

Bunn Bunn 39200.0000 Titan

Bunn Titan Dual Brewer Coffee Maker

MODEL: 39200.0000

Introduction

This manual provides essential instructions for the safe and efficient operation, installation, and maintenance of your Bunn 39200.0000 Titan Dual Brewer Coffee Maker. Please read this manual thoroughly before operating the appliance and retain it for future reference. This commercial-grade coffee maker is designed for high-volume brewing, delivering 34.3 gallons per hour.

Important Safety Instructions

- Always ensure the unit is properly grounded.
- Do not immerse the appliance in water or other liquids.
- Keep hands and cords away from hot surfaces during operation.
- Use only with the specified electrical supply (120/208V/60/3PH).
- Unplug the brewer before cleaning or servicing.
- This appliance is intended for commercial use only.

Product Overview and Components

The Bunn Titan Dual Brewer is a robust coffee maker designed for continuous, high-capacity brewing. It features a durable stainless steel construction and dual brewing stations to maximize output.

An image showing the Bunn 39200.0000 Titan Dual Brewer Coffee Maker, featuring its stainless steel construction, dual brewing heads, and two insulated servers with spigots. The control panel is visible at the top, and adjustable feet support the unit.

Key components include:

- **Dual Brew Heads:** For simultaneous or independent brewing.
- **Insulated Servers:** Designed to keep coffee hot for extended periods.
- **Control Panel:** Digital display and buttons for programming and operation.
- **Hot Water Faucet:** Provides instant hot water for other beverages.
- **Stainless Steel Housing:** Durable and easy to clean.

Setup and Installation

1. **Unpacking:** Carefully remove the brewer from its packaging. Inspect for any shipping damage.
2. **Placement:** Position the brewer on a sturdy, level surface capable of supporting its weight when full. Ensure adequate clearance for ventilation.
3. **Water Connection:** Connect the brewer to a potable cold water supply using a dedicated water line and shut-off valve. Ensure all connections are secure and leak-free.

4. **Electrical Connection:** Connect the brewer to a dedicated electrical circuit matching the specified voltage (120/208V/60/3PH). Consult a qualified electrician if unsure.
5. **Initial Rinse:** Before first use, run several cycles with only water to flush out any manufacturing residues.

Operating Instructions

The Bunn Titan Dual Brewer is designed for user-friendly operation, featuring automatic pulse brewing for optimal extraction.

1. **Power On:** Ensure the brewer is connected to power and the main switch is in the 'ON' position. Allow time for the water tank to heat up.
2. **Prepare Filter and Coffee:** Place a clean filter in the brew funnel. Add the desired amount of ground coffee.
3. **Position Server:** Place an empty insulated server beneath the brew funnel.
4. **Start Brewing:** Press the brew button for the desired side. The brewer will initiate the automatic pulse brewing cycle.
5. **Serving:** Once brewing is complete, remove the server and dispense coffee using the spigot.
6. **Hot Water Faucet:** To dispense hot water, open the hot water faucet. Close it securely after use.
7. **Energy Saver Mode:** Utilize the energy saver mode during off-peak hours to reduce power consumption. Refer to the control panel for activation.

Care and Maintenance

Regular cleaning and maintenance are crucial for the longevity and performance of your coffee brewer.

- **Daily Cleaning:** After each use, clean the brew funnels, spray heads, and servers with mild detergent and warm water. Rinse thoroughly.
- **Exterior Cleaning:** Wipe down the stainless steel exterior with a damp cloth. Do not use abrasive cleaners.
- **Descaling:** Periodically descale the brewer to remove mineral deposits. The frequency depends on water hardness. Follow manufacturer-recommended descaling procedures or consult a service technician.
- **Filter Replacement:** Always use fresh coffee filters for each brew cycle.

Troubleshooting

Problem	Possible Cause	Solution
Brewer not powering on	No electrical supply; main switch off	Check power cord, circuit breaker, and main power switch.
No water flow	Water supply off; clogged water line	Ensure water supply is open. Check for kinks in the water line.
Coffee not brewing	Brew button not pressed; water tank not heated	Press the brew button. Allow sufficient time for the water to heat.
Weak coffee	Insufficient coffee grounds; incorrect grind size	Use recommended amount of coffee. Ensure proper grind for commercial brewers.

If problems persist after attempting these solutions, contact customer support or a qualified service technician.

Product Specifications

Product Type: Food Service Supply

Model Number: Bunn 39200.0000 Titan

Brand: Bunn

Material: Stainless Steel

Color: Metallic

Coffee Maker Type: Drip Coffee Machine

Style: Modern

Special Features: Automatic Pulse Brewing, Insulated Server, Hot Water Faucet, Energy Saver Mode

Capacity: 34.3 Gallons/Hour

Electrical: 120/208V/60/3PH Standard

Country Of Origin: United States
