

## D-Link DHP-307AV

# D-Link Powerline AV Network Adapter Kit (DHP-307AV) Instruction Manual

## 1. INTRODUCTION AND OVERVIEW

The D-Link Powerline AV Network Adapter Kit (DHP-307AV) utilizes HomePlug AV technology to transform your home's existing electrical wiring into a high-speed network. This kit provides a convenient solution for extending network connectivity to areas where wireless signals may be weak or unavailable, without the need for new cabling.

The DHP-307AV kit includes two DHP-306AV Powerline AV network adapters. By connecting one adapter to your router and plugging it into a power outlet, you can establish a network connection through any other power outlet within the same electrical system in your home. The DHP-306AV adapters also feature a security push button for secure data transmission.

*This image displays the retail packaging for the D-Link Powerline AV Network Starter Kit, model DHP-307AV. The box shows two Powerline adapters and highlights key features such as HomePlug AV technology, easy setup, and up to 200Mbps speed.*

## 2. PACKAGE CONTENTS

Verify that your D-Link Powerline AV Network Adapter Kit (DHP-307AV) package contains the following items:

- 2 x PowerLine AV Ethernet Adapters (DHP-306AV)
- 2 x Ethernet Cables
- CD-ROM with PowerLine Utility and Product Documentation

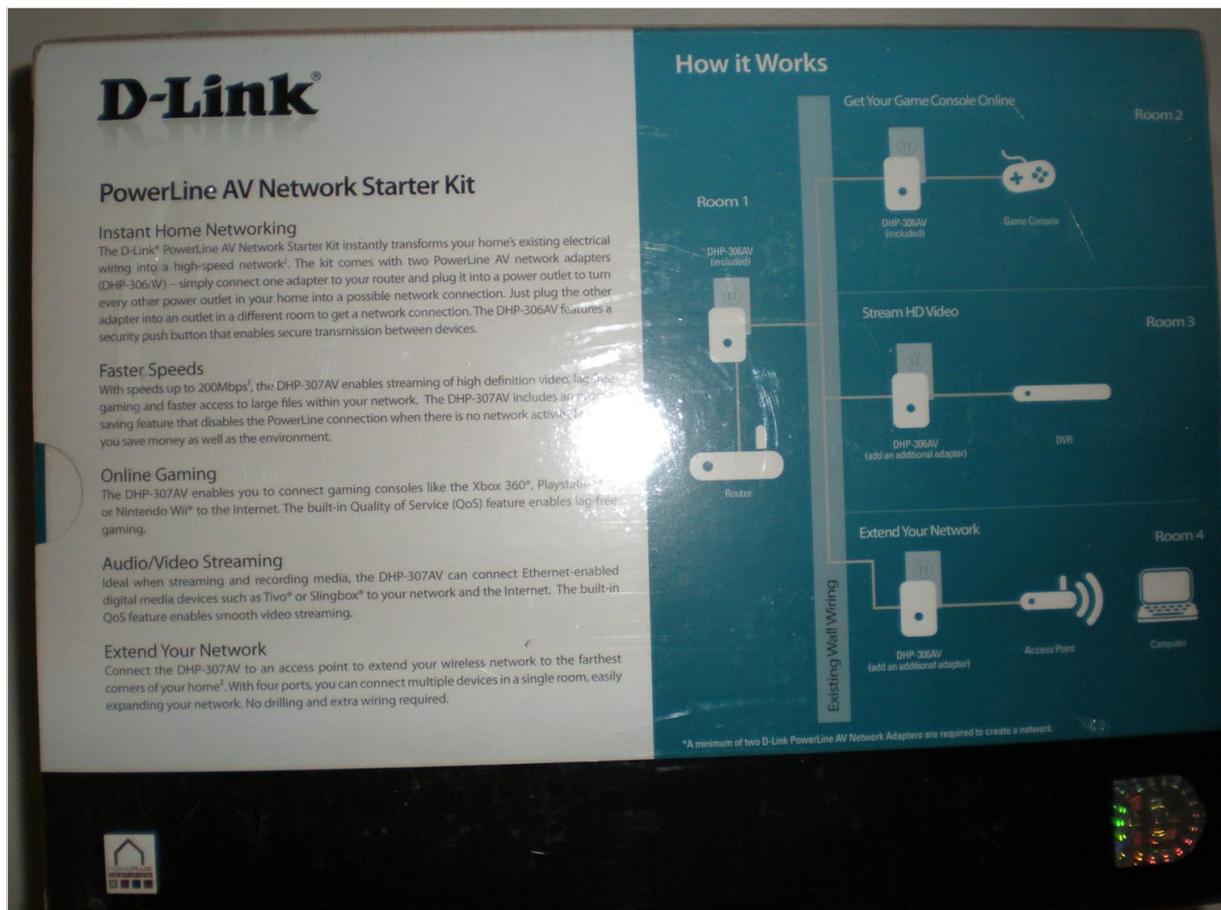

## 3. SETUP INSTRUCTIONS

Setting up your D-Link Powerline AV Network Adapter Kit is a straightforward plug-and-play process:

