

Campania International FT-102-AS

Campania International FT-102-AS Girona Fountain User Manual

Model: FT-102-AS | Brand: Campania International

1. PRODUCT OVERVIEW

The Campania International FT-102-AS Girona Fountain in Alpine Stone is a beautifully designed outdoor water feature. Crafted from durable stone, this fountain is intended to provide a serene and aesthetically pleasing addition to your garden or patio space. Its design allows for continuous water circulation, creating a calming ambiance. This manual provides essential information for the proper setup, operation, and maintenance of your Girona Fountain to ensure its longevity and optimal performance.

Figure 1: The Girona Fountain in Alpine Stone.

2. SETUP INSTRUCTIONS

Setting up your Girona Fountain is a straightforward process. The fountain typically arrives in a few main components that fit together easily.

2.1 Unpacking and Component Identification

- Carefully remove all components from the packaging.
- Identify the main basin, the central insert (top piece), and the water pump.

Figure 2: Detail of the fountain's textured exterior.

2.2 Assembly Steps

1. **Placement:** Choose a level, stable surface for your fountain. Ensure it is near a suitable outdoor electrical outlet for the pump.

- Pump Connection:** Place the water pump inside the main basin. Connect the pump's tubing to the central pipe that extends from the basin's base.
- Insert Placement:** Carefully place the central insert (top piece) onto the main basin, ensuring the central pipe from the pump aligns with the opening in the insert. The insert should sit securely on top of the basin.
- Filling:** Fill the fountain with clean water. Ensure the water level is sufficient to fully submerge the pump and allow for proper circulation.
- Power Connection:** Plug the pump into the electrical outlet. The fountain should begin circulating water immediately.

3. OPERATING INSTRUCTIONS

Once assembled and filled, operating your Girona Fountain is simple. The pump continuously circulates water, creating the desired water flow.

3.1 Daily Operation

- Ensure the fountain is plugged into a working electrical outlet.
- Verify that the water level is adequate to keep the pump fully submerged. Low water levels can damage the pump.
- Periodically check for any debris that might obstruct water flow.

4. MAINTENANCE

Regular maintenance will help preserve the beauty and functionality of your Campania International Girona Fountain.

4.1 Cleaning

Surfaces of the fountain can be cleaned with a soft brush and mild detergent. Rinse thoroughly with clean water after cleaning to remove any detergent residue.

4.2 Water Management

- Regularly check and replenish the water level to ensure the pump remains submerged.
- Clean the pump filter periodically to prevent clogs and maintain optimal water flow. Refer to your pump's specific instructions for filter cleaning.
- Change the water in the fountain regularly, especially if it becomes cloudy or develops algae.

4.3 Winterization

To prevent damage from freezing during winter months, the fountain should be brought inside to a shed or garage. If the fountain cannot be brought indoors, it should be covered to prevent accumulation of ice and snow. Ensure the fountain is completely drained of water before winter storage or covering.

5. TROUBLESHOOTING

If you encounter issues with your fountain, try these common troubleshooting steps:

- **No Water Flow:**

- Check if the pump is plugged in and the power outlet is working.
- Ensure the water level is sufficient to cover the pump.
- Inspect the pump and tubing for clogs or kinks. Clean the pump filter.

- **Low Water Flow:**

- Check for debris in the pump or tubing.
- Ensure the water level is adequate.
- Clean the pump filter.

- **Water Leaks:**

- Verify all connections are secure and tight.
- Check the basin for cracks or damage.

If problems persist after attempting these steps, please contact customer support.

6. SPECIFICATIONS

Feature	Detail
Model Number	FT-102-AS
Color	Alpine Stone
Material	Stone
Product Dimensions	48"L x 48"W x 17"H
Item Weight	318 Pounds
Power Source	Corded Electric
Manufacturer	Campania International
UPC	615976194921
Country of Origin	USA

7. WARRANTY AND SUPPORT

For information regarding warranty coverage or to obtain technical support, please contact Campania International customer service directly. Refer to the product packaging or the official Campania International website for the most current contact details.
