## Vidal Sassoon VSP7215

# Vidal Sassoon Ionic Styling Comb Assortment (Model VSP7215) User Manual

Brand: Vidal Sassoon

## INTRODUCTION

---

This manual provides instructions for the Vidal Sassoon Ionic Styling Comb Assortment, Model VSP7215. This professional collection includes three distinct combs designed to section, tease, add lift or volume, detangle, and smooth hair. The integrated ionic technology aims to enhance shine and reduce frizz for healthier-looking hair. This assortment is suitable for all hair types and lengths.

## SETUP

---

The Vidal Sassoon Ionic Styling Comb Assortment requires no assembly or complex setup. Upon receiving your comb set, please follow these simple steps:

1. **Unpack:** Carefully remove all three combs from their packaging.
2. **Inspect:** Examine each comb for any signs of damage or manufacturing defects. If any issues are found, please refer to the [Warranty and Support](#) section.
3. **Clean:** Before first use, it is recommended to wash the combs with mild soap and water, then rinse thoroughly and allow them to air dry.

Your combs are now ready for use.

## OPERATING INSTRUCTIONS

---

This assortment includes three specialized combs for various styling needs. Each comb is designed to work effectively on both wet and dry hair, helping to reduce frizz and enhance shine through its ionic technology.

## 1. Detangling/Styling Comb (Black)

This comb features both wide and fine teeth, making it versatile for detangling and general styling. Use the wider teeth to gently work through knots and tangles, especially on wet hair, to minimize breakage. The finer teeth can then be used for smoother styling and to create more defined sections.

- **Detangling:** Start from the ends of your hair and work your way up to the roots, gently combing through small sections.
- **Styling:** Use to distribute styling products evenly or to create smooth, sleek looks.

## 2. Tail Comb (Black with Metal Pick)

The tail comb is ideal for precision styling, sectioning, and teasing. The fine teeth are perfect for creating clean parts and smoothing hair, while the metal pick allows for intricate sectioning and adding volume at the roots.

- **Sectioning:** Use the metal tail to create precise parts or to separate hair into sections for braiding, curling, or coloring.
- **Teasing/Backcombing:** For added volume, gently push hair towards the scalp with the fine teeth, starting from the mid-shaft to the roots.

### 3. Volumizing Comb Pick (White)

This wide-tooth comb is specifically designed to lift and add volume to your hair without causing frizz or static. Its broad teeth are gentle on the scalp and hair, making it excellent for creating natural-looking fullness.

- **Adding Volume:** Insert the comb near the roots and gently lift upwards to create body and fullness.
- **Styling Curls:** Use to gently separate and define curls without disrupting their natural pattern.

## MAINTENANCE

Proper care and maintenance will extend the life of your Vidal Sassoon Ionic Styling Combs.

- **Cleaning:** Regularly remove any trapped hair from the combs. Wash them with warm water and a mild soap or shampoo. Rinse thoroughly to remove all soap residue.
- **Drying:** Allow the combs to air dry completely before storing.
- **Storage:** Store combs in a clean, dry place away from direct sunlight or extreme temperatures.
- **Avoid Harsh Chemicals:** Do not use harsh chemicals or abrasive cleaners, as these can damage the comb material and ionic properties.

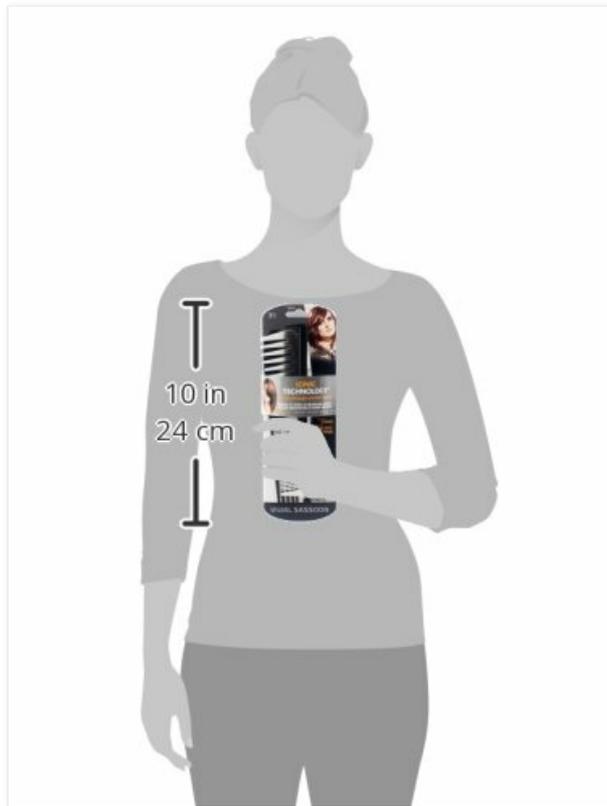

## TROUBLESHOOTING

If you encounter any issues while using your combs, consider the following common solutions:

- **Excessive Static/Frizz:** While the combs feature ionic technology to reduce frizz, external factors like very dry hair or environment can still cause static. Ensure your hair is adequately moisturized. You may also try applying a small amount of anti-frizz serum to your hair before combing.
- **Hair Breakage:** Always detangle hair gently, starting from the ends and working your way up. Avoid pulling or forcing the comb through knots. For wet hair, use the wide-tooth comb to minimize stress on the strands.
- **Difficulty Cleaning:** If hair or product residue is stubborn, soak the combs in warm, soapy water for a few minutes before cleaning with a small brush (like an old toothbrush) to dislodge debris.
