Product Dimensions	3.5 x 9.5 x 2.9 inches (8.9 x 24.1 x 7.4 cm)
Item Weight	2.82 ounces (0.08 Kilograms)
Item Volume	1080 Milliliters
Contains Liquid Contents	Yes
Date First Available	September 27, 2017