1. **Connect the First Adapter:** Take one DHP-306AV adapter and connect it to your internet router using one of the provided Ethernet cables. Plug this adapter directly into a wall power outlet. Avoid using power strips or surge protectors for optimal performance.
2. **Connect the Second Adapter:** Take the second DHP-306AV adapter to the room where you need network access. Plug this adapter directly into a wall power outlet.
3. **Connect Your Device:** Use the second Ethernet cable to connect your computer, game console, smart TV, or other network-enabled device to the second DHP-306AV adapter.
4. **Establish Secure Connection (Optional but Recommended):** To secure your Powerline network, press the security push button on the first adapter, then within two minutes, press the security push button on the second adapter. This establishes a 128-bit AES encrypted connection between the

devices.

Your devices should now have network access through your home's electrical wiring. Ensure all power outlets used are part of the same electrical system.

*This diagram illustrates the operational principle of the D-Link Powerline AV Network Adapter Kit. It shows how two DHP-306AV adapters use existing electrical wiring to extend a network. Examples include connecting a game console, streaming HD video, and extending a network with an access point.*

## 4. OPERATING INSTRUCTIONS

Once set up, the D-Link Powerline AV Network Adapter Kit operates by transmitting data reliably over your home's electrical wiring. The adapters intelligently adapt to the strongest signal channels to maintain connection stability.

- **Network Extension:** The Powerline adapters extend your network's reach, allowing you to connect devices in different rooms or floors without running new Ethernet cables.
- **Data Transmission:** The system supports data transfer rates of up to 200Mbps, suitable for various online activities.
- **Quality of Service (QoS):** Integrated QoS technology prioritizes both wired and wireless internet traffic. This feature helps ensure smooth performance for applications sensitive to latency, such as online gaming and Voice over IP (VoIP) calls.
- **Security:** The 128-bit AES encryption, activated via the security push button, protects your network from unauthorized access, ensuring your data remains private.

## 5. FEATURES

The D-Link Powerline AV Network Adapter Kit (DHP-307AV) offers the following key features:

- **HomePlug AV Technology:** Utilizes existing electrical wiring for network connectivity.
- **High-Speed Connectivity:** Supports speeds up to 200Mbps for efficient data transfer.
- **HD Content Streaming:** Capable of streaming high-definition content across your network.
- **Multi-Device Support:** Connect multiple computers, game consoles, and multimedia devices to the internet.
- **Network Expansion:** Extend your wired network to remote areas of your home.
- **Enhanced Security:** Features 128-bit AES encryption for secure network connections.
- **Simple Installation:** Plug-and-play setup for quick deployment.
- **Intelligent QoS:** Prioritizes internet traffic for optimized gaming and VoIP experiences.
- **Ethernet Interface:** Provides standard Ethernet ports for wired connections.

## 6. TROUBLESHOOTING

If you encounter issues with your D-Link Powerline AV Network Adapter Kit, consider the following:

- **No Network Connection:** Ensure both Powerline adapters are plugged directly into wall outlets, not power strips or surge protectors. Power strips can adversely affect performance.
- **Slow Performance:** Network conditions and environmental factors, such as electrical noise from appliances (e.g., vacuum cleaners, hair dryers), can lower actual data throughput. Try plugging adapters into different outlets or turning off nearby electrical devices.
- **Interference:** This product may interfere with devices such as lighting systems with dimmer switches, touch-sensitive on/off features, or short-wave radios.
- **Electrical System Compatibility:** Power outlets and electrical wiring must all be part of the same electrical system for the Powerline adapters to communicate. Certain electrical conditions in your home, such as wiring age and configuration, may affect performance.
- **Security Button:** If you are unable to connect, ensure the security push button process was completed correctly to establish a secure link between the adapters.
- **Adding Devices:** To add new devices to the network, additional Powerline AV adapters are required.

