

First Alert FE1A10GR

First Alert FE1A10GR Marine Fire Extinguisher User Manual

1. INTRODUCTION

This manual provides essential information for the safe and effective use of your First Alert FE1A10GR Marine Fire Extinguisher. This A-B-C rated extinguisher is designed for multipurpose marine and household applications, capable of combating fires involving ordinary combustibles (wood, paper, plastic), flammable liquids (gasoline, oil), and electrical equipment.

For your safety, please read and understand all instructions before installation and use.

2. SAFETY INFORMATION

Fire extinguishers are critical safety devices. Proper understanding of their capabilities and limitations is vital.

- **UL Rating:** This extinguisher is UL rated 1-A: 10-B: C, indicating its effectiveness against Class A (ordinary combustibles), Class B (flammable liquids), and Class C (electrical) fires.
- **Extinguishing Agent:** Contains monoammonium phosphate, a dry chemical agent.
- **Marine Approval:** This unit is U. S. Coast Guard–approved for marine use when properly mounted with the included bracket.
- **General Safety:** Always ensure a clear escape path before attempting to fight a fire. If the fire is large, spreading rapidly, or if you are unsure, evacuate immediately and call emergency services.

**Marine Use
Approved**

**Durable Metal
Construction**

**Rechargeable
Compliance
Unit**

Image: Key features of the First Alert FE1A10GR fire extinguisher, including marine approval, durable metal construction, and rechargeability.

3. PRODUCT OVERVIEW

The First Alert FE1A10GR features a durable all-metal construction, including a commercial-grade metal valve and trigger. It is equipped with a metal pull pin and a safety seal to prevent accidental discharge and tampering. A corrosion-resistant, color-coded metal gauge allows for easy pressure verification. The label is chemical-resistant and waterproof, providing clear instructions.

FIRST ALERT™

**Protect
your family
with fire extinguishers**

Image: A detailed view of the pressure gauge and operating handle of the fire extinguisher.

4. SETUP AND INSTALLATION

Proper placement and mounting are crucial for quick access during an emergency.

1. **Unpacking:** Carefully remove the fire extinguisher and mounting bracket from its packaging.
2. **Location Selection:** Choose a location that is easily accessible, visible, and near an exit. For marine use, ensure it is mounted securely and in a readily available spot as per U.S. Coast Guard regulations. For household use, common locations include kitchens, garages, and utility rooms.
3. **Mounting:** Use the included mounting bracket and strap to secure the extinguisher. Ensure the bracket is firmly attached to a solid surface using appropriate fasteners (not included). The extinguisher should be mounted vertically, with the nozzle facing downwards or as indicated by the bracket design.
4. **Accessibility Check:** After mounting, practice removing the extinguisher from its bracket to ensure it can be deployed quickly.

5. OPERATING INSTRUCTIONS (PASS METHOD)

In the event of a fire, remember the PASS method:

Image: The main product image clearly displaying the operating instructions on the extinguisher label.

1. **P - Pull the Pin:** Hold the extinguisher upright. Pull the metal pin from the handle. The safety seal will break.
2. **A - Aim at the Base of the Fire:** Stand back approximately 6 feet (1.8 meters) from the fire. Aim the nozzle at the base of the flames, not at the smoke or top of the fire.
3. **S - Squeeze the Lever:** Depress the operating lever fully to discharge the extinguishing agent.
4. **S - Sweep Side to Side:** Sweep the nozzle from side to side, covering the entire area of the fire's base. Continue until the fire appears to be out. Watch the area carefully; if the fire reignites, repeat

the process.

Always ensure your escape route is clear. If the fire cannot be extinguished quickly, evacuate and call emergency services.

6. MAINTENANCE

Regular inspection and maintenance ensure your fire extinguisher is ready for use.

- **Monthly Inspection:** Check the pressure gauge monthly. The needle should be in the green operating range.
- **Physical Inspection:** Inspect the extinguisher for any signs of damage, corrosion, or a broken safety seal. Ensure the nozzle is clear of obstructions.
- **Recharge:** This extinguisher is rechargeable by certified professionals after any use, even partial discharge. Do not attempt to recharge it yourself.
- **Replacement:** If the gauge is not in the green, if the extinguisher is damaged, or if it has been used, it must be serviced or replaced.

7. TROUBLESHOOTING

Fire extinguishers are generally simple devices. Most issues relate to readiness rather than operational failure.

- **Low Pressure:** If the pressure gauge needle is not in the green zone, the extinguisher has lost pressure. It must be serviced by a certified professional or replaced. Do not attempt to use an extinguisher with low pressure.
- **Damaged Pin/Seal:** If the pull pin is missing or the safety seal is broken, the extinguisher may have been tampered with or partially discharged. It should be inspected by a professional or replaced.
- **No Discharge:** If the pin is pulled and the lever is squeezed but no agent discharges, the unit may be faulty or empty. Do not attempt to fix it; replace or have it professionally inspected.

8. SPECIFICATIONS

Brand	First Alert
Model Number	FE1A10GR (1039894)
Style	MARINE1
UL Rating	1-A: 10-B: C
Extinguishing Agent	Monoammonium Phosphate
Material	Metal
Color	White
Product Dimensions	3.88 x 3.13 x 12.94 inches
Item Weight	0.01 Ounces
Included Components	Fire Extinguisher, Mounting Bracket with Strap
