Victor M333

Victor M333 Multiple Catch Humane Mouse Trap User Manual

Model: M333

1. PRODUCT OVERVIEW

The Victor M333 Multiple Catch Humane Mouse Trap is designed for the safe and humane capture of mice without causing harm. This trap allows for live catch and release, making it an ideal solution for pest control around homes, businesses, and other areas where traditional traps are not preferred. It is suitable for both indoor and outdoor use.

Key Features:

- Designed for humane catch and release of mice.
- Capable of catching and holding up to 4 mice per setting.
- Features a lid that opens for easy, offsite release after catches.
- Traps can be emptied and reused multiple times.
- Suitable for use in both indoor and outdoor environments.

Image 1.1: The Victor M333 trap is designed to humanely catch up to four mice at once.

Image 1.2: The trap is safe for use around people and pets when used as directed.

Image 1.3: The Victor M333 trap is versatile for both indoor and outdoor applications.

2. SETUP INSTRUCTIONS

Follow these steps to prepare your Victor M333 trap for effective mouse capture.

2.1 Baiting the Trap

1. Locate the sliding lid on the top of the trap.
2. Gently slide the lid open to access the bait compartment.
3. Apply a small amount of bait, such as peanut butter, chocolate spread, or seeds, into the designated trough inside the trap. A cotton swab can be used to apply bait without leaving human scent.
4. Slide the lid back into its closed position, ensuring it is securely latched.

Release
mice

Image 2.1: Slide the top lid to open the trap for baiting.

Image 2.2: Apply a small amount of bait into the designated trough.

2.2 Trap Placement

Place the baited trap in areas where mouse activity is suspected. Mice tend to travel along walls, so positioning the trap parallel to a wall or in corners is often most effective. Ensure the entrance holes are accessible to mice.

Image 2.3: Overview of the easy-to-use steps for the Victor M333 trap.

3. OPERATING INSTRUCTIONS

Once the trap is set up, monitor it regularly and follow these steps for checking and releasing captured mice.

3.1 Monitoring the Trap

- Check the trap frequently, ideally at least twice a day, to ensure any captured mice are released promptly.
- The clear lid allows for easy visual inspection to determine if mice have been caught.

3.2 Releasing Captured Mice

1. Carefully transport the trap with captured mice to an appropriate release location. This should be at least two miles away from your property to prevent their return.
2. At the release site, slide the lid open to allow the mice to exit the trap freely.
3. Once all mice have exited, close the lid securely.

USE INDOORS & OUTDOORS

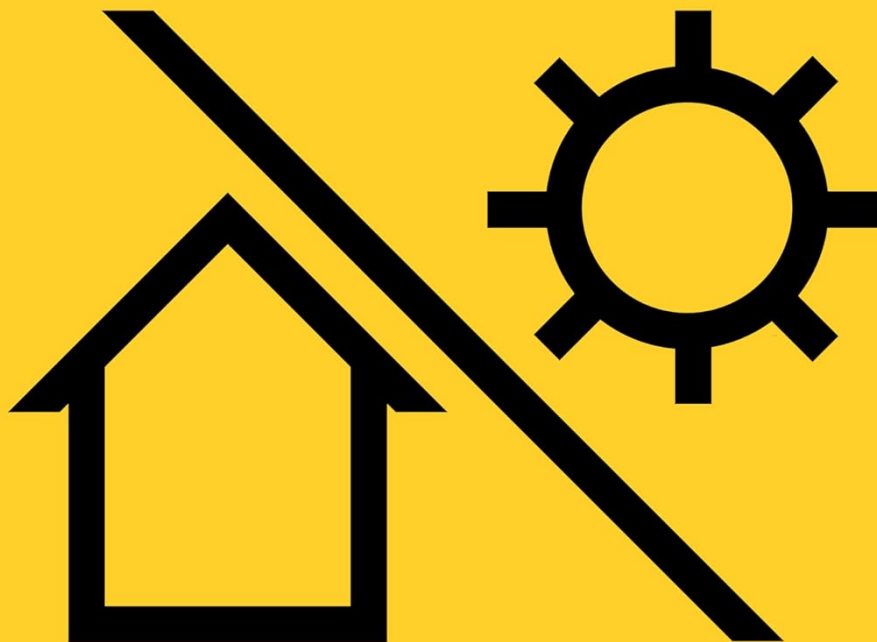

Image 3.1: Place the trap along walls or in corners where mice are active.

Image 3.2: Release captured mice at a suitable location away from your property.

4. MAINTENANCE

Proper cleaning and care will ensure the longevity and effectiveness of your Victor M333 trap.

4.1 Cleaning the Trap

- After each use, especially after releasing mice, it is recommended to clean the trap.
- The lid can be fully removed for thorough cleaning.
- Wash the trap with warm, soapy water. A mild disinfectant can also be used.
- Rinse thoroughly and allow the trap to air dry completely before re-baiting and reusing.

Image 4.1: The trap can be easily opened and cleaned for repeated use.

4.2 Reusability

The Victor M333 trap is designed for multiple uses. With proper cleaning and maintenance, it can be deployed repeatedly to manage mouse populations.

5. TROUBLESHOOTING

If you encounter issues with your Victor M333 trap, consider the following common problems and solutions:

5.1 Mice Not Entering the Trap

- **Bait Type:** Experiment with different baits. While peanut butter is common, mice may prefer other foods like chocolate, seeds, or oats.
- **Bait Amount:** Use a small amount of bait. Too much bait can make it easy for mice to eat without fully entering the trap.
- **Placement:** Ensure the trap is placed in areas of high mouse activity, such as along walls, near droppings, or

where gnaw marks are visible.

- **Scent:** Avoid leaving strong human scents on the trap. Handle the trap with gloves if possible.

5.2 Bait Taken, No Catch

- **Trap Mechanism:** Verify that the internal trap mechanism (the door that closes) is functioning correctly and is not obstructed.
- **Bait Application:** Ensure the bait is placed deep enough inside the trap so that the mouse must fully enter to reach it.

5.3 Mice Escaping or Chewing Through Trap

- **Regular Checks:** Check the trap frequently. Mice left in the trap for extended periods may become distressed and attempt to chew their way out.
- **Trap Integrity:** Inspect the trap for any damage or cracks that could allow mice to escape. Replace damaged traps.

6. SPECIFICATIONS

Attribute	Detail
Brand	Victor
Model Number	M333
Material	Plastic
Product Dimensions	1.8"L x 4"W x 7.2"H
Item Weight	4.42 ounces
Number of Pieces	1
Target Species	Mouse
Is Electric	No
Color	Multi
UPC	072868840241, 072868333132

7. WARRANTY AND SUPPORT