## 7. SPECIFICATIONS

Feature	Detail
Model Number	DHP-307AV
Brand	D-Link
Product Dimensions	1.68 x 2.75 x 3.92 inches
Item Weight	4.5 ounces
Hardware Interface	Ethernet
Color	White
Compatible Devices	Desktop

Feature	Detail
Data Link Protocol	Ethernet
Data Transfer Rate	Up to 200 Megabits Per Second
Manufacturer	D-Link Systems, Inc.
Language	English
UPC	621091900347, 777779914356, 790069335778, 790069392009

## 8. MAINTENANCE

To ensure the longevity and optimal performance of your D-Link Powerline AV Network Adapters, follow these maintenance guidelines:

- **Cleaning:** Periodically wipe the adapters with a soft, dry cloth to remove dust. Do not use liquid cleaners or aerosols.
- **Ventilation:** Ensure the adapters are placed in well-ventilated areas and their ventilation slots are not obstructed.
- **Power Connection:** Always plug the adapters directly into a wall power outlet. Connecting them to power strips, surge protectors, or extension cords can degrade performance and reliability.
- **Environmental Conditions:** Avoid exposing the adapters to extreme temperatures, humidity, or direct sunlight.

## 9. SUPPORT AND WARRANTY

D-Link provides 24/7 basic installation support for the Powerline AV Network Adapter Kit. For technical assistance, troubleshooting beyond this manual, or warranty inquiries, please refer to the official D-Link support website or contact their customer service directly.

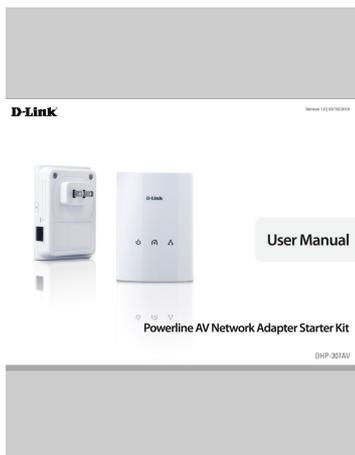

For detailed warranty information, please consult the documentation included with your product or visit the D-Link website. Warranty terms and conditions may vary by region.

**D-Link** WALL-TO-WALL HOME NETWORKING

**INCLUDES 2 POWERLINE AV ADAPTERS**

**POWERLINE HOMEPLUG AV STARTER KIT**

**QUALITY OF SERVICE**  
Powerline AV supports streaming multimedia, online games, and VoIP calls.

**RAPID SPEEDS OVER ELECTRICAL WIRING**  
Speeds of up to 200 Mbps over home electrical wiring suitable for high bandwidth Internet applications.

**SECURITY MADE EASY**  
Data encrypted to quickly configure with the push of a button to keep intruders out.

**DATA TRANSMISSION OVER ELECTRICAL WIRING**  
The D-Link DHP-307AV Powerline AV Starter Kit complies with the HomePlug AV standard, uses your home's existing electrical wiring to create a network of up to 16 devices, so you can connect more devices than ever before. This innovative network extension is secure, data transfer rates, game stream, your services, entertainment, and always stays always plugged in.

**IDEAL FOR BANDWIDTH-INTENSIVE APPLICATIONS**  
The DHP-307AV is capable of delivering data transfer rates of up to 200 Mbps. This rapid transmission speed makes it ideal for bandwidth-intensive applications, such as streaming HD video, VoIP calls, and high bandwidth Internet applications. This device provides secure, reliable, and always stays always plugged in.

**CONVENIENT SETUP AND SECURE OPERATION**  
The DHP-307AV complies with the HomePlug AV standard, uses your home's existing electrical wiring to create a network of up to 16 devices, so you can connect more devices than ever before. This innovative network extension is secure, data transfer rates, game stream, your services, entertainment, and always stays always plugged in.

**POWER SAVING FEATURE**  
The DHP-307AV supports a power-saving mode to comply with the European Energy Saving Product (ErP) Directive. If data transmission or reception occurs in a certain period of time, the adapter will automatically go into sleep mode to save power, reducing power usage by more than 70% and allowing you to save energy automatically, without manual intervention.

200Mbit Powerline AV Kit

**Eigenschaften**

- Bandbreitenanforderungen für HD-Video, Online-Games, und VoIP-Anrufe
- Einfache Plug-and-Play-Installation
- Nutzung der verfügbaren Stromkabel für die Netzwerkverbindung
- Qualität of Service (QoS)
- Remote-Steuerung
- Zur Übermittlung von Audio und Video

