

NEC NP-M300W

NEC NP-M300W WXGA LCD Projector User Manual

Model: NP-M300W

1. INTRODUCTION

This manual provides essential instructions for the safe and efficient operation of your NEC NP-M300W WXGA LCD Projector. Please read this manual thoroughly before using the projector and retain it for future reference. The NEC NP-M300W is designed for educational and small-to-medium-sized business environments, offering WXGA (1280 x 800) resolution and 3000 ANSI lumens brightness.

2. SAFETY INFORMATION

Observe the following safety precautions to prevent fire, electric shock, or injury, and to ensure the longevity of your projector.

- **Power Source:** Use only the power supply specified for this unit.
- **Ventilation:** Do not block ventilation openings. Ensure adequate space around the projector for proper airflow.
- **Heat:** Do not place the projector near heat sources or in direct sunlight. The lamp operates at high temperatures.
- **Lamp Replacement:** Allow the projector to cool down completely before attempting to replace the lamp. Refer to the maintenance section for detailed instructions.
- **Liquid Exposure:** Do not expose the projector to rain or moisture. Do not place objects filled with liquids on or near the projector.
- **Cleaning:** Disconnect the power cord before cleaning. Use a soft, dry cloth. Avoid liquid or aerosol cleaners.
- **Servicing:** Do not attempt to service this product yourself. Refer all servicing to qualified service personnel.

3. PACKAGE CONTENTS

Verify that all items listed below are included in your projector package:

- NEC NP-M300W Projector
- Power Cord
- User Manual (this document)

- VGA Cable
- HDMI Cable
- Audio Cable
- RJ-45 Cable
- USB Cable

4. SETUP

4.1. Physical Placement

Position the projector on a stable, flat surface or mount it securely. Ensure the projector is placed at an appropriate distance from the screen to achieve the desired image size. Maintain adequate ventilation around the unit.

Image: Front view of the NEC NP-M300W projector, showing the lens, ventilation grilles, and control panel on top.

4.2. Connecting Devices

The NP-M300W offers various input ports for connecting different devices. Refer to the rear panel diagram below for port locations.

Image: Rear panel of the NEC NP-M300W projector, displaying various input/output ports including HDMI, VGA (Computer 1 IN, Computer 2 IN), S-VIDEO IN, VIDEO IN, AUDIO IN/OUT, USB, LAN, and PC Control.

- **HDMI Connection:** Connect an HDMI cable from your source device (e.g., laptop, Blu-ray player) to the HDMI IN port on the projector.
- **VGA (Computer) Connection:** Use a VGA cable to connect your computer's video output to either COMPUTER 1 IN or COMPUTER 2 IN. For audio, connect an audio cable from your computer's audio output to the corresponding AUDIO IN port.
- **Video/S-Video Connection:** For standard definition video sources, connect a composite video cable to VIDEO IN or an S-Video cable to S-VIDEO IN. Connect audio cables to the L/MONO and R AUDIO IN ports.
- **USB Connection:** The USB port can be used for various functions, including displaying presentations directly from a USB drive or for firmware updates.
- **LAN Connection:** Connect an RJ-45 Ethernet cable to the LAN port for network control or image transmission.
- **Audio Output:** Connect external speakers or a sound system to the AUDIO OUT port for enhanced audio.

4.3. Powering On/Off

- **To Power On:** Connect the power cord to the projector and a power outlet. Press the power button on the control panel or remote control. The power indicator light will turn blue.
- **To Power Off:** Press the power button. A confirmation message may appear. Press the power button again to confirm. The projector will enter a cooling cycle, and the power indicator will flash. Do not unplug the projector until the cooling cycle is complete and the power indicator is off.

5. OPERATION

5.1. Control Panel Overview

The control panel on top of the projector provides access to essential functions.

