

TW Steel TW72

TW Steel Grandeur Diver Chronograph Watch TW72 User Manual

Model: TW72

1. INTRODUCTION

Welcome to the user manual for your new TW Steel Grandeur Diver Chronograph Watch, Model TW72. This timepiece combines robust design with precise quartz movement, featuring a chronograph function and impressive water resistance. This manual provides essential information on setting up, operating, maintaining, and troubleshooting your watch to ensure its longevity and optimal performance.

Image 1: Front view of the TW Steel Grandeur Diver Chronograph Watch TW72, showcasing its black dial, silver-tone case, and black rubber strap.

2. SETUP AND INITIAL USE

2.1 Setting the Time

1. Gently pull out the crown (the knob on the side of the watch) to position 2.
2. Rotate the crown clockwise or counter-clockwise to set the hour and minute hands to the correct time.
3. Once the time is set, push the crown back into position 1 (normal operating position).

2.2 Setting the Date

1. Gently pull out the crown to position 1 (first click).
2. Rotate the crown to adjust the date. Avoid setting the date between 9 PM and 3 AM, as this can damage the movement.
3. Once the date is set, push the crown back into the normal operating position.

3. OPERATING YOUR WATCH

3.1 Chronograph Function

Your TW72 watch features a chronograph, allowing you to measure elapsed time.

- **Start/Stop:** Press the top pusher (button) to start the chronograph. Press it again to stop.
- **Reset:** While the chronograph is stopped, press the bottom pusher to reset all chronograph hands to zero.

3.2 Water Resistance

This watch is water resistant to 330 feet (100 meters). This rating makes it suitable for swimming and snorkeling, but not for diving. Ensure the crown is fully pushed in before any contact with water. Do not operate the crown or pushers while the watch is wet or submerged.

4. MAINTENANCE AND CARE

- **Cleaning:** Wipe the watch case and strap regularly with a soft, dry cloth. For the rubber strap, a damp cloth with mild soap can be used, followed by thorough drying.
- **Avoid Chemicals:** Do not expose your watch to solvents, detergents, perfumes, or cosmetics, as these can damage the case, strap, or seals.
- **Temperature Extremes:** Avoid exposing the watch to extreme temperatures (above 60°C / 140°F or below 0°C / 32°F) or sudden temperature changes.
- **Magnetic Fields:** Keep the watch away from strong magnetic fields, which can affect the accuracy of the quartz movement.
- **Battery Replacement:** When the watch stops or the second hand starts jumping every few seconds (End-of-Life indicator), the battery needs to be replaced. This should be done by a qualified watchmaker to ensure water resistance is maintained.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch not running	Dead battery; Crown not pushed in; Internal movement issue.	Replace battery; Push crown fully in; Consult a watchmaker.
Date not changing	Incorrect time setting (AM/PM); Date setting mechanism issue.	Advance time past 12 AM to check AM/PM; Consult a watchmaker.
Chronograph hands not resetting to zero	Requires calibration; Internal issue.	Refer to specific movement instructions for calibration (if available) or consult a watchmaker.

6. SPECIFICATIONS

Feature	Detail
Brand	TW Steel
Model Number	TW72

Feature	Detail