**Bestreibung**

Das DHP-307AV Powerline AV Kit ermöglicht die Erweiterung Ihres Heimnetzwerks über das bestehende Stromkabel und nutzt die Stromleitung, um bis zu 16 Geräte zu verbinden. Dies ermöglicht Ihnen, mehr Geräte an das Netzwerk anzuschließen, ohne zusätzliche Kabel zu verlegen. Die DHP-307AV ist für die Übertragung von HD-Video, Online-Games, und VoIP-Anrufen geeignet. Die Installation ist einfach und sicher, da keine zusätzlichen Kabel erforderlich sind. Das DHP-307AV unterstützt die Übertragung von Audio und Video über das Stromkabel. Die DHP-307AV ist mit einer QoS-Funktion ausgestattet, die die Übertragung von Audio und Video priorisiert. Das DHP-307AV ist mit einer Remote-Steuerung ausgestattet, die die Übertragung von Audio und Video ermöglicht. Das DHP-307AV ist mit einer Power-Saving-Funktion ausgestattet, die den Energieverbrauch reduziert.

**Fi Nutzen**

**Ideal für Bandbreiten-intensive Anwendungen**  
Das DHP-307AV ist in der Lage, Datenübertragungsraten von bis zu 200 Mbit/s zu erreichen. Dies ermöglicht die Übertragung von HD-Video, Online-Games, und VoIP-Anrufen. Die DHP-307AV ist mit einer QoS-Funktion ausgestattet, die die Übertragung von Audio und Video priorisiert. Das DHP-307AV ist mit einer Remote-Steuerung ausgestattet, die die Übertragung von Audio und Video ermöglicht. Das DHP-307AV ist mit einer Power-Saving-Funktion ausgestattet, die den Energieverbrauch reduziert.

**Einfach & Sicher**  
Das DHP-307AV benötigt keine zusätzlichen Kabel. Es kann direkt an das Stromkabel angeschlossen werden. Die DHP-307AV ist mit einer Remote-Steuerung ausgestattet, die die Übertragung von Audio und Video ermöglicht. Das DHP-307AV ist mit einer Power-Saving-Funktion ausgestattet, die den Energieverbrauch reduziert.

**Stromsparendes Design**  
Das DHP-307AV verfügt über einen Stromsparenden Modus, der den Energieverbrauch reduziert. Das DHP-307AV ist mit einer Remote-Steuerung ausgestattet, die die Übertragung von Audio und Video ermöglicht. Das DHP-307AV ist mit einer Power-Saving-Funktion ausgestattet, die den Energieverbrauch reduziert.

**D-Link** **PowerLine AV 4-Port Switch**

Ready to use - simply plug into existing outlets | Easily connect and secure your network with push button security | Up to 200Mbps - stream HD video and enjoy lag free gaming

**ENHANCED**

**Instant Home Networking**  
The D-Link DHP-346AV PowerLine AV 4-Port Switch, compliant with the HomePlug AV standard, uses your home's existing electrical wiring to create a network or extend your existing network. It turns every power outlet into a possible network connection to access digital media devices, game consoles, game servers, computers, and network storage devices throughout your home. Additionally, the 4-Port switch allows for multiple devices to be connected to the network.

**Convenient Setup and Secure Operation**  
The DHP-346AV plug directly into a power outlet, and does not require any additional cables. Simply use your home network by connecting multiple devices in the farthest corners of your home via Ethernet cables for convenient access. Used exceptions here can be quickly configured with the push of a button on the rear of the device. The device implements 128-bit AES data encryption to protect the network from unauthorized wire tapping. With hassle-free plug and play installation, the DHP-346AV can be used to create a solid local area home network.

**Full Transmission Using Your Home's Existing Wiring**  
The PowerLine AV 4-Port Switch incorporates the latest technology to deliver up to 200 Mbps over a home's existing electrical wiring. This transmission speed provides great bandwidth available for streaming high-quality video, HD TV, digital voice, and bandwidth-intensive high-quality internet access throughout the home. With Pro-Beam Quality of Service (QoS) support, the prioritization of applications which require real-time communication, such as VoIP phone calls, multimedia video games, will not be compromised from wirelessly streaming TV and music.

**Secure Gaming**  
The D-Link DHP-346AV enables you to connect gaming consoles like the Xbox 360™, PlayStation™3, or Nintendo Wii™ to the Internet. The built-in Quality of Service (QoS) feature enables lag-free gaming.

**D-Link** **POWERLINE** Connect using your home's electrical wiring

**PowerLine Network Router Starter Kit**

High quality and performance connectivity for enhanced gaming, HD media streaming and superior video conferencing

**ENHANCED**

Instant Home Networking: The D-Link PowerLine AV Network Starter Kit instantly transforms your home's existing electrical wiring into a high-speed network. Simply connect the DHP-1321 Wireless N PowerLine Router to your Internet connection and then connect to your power outlets to discover other power outlets in your home into a possible network connection. Then plug the DHP-306AV Network Adapter into a different power outlet to create a network connection. The DHP-306AV and DHP-1321 feature a security push-button that enables secure transmission between devices.