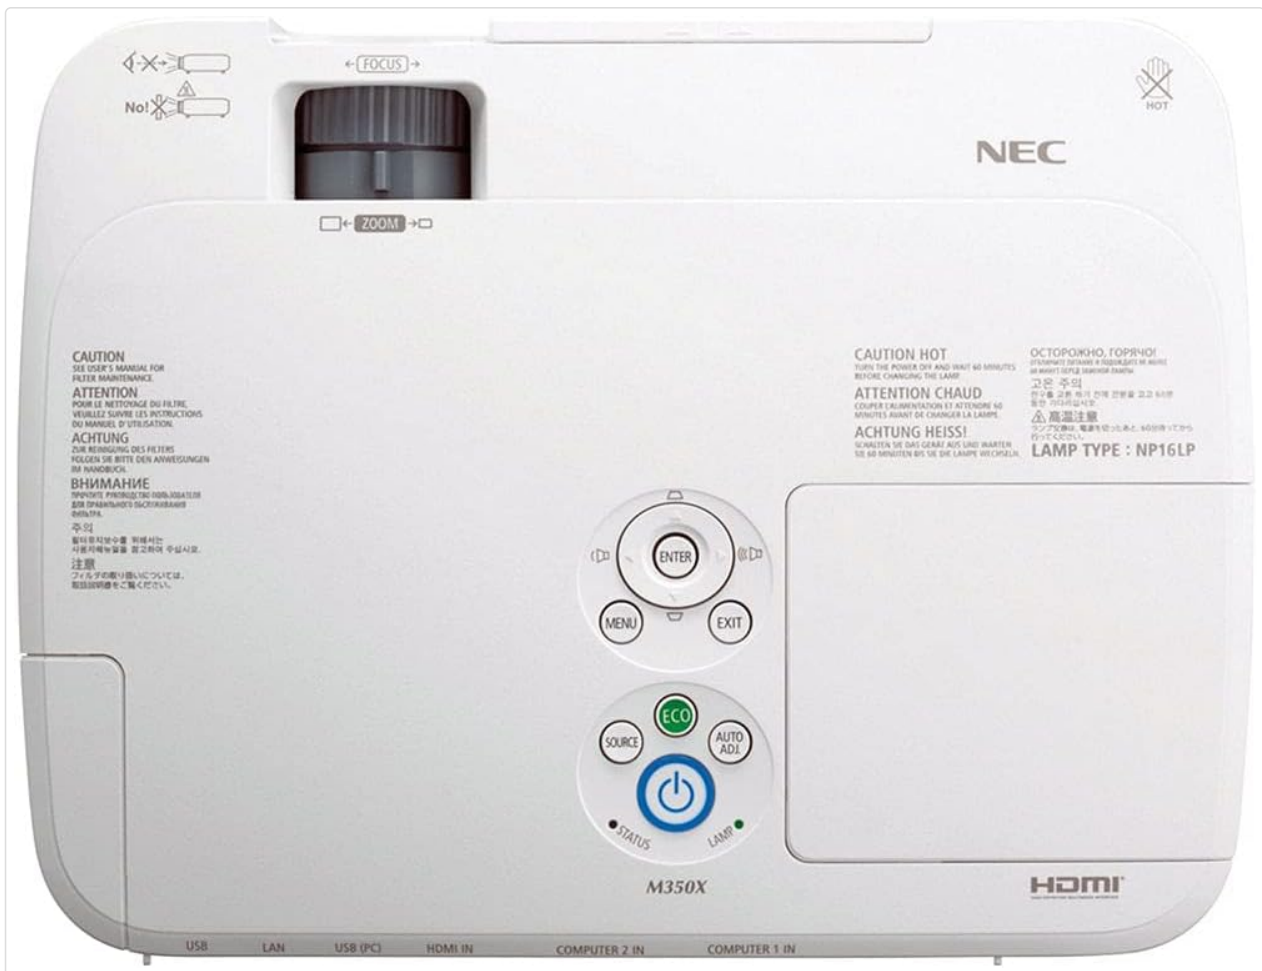

Image: Top view of the NEC NP-M300W projector, highlighting the control panel with buttons for power, source selection, menu navigation, and focus/zoom adjustments.

- **Power Button:** Turns the projector on and off.
- **SOURCE Button:** Cycles through available input sources (HDMI, Computer 1, Computer 2, Video, S-Video, USB).
- **MENU Button:** Opens the on-screen display (OSD) menu.
- **ENTER Button:** Confirms selections in the OSD menu.
- **Arrow Buttons:** Navigate through menu options and adjust settings.
- **EXIT Button:** Closes the OSD menu or returns to the previous menu level.
- **ECO Button:** Activates or deactivates Eco Mode for power saving.
- **AUTO ADJ Button:** Automatically adjusts the image for optimal display, especially useful for VGA sources.

5.2. Focus and Zoom Adjustment

Use the focus and zoom rings located around the projector lens to adjust the image clarity and size. Rotate the focus ring until the image is sharp. Rotate the zoom ring to enlarge or reduce the image size to fit your screen.

5.3. On-Screen Display (OSD) Menu

Press the MENU button to access the OSD. Use the arrow buttons to navigate through categories and options. Press ENTER to select an option or confirm a setting. Press EXIT to close the menu.

