Lamin-x A019B

Lamin-x Custom Fit Blue Headlight Covers for Audi A5 (2008-2012) Instruction Manual

Model: A019B

1. Introduction

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Lamin-x Custom Fit Blue Headlight Covers for the Audi A5 (2008-2012). These covers are designed to protect your vehicle's headlights from road debris while offering a distinct aesthetic.

2. Safety Information and Legal Disclaimer

Important: Please read this section carefully before installation.
Our colored films are designed and recommended for off-road use only. Some protective films may not be legal for street use on primary front or rear lighting for vehicles used on public roadways. The customer is obligated to consult and review state and local jurisdiction laws regarding the application of colored films to automotive lighting prior to purchasing and installing Lamin-x Protective Films. We accept no liability for illegal installation (with or without knowledge of current legal statutes) by the purchaser and installer of any Lamin-x Protective Film products. Installation of colored Lamin-x Protective Films on automotive lighting for public roadway use is done so at the purchaser's and installer's own risk. Lamin-x Protective Films shall not be liable in any manner for any illegal installation by the purchaser and installer of Lamin-x Protective Films products.

3. Package Contents

Your Lamin-x Custom Fit Blue Headlight Covers package includes:

- Pre-cut protective film for both left and right headlights.
- DIY installation instructions (this manual).

Image 3.1: Contents of the Lamin-x headlight cover kit, showing the pre-cut film pieces for both headlights.

4. Setup and Installation

Proper installation is crucial for optimal appearance and durability. Follow these steps carefully:

1. **Clean the Headlight Surface:** Thoroughly clean the headlight lens with a mild soap and water solution. Remove all dirt, dust, wax, and residues. Rinse completely and dry with a lint-free cloth. Ensure the surface is completely dry and free of contaminants.
2. **Prepare the Film:** Peel the protective backing from the film. It is recommended to spray the adhesive side of the film and the headlight surface with a slip solution (water with a few drops of mild soap). This allows for easier positioning.

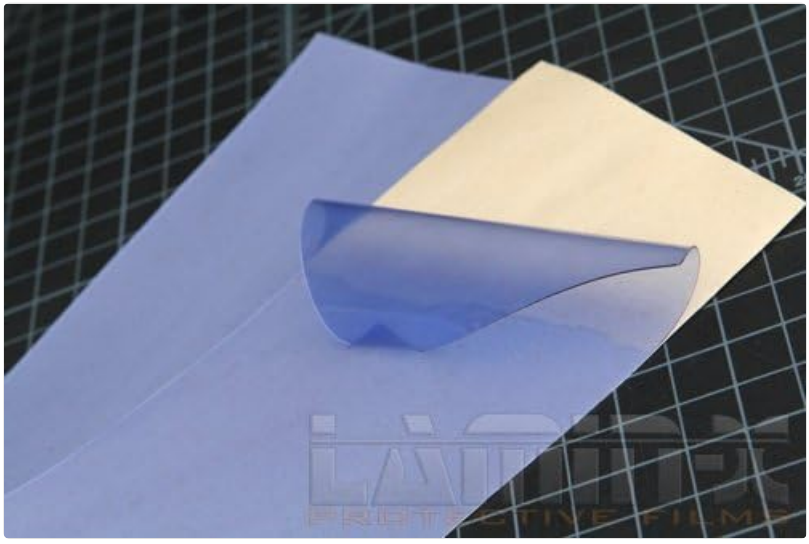

Image 4.1: The Lamin-x film consists of the protective layer and a removable backing, shown here separated.

3. **Position the Film:** Carefully align the pre-cut film over the headlight. The slip solution will allow you to slide and reposition the film until it perfectly matches the headlight's contours.

Image 4.2: A hand carefully positioning the Lamin-x film onto a clean car headlight, demonstrating the initial placement step.

4. **Squeegee Out Water and Air:** Once positioned, use a squeegee (not included, but often available in installation kits) to gently push out the water and air bubbles from under the film. Start from the center and work your way outwards, applying even pressure.

Image 4.3: A hand smoothing the Lamin-x film over a headlight, illustrating the process of removing air and water for a seamless finish.

5. **Trim Excess (if necessary):** While the film is pre-cut, minor adjustments may be needed. Use a sharp utility knife with caution to trim any excess film around the edges, ensuring a clean finish.
6. **Allow to Cure:** Allow the film to cure for at least 24-48 hours before washing the vehicle or exposing it to extreme weather conditions. This allows the adhesive to fully bond.

5. Operating Characteristics

The Lamin-x Blue Headlight Covers offer specific visual characteristics:

- When unlit, the covers appear light blue, providing a unique aesthetic to your vehicle.
- When illuminated by halogen lights, the blue tint allows for a white light output, maintaining visibility.

Image 5.1: A silver Audi A4 wagon showcasing the blue tinted headlights, demonstrating the aesthetic effect of the Lamin-x covers.

Image 5.2: A yellow car featuring blue tinted fog lights, illustrating how the Lamin-x film appears on vehicle lighting.

6. Maintenance

To ensure the longevity and appearance of your Lamin-x headlight covers:

- Clean the covers regularly with mild soap and water. Avoid abrasive cleaners or harsh chemicals.
- Use a soft cloth or sponge for cleaning to prevent scratching.
- Avoid high-pressure washing directly on the edges of the film, especially within the first few days after installation.
- The film is designed to protect against rock damage and sand-blasting, but extreme impacts can still cause damage.

Image 6.1: A demonstration of the film's durability, showing it being stretched by a screwdriver without tearing, highlighting its protective qualities.

7. Troubleshooting

Common issues and their solutions:

- **Bubbles or Wrinkles:** If bubbles or wrinkles appear after installation, gently lift the affected area of the film, re-spray with slip solution, and re-squeegee. Small water bubbles may dissipate over a few days as the film cures.
- **Film Not Sticking:** Ensure the headlight surface was thoroughly cleaned and free of wax or silicone. Re-clean the surface and reapply. Cold temperatures can affect adhesion; ensure installation is done in a warm environment.
- **Edges Lifting:** If edges lift, ensure they were properly squeegeed down during installation. Apply gentle heat (e.g., from a hairdryer on a low setting) to soften the film and press the edges down firmly.

8. Specifications

Brand	Lamin-x
Model Number	A019B
Item Weight	12.8 ounces
Package Dimensions	12 x 4 x 4 inches
Exterior Finish	Smooth
Color/Tint	Blue
Vehicle Compatibility	Audi A5 (2008-2012)

9. Warranty and Support

For specific warranty information or technical support, please contact Lamin-x directly through their official website or customer service channels. Keep your purchase receipt as proof of purchase.