The Convenience of Wi-Fi: The DHP-1321 is a Wireless N 800 router that provides a significant boost and better receiving wireless signal than standard Wireless N routers. D-Link's Intelligent Antenna Technology makes use of your home's environment by housing multiple receiving signals of Wi-Fi and helping to work around obstructions and help eliminate dead spots.

Faster Speeds: With speeds up to 200Mbps, the PowerLine device enables streaming of high definition video, big file sharing and faster access to the Internet when you connect. The DHP-1321 and DHP-306AV also feature energy saving features that disables the PowerLine connection when there is no network activity, helping you save money as well as the environment.

Online Gaming: The PowerLine AV Network Starter Kit enables you to connect the DHP-1321 to gaming consoles like the Xbox 360, PlayStation 3, or Nintendo Wii for the Internet. The built-in Quality of Service (QoS) feature enables lag-free gaming.

Audio/Video Streaming: Ideal when streaming and recording media, the DHP-306AV can connect Ethernet-enabled digital devices such as "iPod" or "Stereo" to your network and the Internet. The built-in QoS feature enables smooth video streaming.

Save Energy with D-Link Green: D-Link Green features for the DHP-1321 include Wi-Fi Scheduling, P.C. power saving and power saving by the router. Scheduled transmission administration to configure specific hours when the wireless network will be powered off to save energy and enhance security. P.C. power saving shuts down the PowerLine function when Ethernet activity or wireless connections are detected. Power saving by the router automatically detects the link status of wired devices and reduces the power usage of ports that are idle. A sleep timer button on the top of the router allows you to turn the device off without unplugging it.

**D-Link** **POWERLINE** Wi-Fi and Powerline in one adapter

**PowerLine AV Wireless N Extender**

Ready to use - simply plug into existing outlets

Easy connect and secure your network with push button security

Up to 200Mbps - stream HD video and enjoy lag-free gaming

**ENHANCED**

Instant Home Networking: This D-Link PowerLine AV Wireless N Extender, compliant with the HomePlug AV standard, uses your home's existing electrical wiring to create a network to extend your existing network. It turns every power outlet into a possible network connection to access digital media, photos, game consoles, your services, computers and network storage devices throughout your home. Additionally, Wireless N provides high-speed transfer without the need for lengthy network cables.

Factor Wireless Speeds, Wider Operational Range: The Wireless N technology incorporated into the DHP-W306AV offers increased speed and range over standard 802.11g. Initial wireless setup can be accomplished quickly thanks to a convenient WPS button on the device. WEP, WPA, and WPA2 encryption keep your network traffic safe and secure.

Wide Bandwidth Intensive Applications: The DHP-W306AV is capable of delivering data transfer rates of up to 200Mbps. This high transmission speed makes it ideal for bandwidth intensive applications, guaranteeing smooth HD video streaming, VoIP calls, and lag-free online gaming experiences. In addition, it prioritizes Internet traffic, ensuring that multimedia applications do not experience glitches with video buffering and download and uploads. This device provides ample network bandwidth, enabling you to top up existing network wiring for high-quality multimedia streaming.

Online Gaming: The D-Link DHP-W306AV enables you to connect gaming consoles like the Xbox 360, PlayStation 3, or Nintendo Wii to the Internet. The built-in Quality of Service (QoS) feature enables lag-free gaming.

Convenient Setup and Secure Operation: The DHP-W306AV plugs directly into a power outlet, and does not require any additional cables. Simply plug your Internet-to-connecting multiple devices in the fastest corner of your home via Ethernet cables to Wireless N for connections. The built-in WPS encryption key can be quickly configured with the push of a button on the device. The setup requires 20-30 seconds. The device is designed to protect the network from unauthorized wire tapping. With hardware encryption and the WPA2 standard, the DHP-W306AV is an ideal solution to create a safe Wi-Fi wireless network.

Fast Transmission Using Your Home's Existing Wiring: The PowerLine AV Wireless N Extender incorporates the latest technology to deliver up to 200Mbps over a home's existing electrical wiring. This transmission speed makes it ideal for bandwidth intensive applications, guaranteeing smooth HD video streaming, VoIP calls, and lag-free online gaming experiences. In addition, it prioritizes Internet traffic, ensuring that multimedia applications do not experience glitches with video buffering and download and uploads. This device provides ample network bandwidth, enabling you to top up existing network wiring for high-quality multimedia streaming.
