## Janome 2212

# Janome 2212 Sewing Machine Instruction Manual

Model: 2212 | Brand: Janome

## PRODUCT OVERVIEW

The Janome 2212 is a quality entry-level sewing machine designed for ease of use and durability. It features a robust mechanical design suitable for both beginners and experienced sewists needing a reliable secondary machine. Its intuitive controls and sturdy construction make it an excellent choice for a wide range of sewing projects.

Figure 1: Front view of the Janome 2212 Sewing Machine.

### Key Features:

- **12 Built-in Stitches:** Offers a variety of stitch patterns for different sewing needs.
- **Four-Step Buttonhole:** Simplifies the process of creating buttonholes.
- **Snap-on Presser Feet:** Allows for quick and easy changing of presser feet.
- **5-Piece Feed Dog:** Ensures smooth fabric feeding for consistent stitching.
- **Free Arm:** Ideal for sewing cuffs, sleeves, and other small, circular items.
- **Drop Feed:** Enables free-motion sewing and darning.
- **Push-Pull Bobbin Winder:** Convenient bobbin winding mechanism.
- **Extra High Presser Foot Lift:** Accommodates thicker fabrics and multiple layers.
- **Front-Loading Vertical Oscillating Hook Bobbin:** A durable and reliable bobbin system.
- **Two Retractable and Vertical Spool Pins:** Provides flexibility for thread spools.
- **Stitch Selection Dial:** Easy-to-use dial for selecting desired stitch patterns.

### SETUP

Before operating your Janome 2212 sewing machine, ensure it is properly set up. This includes connecting the foot pedal, threading the machine, and winding the bobbin.

### 1. Connecting the Foot Pedal:

Locate the power cord and foot pedal. Plug the foot pedal into the designated port on the machine, typically on the right side or back. Then, plug the machine's power cord into a suitable electrical outlet.

### 2. Winding the Bobbin:

The Janome 2212 features a convenient push-pull bobbin winder. Place an empty bobbin onto the bobbin winder spindle. Guide the thread from your spool through the tension disc for bobbin winding and then around the bobbin. Push the spindle to the right to engage the winder, and gently press the foot pedal to begin winding. Stop when the bobbin is full, then push the spindle back to the left and trim the thread.

Figure 2: Spool pins and bobbin winder on the Janome 2212.

### 3. Threading the Machine:

Follow the numbered threading path indicated on the machine. Ensure the presser foot is raised and the needle is in its highest position. Guide the thread through the upper tension discs, take-up lever, and down to the needle. Finally, thread the needle from front to back. Insert the wound bobbin into the front-loading vertical oscillating hook bobbin case, ensuring the thread is correctly positioned in the tension spring.

## OPERATING INSTRUCTIONS

The Janome 2212 is designed for straightforward operation, allowing you to focus on your creative projects.

## 1. Stitch Selection:

Use the "Selector" dial on the front of the machine to choose your desired stitch pattern. The machine offers 12 built-in stitches, including utility stitches like straight stitch and zigzag, as well as decorative stitches and a four-step buttonhole.

## 2. Stitch Length and Width Adjustment:

Adjust the stitch length using the "Length" dial. For most utility stitches, a length between 2 and 3 is common. The machine also allows for stitch width adjustment, which is particularly useful for zigzag and decorative stitches.

## 3. Reverse Sewing:

To secure your stitches at the beginning and end of a seam, use the reverse lever. Press and hold the lever while sewing to stitch backward. Release the lever to resume forward stitching.

## 4. Fabric Handling:

Place your fabric under the presser foot and lower the foot. Gently press the foot pedal to begin sewing. Guide the fabric smoothly with your hands, but do not push or pull it, as this can affect stitch quality and potentially damage the needle.

## MAINTENANCE

---

Regular maintenance ensures the longevity and optimal performance of your Janome 2212 sewing machine.

### 1. Cleaning:

Periodically remove the needle plate and bobbin case to clean out lint and thread buildup from the feed dogs and hook area. Use a small brush or a lint-free cloth. Avoid using compressed air, as it can push debris further into the machine.

### 2. Oiling:

Refer to your machine's specific oiling points in the detailed manual. Generally, a few drops of high-quality sewing machine oil should be applied to the moving metal parts in the bobbin area and other designated points to ensure smooth operation.

### 3. Needle Replacement:

Replace your needle regularly, especially after 8-10 hours of sewing or if it becomes bent or dull. A fresh needle prevents skipped stitches and fabric damage.

## TROUBLESHOOTING

---

Here are some common issues and their potential solutions for your Janome 2212:

- **Skipped Stitches:** Ensure the needle is inserted correctly and is not bent or dull. Check that the machine is properly threaded.
- **Thread Breaking:** Verify correct threading and tension settings. Use good quality thread. Check for burrs on the needle plate or bobbin case (the Janome 2212's metal components are less prone to this).
- **Fabric Jamming:** Do not force fabric through the machine. Ensure the presser foot is lowered before sewing. Clean out any lint buildup.
- **Noisy Operation:** Clean and oil the machine as per maintenance instructions. Ensure all covers are properly closed.
- **Needle Hits:** If the needle hits metal parts like the hook or needle plate, it can cause burrs. These can often be

polished out, thanks to the durable steel components of the Janome 2212. Always replace a bent needle immediately.

## SPECIFICATIONS

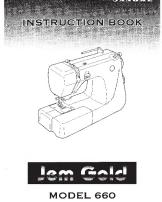

Feature	Detail
Product Dimensions	17 x 9 x 13.5 inches (9"D x 17"W x 13.5"H)
Item Weight	12 pounds
Manufacturer	Janome
Item Model Number	2212
Color	White
UPC	732212272790
Built-in Stitches	12
Buttonhole Type	4-step
Bobbin Type	Front-loading vertical oscillating hook (Class 15)