- **Image Settings:** Adjust brightness, contrast, color, tint, sharpness, and aspect ratio.
- **Display Settings:** Configure keystone correction, digital zoom, and overscan.
- **Input Settings:** Select input source and adjust input-specific parameters.
- **Setup Menu:** Configure language, projector ID, power management, and other system settings.

- **Advanced Features:** Access DICOM simulation mode for displaying medical images with enhanced grayscale accuracy.

6. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your projector.

6.1. Lamp Replacement

The lamp has an extended life, but will eventually need replacement. When the lamp life is nearing its end, a warning message may appear, or the lamp indicator light will illuminate. Always use a genuine NEC replacement lamp (NP16LP).

1. Turn off the projector and unplug the power cord.
2. Allow the projector to cool down for at least one hour.
3. Locate the lamp cover (usually on the top or side of the projector) and remove the screw(s) securing it.
4. Carefully remove the lamp cover.
5. Unscrew the lamp module and gently pull it out.
6. Insert the new lamp module, ensuring it is seated correctly.
7. Secure the new lamp with its screws.
8. Replace the lamp cover and secure it with its screw(s).
9. Plug in the power cord and turn on the projector. Reset the lamp timer through the OSD menu.

6.2. Filter Cleaning/Replacement

The air filter also has an extended life but should be cleaned periodically to prevent dust buildup and maintain cooling efficiency. A clogged filter can lead to overheating and reduced lamp life.

1. Turn off the projector and unplug the power cord.
2. Locate the air filter cover (usually on the side of the projector) and remove it.
3. Remove the air filter.
4. Clean the filter using a small vacuum cleaner or by gently tapping it to remove dust. If the filter is heavily soiled or damaged, replace it with a new one.
5. Reinsert the clean or new filter and replace the filter cover.
6. Reset the filter timer through the OSD menu.

6.3. General Cleaning

- **Projector Casing:** Wipe the exterior with a soft, dry, lint-free cloth. For stubborn marks, dampen the cloth slightly with water. Avoid harsh chemicals.
- **Lens:** Use a professional lens cleaning cloth and lens cleaning solution. Gently wipe the lens in a circular motion. Avoid touching the lens with bare hands.

7. TROUBLESHOOTING

If you encounter issues with your projector, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No image displayed	Incorrect input source selected; loose cable connection; source device not outputting signal.	Press the SOURCE button to cycle inputs. Check all cable connections. Ensure the source device is powered on and configured to output video.
Image is blurry	Focus not adjusted correctly.	Adjust the focus ring around the lens until the image is sharp.
Image is distorted (trapezoid shape)	Projector is not perpendicular to the screen.	Adjust the projector's angle or use the keystone correction feature in the OSD menu.
Projector overheats and shuts down	Blocked ventilation; dirty air filter.	Ensure ventilation openings are clear. Clean or replace the air filter as described in the maintenance section.
Lamp indicator light is on/flashing	Lamp nearing end of life or lamp error.	Replace the lamp. If the issue persists after replacement, contact support.

8. SPECIFICATIONS

Key technical specifications for the NEC NP-M300W Projector:

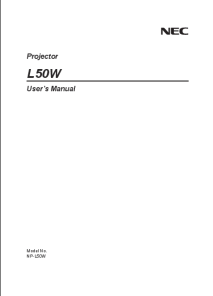

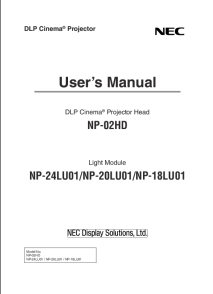

Feature	Detail
Model Number	NP-M300W
Display Technology	LCD
Native Resolution	WXGA (1280 x 800)
Brightness	3000 ANSI lumens
Aspect Ratio	16:10 (Native)
Connectivity Technology	Wireless (optional), Wired (HDMI, VGA, USB, LAN, S-Video, Composite)
Product Dimensions	10.12 x 13.35 x 3.9 inches
Item Weight	6.61 pounds
Special Features	DICOM simulation, Internet-ready, Energy-saving features
Recommended Uses	Education, small-to-medium-sized business environments

9. WARRANTY AND SUPPORT

For warranty information and technical support, please refer to the documentation provided at the time of purchase

or visit the official NEC website. Keep your purchase receipt as proof of purchase for warranty claims. Contact NEC customer service for assistance with any issues not covered in this manual.
