QUIK LOK T-22

QUIK LOK T-22 Keyboard Stand User Manual

Double-Brace Keyboard Stand with Fully Adjustable Second Tier

1. INTRODUCTION

Thank you for choosing the QUIK LOK T-22 Keyboard Stand. This double-brace, two-tier keyboard stand is designed to provide stable and versatile support for your musical instruments. Its robust construction and adjustable features make it suitable for various setups, from home studios to stage performances. This manual provides essential information for the safe and effective setup, operation, and maintenance of your T-22 keyboard stand.

2. SAFETY INFORMATION

Please read and understand all safety instructions before assembling or using the stand. Failure to do so may result in injury or damage to your equipment.

- **Weight Capacity:** Do not exceed the maximum weight capacity of the stand. Overloading can cause instability and collapse.
- **Stability:** Always ensure the stand is placed on a flat, stable, and level surface. Uneven surfaces can compromise stability.
- **Secure Engagement:** When adjusting the stand, ensure all locking mechanisms and gears are fully and securely engaged before placing any instruments on the stand.
- **Children and Pets:** Keep children and pets away from the stand during assembly and use to prevent accidents.
- **Moving the Stand:** Always remove instruments from the stand before moving it.
- **Inspection:** Regularly inspect the stand for any signs of wear, damage, or loose components. Do not use a damaged stand.

3. PACKAGE CONTENTS

Upon unpacking, please verify that all components are present and undamaged:

- QUIK LOK T-22 Double-Brace Keyboard Stand (Main Unit)
- Adjustable Second Tier Arms (Pre-attached or easily attachable)
- User Manual (This document)

If any parts are missing or damaged, please contact your retailer or QUIK LOK customer support immediately.

4. SETUP INSTRUCTIONS

The QUIK LOK T-22 keyboard stand is designed for quick and easy setup. While it requires no complex assembly, proper adjustment is crucial for stability.

1. **Unfold the Stand:** Carefully unfold the main X-frame of the stand until it forms a stable base.
2. **Adjust Main Tier Height:** Locate the central knob on the X-frame. Loosen the knob and adjust the height of the main tier to your desired playing position. Ensure the locking teeth are fully engaged at all points. Tighten the knob securely.
3. **Adjust Second Tier:** The second tier is fully adjustable. Loosen the knobs on the second tier arms to adjust their height and angle. Position them to comfortably hold your second keyboard or accessory. Ensure all knobs are tightened securely after adjustment.
4. **Leveling Feet:** The stand features rotating leveling feet. If the stand wobbles on an uneven surface, rotate the feet to achieve optimal stability.
5. **Final Check:** Before placing any instruments, gently push down on the stand to confirm all adjustments are locked and the stand is stable.

An image showing the QUICK LOK T-22 double-brace keyboard stand in its fully assembled, X-shape configuration, with the adjustable second tier extended upwards. The stand is black and features rubberized end caps on the support arms and feet.

5. OPERATING INSTRUCTIONS

Using your QUICK LOK T-22 stand is straightforward once properly set up:

- **Placing Instruments:** Carefully place your keyboard or other instruments onto the rubberized support arms of both tiers. Ensure they are centered and stable.
- **Adjusting During Use:** If minor adjustments are needed during use, always remove the instruments first to prevent accidental drops or instability.
- **Transport:** For transport, remove all instruments, loosen the central knob, and fold the stand flat. This compact design makes it easy to carry.

6. MAINTENANCE

To ensure the longevity and optimal performance of your keyboard stand, follow these maintenance guidelines:

- **Cleaning:** Wipe the stand with a soft, damp cloth to remove dust and dirt. Avoid abrasive cleaners or solvents that could damage the finish.
- **Lubrication:** Periodically check the moving parts and locking mechanisms. A small amount of silicone-based lubricant can be applied to hinges and adjustment points if they become stiff.

- **Storage:** Store the stand in a dry environment, away from extreme temperatures and humidity, when not in use.
- **Hardware Check:** Periodically check all bolts, screws, and knobs to ensure they are tight. Retighten as necessary.

7. TROUBLESHOOTING

If you encounter any issues with your QUIK LOK T-22 stand, refer to the following common solutions:

- **Stand is Wobbly:**
 - Ensure the stand is on a flat, level surface.
 - Adjust the rotating leveling feet to compensate for uneven floors.
 - Verify that the central adjustment knob and all second-tier adjustment knobs are fully tightened.
 - Check that the locking teeth of the X-frame are completely engaged.
- **Second Tier Arms are Uneven:**
 - Loosen the adjustment knobs for the second tier arms.
 - Carefully align both arms to the same height and angle.
 - Tighten the knobs securely, ensuring both arms are locked in place.
- **Difficulty Adjusting Height:**
 - Ensure the central knob is sufficiently loosened.
 - Check for any obstructions or debris in the adjustment mechanism.
 - Apply a small amount of lubricant if the mechanism feels stiff.

If the problem persists, please contact QUIK LOK customer support.

8. SPECIFICATIONS

Feature	Detail
Model Number	T-22
Brand	QUIK LOK
Type	Double-Brace, 2-Tier Keyboard Stand
Material	Alloy Steel
Color	Black
