Summer Infant 77510

Summer Infant Snuzzler Infant Support User Manual

Model: 77510

INTRODUCTION

The Summer Infant Snuzzler Infant Support is designed to provide optimal head and body support for your baby in various seating systems, including car seats, strollers, bouncer seats, and infant swings. Its unique design ensures compatibility with most harness systems, offering comfort and stability as your child grows.

SETUP INSTRUCTIONS

Follow these steps to properly install the Snuzzler Infant Support:

- Positioning the Support:** Place the Snuzzler directly into the car seat, stroller, or other infant seating device, ensuring it lies flat against the back and seat.
- Harness Integration:** Thread the harness straps of your car seat or stroller through the designated slots on the Snuzzler. Ensure all straps, including shoulder and crotch straps, are properly aligned and secured according to your car seat or stroller manufacturer's instructions. The Snuzzler is designed not to interfere with the safety of car seat harnesses and has been crash tested.
- Adjusting Head Support:** The head support portion of the Snuzzler is separate and adjustable. Use the hook-and-loop fasteners to slide the head support up or down to align with your baby's head height, providing snug and comfortable support.

OPERATING AND USAGE

The Snuzzler provides comprehensive support for infants from birth, including preemies. Its reversible design offers versatility:

- One side features soft terry cloth, ideal for cooler environments or when extra cushioning is desired.
- The reverse side features a smooth woven fabric, suitable for warmer weather or a different aesthetic.

Always ensure your baby is securely fastened in their car seat or stroller harness after installing the Snuzzler. The Snuzzler is designed to complement, not replace, the safety features of your infant seating device.

MAINTENANCE

To keep your Snuzzler Infant Support clean and hygienic:

- The Snuzzler is machine washable.
- Use cold water on a gentle cycle.
- Do not bleach.

- Tumble dry on low heat or air dry.
- Refer to the care label attached to the product for specific washing instructions.

TROUBLESHOOTING

Issue: Baby's head appears unsupported or is flopping.

Solution: Ensure the adjustable head support is positioned correctly for your child's height. The head support should be snug around the baby's head but not restrictive. Adjust the hook-and-loop fasteners to raise or lower the head support as needed.

Issue: Snuzzler shifts or bunches in the seat.

Solution: Verify that all harness straps (shoulder and crotch) are properly threaded through the corresponding openings in the Snuzzler. Ensure the Snuzzler is securely seated against the back and bottom of the car seat or stroller, with no gaps.

SPECIFICATIONS

Brand	Summer Infant
