APPLICATION INSTRUCTIONS

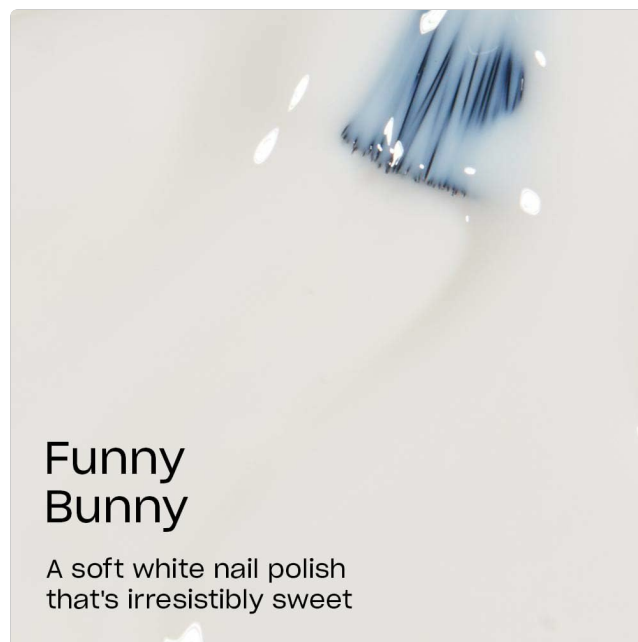

For optimal results and extended wear, follow these steps for applying your OPI Nail Lacquer:

1. Preparation

1. Ensure nails are clean, dry, and free of any oils or previous polish. Use a polish remover to thoroughly clean the nail surface.
2. Gently roll the nail lacquer bottle between your palms to mix the polish and prevent air bubbles. Avoid shaking the bottle vigorously.
3. Apply one thin coat of OPI Natural Nail Base Coat to each nail. This creates a protective layer and helps the color adhere better. Allow to dry completely.

2. Color Application

4. Apply a thin, even coat of OPI Funny Bunny Nail Lacquer to each nail. Ensure the brush covers the entire nail surface from cuticle to tip.
5. Allow the first coat to dry for 5-10 minutes.
6. Apply a second thin coat of OPI Funny Bunny for vibrant, full coverage. For a more opaque finish, a third thin coat may be applied after the second coat has dried.
7. Cap the free edge of each nail with polish to help prevent chipping.

3. Finishing Touch

7. Apply one thin coat of OPI Top Coat or Matte Top Coat to seal the manicure, protect the color, and prevent chipping. Cap the free edge with the top coat as well.
8. Allow the top coat to dry completely.

STEP 1		PREP Apply one coat of Natural Nail Base Coat to prepped nails to create the perfect foundation for color.
STEP 2		COLOR Apply two coats of Nail Lacquer color for vibrant, full coverage and chip-resistant wear.
STEP 3		TOP Apply one coat of OPI Top Coat or Matte Top Coat to protect color and prevent chipping.

MAINTENANCE

- **Extend Wear:** Reapply a thin layer of top coat every 2-3 days to refresh your manicure and extend its chip-resistant wear up to 7 days.
- **Cuticle Care:** Apply cuticle oil daily to keep cuticles moisturized and prevent picking, which can lead to premature chipping.

TROUBLESHOOTING

- **Streaky Application:** If the polish applies streaky, ensure you are applying thin coats and allowing sufficient drying time (5-10 minutes) between each layer. The Pro-Wide brush is designed for smooth application, but technique is key.
- **Nail Staining:** Darker or highly pigmented polishes can sometimes stain nails if a base coat is not used. Always apply a base coat to protect your natural nails. If staining occurs, it can be difficult to remove from cuticles or damaged nail surfaces.
- **Bubbling:** Avoid shaking the bottle vigorously before use; gently roll it between your palms instead. Applying very thick coats can also lead to bubbling.
